Quality and Value for the 000-324 Exam

[Just4Exams Practice Exams](#) for IBM IBM certifications I 000-324 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

100% Guarantee to Pass Your 000-324 Exam

If you do not pass the IBM certifications I 000-324 exam on your first attempt using our Just4Exams **000-324 testing engine and pdf study guide**, we will give you a FULL REFUND of your purchasing fee.

Downloadable, Interactive 000-324 Testing engines and PDF Version

Our Exam Preparation Material provides you everything you will need to take a **IBM certifications I certification** examination. Details are researched and produced by **IBM Certification** Experts who are constantly using industry experience to produce precise, and logical.

Exam : IBM 000-324

Title : IBM eserver zseries technical.version 1

1. Which of the following statements applies to a CICS/DB2 workload?

- A. It usually runs during off peak time.
- B. It is an online workload.
- C. It is a batch workload.
- D. It does not support data sharing.

Answer: B

2. Which of the following I/O Channel Subsystem components would improve the efficiency of TCP/IP?

- A. Dynamic Channel Path Management

- B. Channel Subsystem Priority Queuing
- C. SAPs and EMIF
- D. Queued Direct Input/Output

Answer: D

3. Which of the following middleware is an important part of the IBM's on demand strategy for the zSeries platform?

- A. Debug tool
- B. WebSphere Application Server (WAS)
- C. Resource Management Facility (RMF)
- D. SA/390

Answer: B

4. Which Crypto feature is required on a z990 to provide both the secure key and the accelerator function?

- A. Crypto Express 2
- B. PCIxCC
- C. PCICA
- D. CPACF

Answer: A

5. An Internet Service Provider is considering using a z990 for deploying hundreds of Linux systems under z/VM. The zSeries platform would provide the MOST value for this customer in terms of:

- A. Processing speed.
- B. Response time.
- C. Systems management.
- D. Memory size.

Answer: C

6. Which of the following is NOT a Server-to-Server communication method between two physical machines?

- A. InterSystem Channels (ISC)
- B. HiperSockets
- C. Integrated Cluster Bus (ICB) channels
- D. Channel-to-channel (CTC or FCTC) connections

Answer: B

7. Which of the following is true about IBM's Mainframe Charter?

- A. It highlights ways IBM intends to deliver ongoing value for customers using zSeries.
- B. It helps customers accelerate their implementation of IBM's on demand business initiatives using the S/390.
- C. It is primarily about products and services available for helping customers simplify their IT infrastructure.
- D. It is a way to implement Java technologies

Answer: A

8. Parallel Sysplex clustering provides which of the following tactical benefits?

- A. It provides near continuous availability.
- B. Applications can be isolated to improve performance.
- C. FICON cabling can improve response times.
- D. Use of channel subsystems is more efficient.

Answer: A

9. The Hardware Configuration Manager (HCM) allows the:

- A. Operations staff to operate the system from a PC.
- B. Operations staff to reconfigure zSeries channel attachments dynamically.
- C. Systems programmer to define the zSeries I/O subsystem via a PC application.
- D. Systems programmer to replace the Hardware Configuration Definition (HCD) function.

Answer: C

10. z/OS.e runs on which of the following machines?

- A. MP3000
- B. z900 and z990
- C. z800 and z890
- D. All zSeries architecture machines

Answer: C

11. A customer needs 12 additional FICON channels on a 2084. Six channels are LX, and six are SX. The required FICON is Express2. How many FICON Express feature codes will be required to meet this requirement?

- A. 3, where each FICON Express2 feature code has four FICON channels
- B. 4, two feature codes for LX FICON and two feature codes for SX FICON
- C. 6, three per FICON channel type
- D. 6, where each FICON Express 2 feature code has two FICON channels

Answer: B

12. What is the maximum number of zAAP processors that can be installed on a 2084?

- A. 16
- B. 12
- C. 8
- D. 0

Answer: A

13. A performance analysis indicates that a customer's current 2064-2C5 needs more processing power. The MES is being requested based on the analysis to upgrade from a 2C5 to a 2C7 as soon as possible. The customer cannot afford the maintenance window for installation. Which of the following is the preferred action?

- A. Ask the customer to schedule the installation when the machine can be stopped.
- B. Tune the current machine to improve the performance as much as possible and delay the installation until the machine can be stopped.
- C. Persuade the customer to schedule the installation window immediately.
- D. Schedule the installation to be performed concurrently.

Answer: D

14. Which of the following is a new function on the z890 that is not available on the z800?

- A. An MCM with 5 processors
- B. Capacity Backup
- C. OSA-Express Integrated Console Controller
- D. HiperSockets

Answer: C

15. All of the following apply to z/OS WLM EXCEPT:

- A. It provides programming interfaces that can allow customers to set goals for their transactions.
- B. It provides goal oriented, dynamic resource management and goals are based on business importance.
- C. It simplifies definition, control, and reporting of the performance requirements for z/OS workloads.
- D. It coordinates z/OS images across a sysplex to process work towards multiple goals and shares goals with other products.

Answer: D

16. Which of the following workloads would NOT be a candidate for a z/OS.e partition?

- A. WebSphere for z/OS
- B. PL/I Applications
- C. SAP
- D. Oracle

Answer: B

17. What is considered to be a traditional mainframe workload?

- A. SerMets, JSPs
- B. Linux workload
- C. CPU intense
- D. Batch and OLTP

Answer: D

18. Which of the following z800 models can be upgraded to a z890 model?

- A. 1C8
- B. 0A2
- C. 310
- D. 100

Answer: B

19. Which of the following operating systems is supported on a z990?

- A. z/OS.e 1.6
- B. z/VM 4.4
- C. OS/390 2.8
- D. z/OS 1.1

Answer: B

20. Which of the following software products does NOT have an offering to run under Linux?

- A. Oracle
- B. WebSphere
- C. IMS DB
- D. DB2 UDB

Answer: C
