Quality and Value for the 000-012 Exam

[Just4Exams Practice Exams](#) for IBM IBM certifications I 000-012 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

100% Guarantee to Pass Your 000-012 Exam

If you do not pass the IBM certifications I 000-012 exam on your first attempt using our Just4Exams **000-012 testing engine and pdf study guide**, we will give you a FULL REFUND of your purchasing fee.

Downloadable, Interactive 000-012 Testing engines and PDF Version

Our Exam Preparation Material provides you everything you will need to take a **IBM certifications I certification** examination. Details are researched and produced by **IBM Certification** Experts who are constantly using industry experience to produce precise, and logical.

Exam : IBM 000-012

Title : IBM Tivoli Usage & Accounting Manager V7.1 Implementation

1. What is the purpose of CPU normalization within IBM Tivoli Usage and Accounting Manager V7.1?

- A.to not charge for CPU utilization
- B.to charge less for CPU utilization
- C.to charge more for CPU utilization
- D.to charge evenly for CPU utilization

Answer: D

2. When identifying data sources and corresponding collectors, which collector does a CSV data source require?

- A.WinDisk

- B.WinProcess
- C.StandardCollector
- D.UniversalCollector

Answer: D

3. Which core software for the Web Reporting Server is required to be installed?

- A.SQL
- B.WebSphere
- C.Integrated Solutions Console
- D.Microsoft Internet Information Server (IIS)

Answer: D

4. Using the database collector input, what happens to the selected data during Integrator input processing?

- A. Identifiers and resources are validated.
- B. The select output is written into a CSR file.
- C. Data fields are mapped to identifiers or resources.
- D. Resources with the same identifiers are aggregated.

Answer: C

5. A customer wants to use DB2 on Linux for the IBM Tivoli Usage and Accounting Manager V7.1 (TUAM) database. The database has been created using a UTF-8 format.

Which two steps must be performed before initializing the database? (Choose two.)

- A. create a buffer pool for the database
- B. disable TUAM access to the database
- C. define stored procedures used to initialize the database
- D. create a Regular User tablespace and System Temporary tablespaces
- E. go to the TUAM Integrated Solutions Console System Maintenance Database Table Manager panel to create database tables

Answer: AD

6. Which IBM Tivoli Usage and Accounting Manager V7.1 panel is selected to set the Trace Message and Log Message level?

- A. Troubleshooting Transactions Logging
- B. Troubleshooting Configuration Logging
- C. System Maintenance Transactions Logging
- D. System Maintenance Configuration Logging

Answer: D

7. A customer wants to collect usage information for various types of databases in their environment.

What are two database types for which a collector is provided with in the IBM Tivoli Usage and Accounting Manager V7.1 Enterprise Collector Pack? (Choose two.)

- A. DB2
- B. mySQL
- C. Informix
- D. Oracle
- E. Sybase

Answer: AD

8. A customer wants to collect usage information for various types of databases in their environment.

What are two database types for which a collector is provided with in the IBM Tivoli Usage and Accounting Manager V7.1 Enterprise Collector Pack? (Choose two.)

- A. DB2
- B. mySQL
- C. Informix
- D. Sybase
- E. Microsoft SQL Server

Answer: AE

9. Click the Exhibit button.

Consider the following account code:

AAABBBBCCCCDD

Which length values would be filled in the Account Code Structure Maintenance shown in the exhibit if there were four levels?

- A. 3, 4, 5, 2

B.2, 5, 4, 3
C.4, 3, 2, 5
D.3, 7, 11, 13
Answer: A

10. Which two processing files should be reviewed for database size estimation? (Choose two.)

- A.job log file
- B.AcctCSR.txt
- C.yyyymmdd.txt
- D.Exceptions.txt
- E.CurrentCSR.txt

Answer: AB

11. Using the IBM Tivoli Usage and Accounting Manager V7.1 Integrated Solutions Console, where are the rate tables assigned to the clients in the Client table?

- A.Chargeback Maintenance Rates
- B.Chargeback Maintenance Clients
- C.System Maintenance Users Groups
- D.Chargeback Maintenance Rate Groups

Answer: B

12. Click the Exhibit button.

In the Log Files panel displayed in this exhibit, the UnixDB2 process ended with a process failure.

In which step did the failure occur?

- A.UnixOS
- B.Process
- C.Integrator
- D.UnixNightly

Answer: B

13. If a user requires account codes with different levels or different offset positions, what should they consider doing?

- A.use the default account code structure
- B.create alternate account code structures
- C.delete the default account code structure
- D.restrict using the default account code structure

Answer: B

14. A customer will be using a Windows 2003 Server with SQL Server Reporting Services for their IBM Tivoli Usage and Accounting Manager V7.1 Reporting Server.

Which two components need to be present on the reporting server? (Choose two.)

- A.Microsoft SQL Server
- B.WebSphere Application Server
- C.Microsoft Internet Information Server (IIS)
- D.Microsoft Report Viewer Redistributable 2005
- E.Business Intelligence and Reporting Tools (BIRT)

Answer: CD

15. Which two accounting data sources can be processed only with IBM Tivoli Usage and Accounting Manager V7.1 Server running in a Windows environment? (Choose two.)

- A.Windows Process Data Collector
- B.Oracle Data Collector for UNIX/Linux
- C.AIX Advanced Accounting Data Collector
- D.DB2 Data Collector for Windows (WinDB)
- E.Microsoft Internet Information Server (IIS)

Answer: AE

16. A customer requests that Integrated Solutions Console (ISC) security be enabled for the IBM Tivoli Usage and Accounting Manager V7.1 (TUAM) application. An administrator is assigned the task of maintaining clients and rate codes.

For which TUAM ISC security group does the administrator need a user account?

- A.tuammaint
- B.tuamadmin

- C.tuamtransactions
- D.tuamchargebackadmin

Answer: A

17. What are the minimum requirements for processor speed and memory for the IBM Tivoli Usage and Accounting Manager V7.1 Administration Server?

- A.3 GHz, 2 GB
- B.3 GHz, 3 GB
- C.3 GHz, 4 GB
- D.4 GHz, 3 GB

Answer: A

18. What is the difference between the length and full length related to the account code structure?

- A.The length is the number of bytes for the specific entity defined by the level, while the full length is manually calculated and represents the total number of bytes for all levels.
- B.The length is the number of bytes for the specific entity defined by the level, while the full length is automatically calculated and represents the total number of bytes for all levels.
- C.The length is automatically calculated and represents the total number of bytes for all levels, while the full length is the number of bytes for the specific entity defined by the level.
- D.The length is automatically calculated and represents the total number of bytes for all levels, while the full length is the number of bytes automatically calculated for the specific entity defined by the level.

Answer: B

19. What is the benefit of CSR+ Output as an Integrator output stage?

- A.More detailed data is written to the CSR files.
- B.Additional aggregation is done for the CSR file.
- C.The order of files is optimized for the next step.
- D.Index data is added in the header of the CSR record.

Answer: D

20. What is the maximum number of bytes an account code can contain?

- A.8
- B.96
- C.127
- D.unlimited

Answer: C
