Exam : IBM 000-426

Title : IBM System z Technical Support

1. A performance analysis indicates that a customer's current z9 needs more processing power. The MES is being requested based on the analysis to add additional processors as soon as possible. The customer cannot afford the maintenance window for installation. Which of the following is the preferred action?

- A. Ask the customer to schedule the installation when the machine can be stopped.
- B. Tune the current machine to improve the performance as much as possible and delay the installation until the machine can be stopped.
- C. Persuade the customer to schedule the installation window immediately.
- D. Schedule the installation to be performed concurrently.

Answer: D

2. The System z sales specialist has brought the System z technical specialist in very late in the pre sale process. This caused several problems, and the specialist had to correct some misunderstandings about the technology and capabilities. To avoid these misunderstandings in future, which of the following would be the most appropriate way to handle this?

- A. Document the problems and send a written summary to the sales specialist.
- B. Explain the situation to the customer and document the problems in the SAR.
- C. Ask the sales specialist to bring them in earlier so that they can better understand the account.
- D. Discuss the situation and the related issues with the sales manager and ask them to discuss with the sales specialist.

Answer: C

3. A company wants to enable customers to access their sales catalog via the Internet but is concerned about security. What z9 features are available to prevent an unauthorized person from viewing the data as it passes through the Internet?

- A. OSA/Express GbE card and QDIO or non-QDIO features of z/OS
- B. Crypto Express2 card and System SSL in z/OS
- C. PCICC or PCICA adapter and the Ported Tools feature of z/OS
- D. CPACF and RACF

Answer: B
