Exam : IBM 000-551

Title : IBM Certified Specialist - IBM Optim Implementation for Dist

1. What is the primary purpose of the Optim Relationship Index Analyzer Dialog?

- A. It automatically creates indexes regardless of the user's rights on the tables involved in relationships used in all access definitions stored in an Optim Repository.
- B. It reviews the last time the RDBMS statistics were updated for tables used in an access definition and automatically issues the commands to update them if they have not been run since the last archive.
- C. It analyzes the index b-trees and if they are inefficient, will drop and rebuild the index automatically or can be scheduled.
- D. It analyzes DBMS indexes for relationships used with the Access Definition and to create any needed indexes, if the user has the correct privileges in the database.

Answer: D

2. When using InfoSphere Federation Server to access Optim extended data sources, what must be created to define a federated object?

- A. a wrapper, a system definition, a user mapping, and a nickname
- B. a wrapper, a server definition, a user mapping, and a DB Alias
- C. a wrapper, a system definition, a nickname, and a DB Alias
- D. a wrapper, a server definition, a user mapping, and a nickname

Answer: D

3. You have exported an Archive Request and checked the 'export subordinate definitions' box. Which types of objects might you expect to find in the export file?

- A. Archive Request, Access Definition, Optim Relationships, Optim Primary Keys
- B. Archive Request and Access Definition only
- C. Archive Request, Access Definition, and Table Map
- D. Archive Request, Access Definition, Storage Profile, Report Request

Answer: D

4. What are three valid levels of Optim Security? (Choose three.)

- A. Database Security
- B. Object Security
- C. Functional Security
- D. Network Security
- E. Archive File Security

Answer: BCE

5. Click the Exhibit button.

Referring to the exhibit, what would be a success criteria for the given use case?

- A. The performance of the application will improve.
- B. The archive, purge, and all related processes for the Orders object completes in less than six hours.
- C. The Optim processing will remove old Order data from the database and be accessible using ODM.
- D. The weekly archive and purge processing completes in six hours or less.

Answer: B

6. When performing an archive process that uses a Storage Profile, which action could be performed as a result of using the storage profile?

- A. Creates a connection to the database for use by the storage management device.
- B. Creates a connection to the storage management device and copies an Archive File to a backup device.
- C. Creates a storage allocation parameter for the storage or file management system.
- D. Creates a duplicate of the existing information from the Archive Repository on the storage management device.

Answer: B

7. You have installed the Optim Server on an AIX system. The system is configured with various internal and external storage options attached to the server. Where should the Optim Temporary Work folder be placed?

- A. the attached archive appliance
- B. the attached NAS device
- C. the system's internal disk drives
- D. the attached SAN device

Answer: C

8. In Attunity, where is the metadata stored?

- A. On the server where IRPCD is running.
- B. In XML files where it can be manually updated.
- C. In the Optim Directory where the DB Alias is found.
- D. On the client where Attunity Studio is running.

Answer: A

9. Which performance enhancement do multiple database connections provide when used during an extract or archive?

- A. Multiple database connections allow you to extract/archive rows from multiple tables simultaneously.
- B. Multiple database connections allow you to extract/archive rows from a single table concurrently.
- C. Multiple database connections allow you to extract/archive rows only from Reference Tables simultaneously.
- D. Multiple database connections cannot be used during extract or archive, only during delete.

Answer: B

10. What does an Access Control List protect?

- A. the Optim program
- B. nav_util
- C. Optim Configuration tasks
- D. any Optim object

Answer: D

11. Which statement is correct with respect to setting expectations around archive access and reporting?

- A. Access to archive data performs just like a database.
- B. ODM must be used to access the archives.
- C. Access using ODM provides nearline access to archived data.
- D. Archive data access should rarely be required.

Answer: C

12. Click the Exhibit button.

Given this information from the Relationships tab of an Access Definition, and the information from this Show Steps report in the exhibit, why is the STATE_LOOKUP table listed as UNTRAVERSED?

- A. There is no active relationship for the STATE_LOOKUP table.
- B. Q2 needs to be activated between SALES and STATE_LOOKUP.
- C. Q1 needs to be de-activated between SALES and STATE_LOOKUP.
- D. The relationship between SALES and STATE_LOOKUP is unselected.

Answer: B

13. You can specify the default minimum retention period for protecting Archive Files on Centera from deletion. How is the minimum retention period calculated?

- A. from the time Centera copies the file
- B. from the time the Archive Process copies the file to Centera
- C. from the time that the Archive Process copies the file to the local file system
- D. from the time Centera copies the file from the local file system

Answer: B

14. The Optim Initialization Exit facility provides which three benefits? (Choose three.)

- A. Observes what is being done by a given user at various points in a programs logic.
- B. Automates the reporting of Optim requests that fail.
- C. Ensures that the users request meets your company security standards.
- D. Changes the request, if needed, to pass your company standards or forbids the request altogether.
- E. Adds support to Optim for new code pages.

Answer: ACD

15. What are two prerequisites to an Optim archiving Project Kickoff meeting? (Choose two.)

- A. Obtain all Optim software required for project.
- B. Set up hardware for all environment installations.
- C. Review the Optim and application specific documentation.
- D. Finalize all archiving requirements.
- E. Choose the project sponsor.

Answer: AC

16. What are two possible locations where would you could find the fetch strategy chosen by Attunity when working with an extended data source? (Choose two.)

- A. nav.log
- B. irpcd.log
- C. optdbg.xml
- D. db2trc file
- E. admin_svc.log

Answer: AC

17. Given the command line syntax shown below:

```
PROCMD /R JOB=PERSONNEL' OUTPUT=PER.TXT MONITOR+ QUIET+
```

Which task is performed?

- A. Runs the job named PERSONNEL, places the process report output in a file named PER.TXT, and displays prompts and error dialogs

during the process.

B. Schedules a job named PERSONNEL, stores the extracted data in a file named PER.TXT, and displays information dialogs during the process.

C. Runs the job named PERSONNEL, places the process report output in a file named PER.TXT, and displays information dialogs during the process.

D. Schedules the job named PERSONNEL, stores the extracted data in a file named PER.TXT, and displays prompts and error dialogs during the process.

Answer: C

18. One Optim report provides detailed performance information about your Archive, Extract and Delete processes, including basic table and selection criteria information as defined in the Access Definition, the number of key values used to retrieve rows, and DBMS Access statistical information. This report is essential for tuning your Optim processes. What is the name of this report and where do you indicate that Optim produce the report?

A. Process Report; selected for creation on the Archive or Extract Process Request.

B. Show Steps Report; provided on Access Definition Editor.

C. Statistical Report; selected for creation on the Archive or Extract Process Request.

D. File Access Definition Report; selected for use on the Archive Process Request.

Answer: C

19. Which requirement statement should raise a "red flag" within the Requirements Analysis Phase?

A. The business is seeking to privatize all personally identifiable information (PII) within the application.

B. Archiving of orders and associated data, including file attachments, older than 10 years.

C. Access to the archives just like a database.

D. Daily processing of archives from production.

Answer: C

20. An Archive File Collection is a list of Archive Files that are treated as a single data source by Open Data Manager (ODM). Which two statements are true regarding Archive Collections? (Choose two.)

A. Use the Collections tab on the Archive Request Editor to specify the collection(s) in which the Archive File should be added automatically.

B. An Archive File may belong to multiple Archive Collections, and an Archive Collection may contain multiple Archive Files.

C. Archive Files contained within a collection do not need to be registered in the Archive Directory.

D. ODM, by default, processes the Archive Files in the collections in ascending date order based on the dates the Archive Files were created.

E. An Archive File containing multiple tables with the same names and creator ids, but with different DB Aliases, may be stored in an Archive Collection.

Answer: AB
