- A. REORG
- B. IMPORT
- C. REBIND
- D. RUNSTATS
- E. CREATE INDEX

Answer: DE

7. Which two of the following are only possible using a redirected restore?

- A. Redefining table space containers
- B. Replacing a damaged recovery history file
- C. Recovering table spaces in roll-forward pending
- D. Specifying an alternate log path for roll forward
- E. Restoring the database onto a different server with the same operating system

Answer: AE

8. Given an application with the embedded static SQL statement:

```
INSERT INTO admin.payroll (employee, salary) VALUES ("Joe Smith",30000)
```

Which two of the following privileges are required to successfully bind the application?

- A. ALTER
- B. INSERT
- C. UPDATE
- D. BINDADD
- E. EXECUTE

Answer: BD

9. Given the following piece of a LIST APPLICATIONS output:

```
Auth Id ApplicationApplApplication Id DB # of
```

```
Name Handle Name Agents -----
```

```
CERTPAYROLL.EXE7*LOCAL.DB2.991004124355 STAFF 1
```

Which of the following commands will terminate the client application's connection?

- A. KILL APPLICATION (7)
- B. FORCE APPLICATION (7)
- C. DISCONNECT APPLICATION (7)
- D. KILL APPLICATION payroll.exe
- E. FORCE APPLICATION payroll.exe
- F. DISCONNECT APPLICATION payroll.exe

Answer: B

10. Given the following command:

How many bufferpools are in the inventory database?

- A. 0
- B. 1
- C. 2
- D. 3
- E. 4

Answer: B

11. Given the following statement:

```
CREATE TABLESPACE dms1 MANAGED BY DATABASE USING (FILE 'dms01' 1024K)
```

How many pages will be created for the table space?

- A. 128
- B. 256
- C. 512
- D. 1024

Answer: B

12. To examine the exhibit, press the exhibit button.

Given the following statement:

```
SELECT id, deptname, manager  
FROM staff, org  
WHERE dept=deptnumb  
ORDER BY deptname
```

Which operator in the Visual Explain is performing the ORDER BY?

- A. SORT(5)
- B. SORT(11)
- C. SORT(19)
- D. FILTER(15)

Answer: A

13. Which of the following will the REORGCHK command display?

- A. Only packages that need to be rebound
- B. Only tables that need to be reorganized
- C. Information to determine which tables need to be reorganized
- D. The timestamp indicating the last time each table was reorganized

Answer: C

14. On which of the following event types can a WHERE clause be used to filter the data returned by the event monitor?

- A. TABLES
- B. DEADLOCKS
- C. TABLESPACES
- D. CONNECTIONS

Answer: D

15. Instances that are down are reported in the Health Center as which of the following alert states?

- A. Alarm
- B. Normal
- C. Warning
- D. Attention

Answer: D

16. Given an application with the embedded static SQL statement:
INSERT INTO admin.payroll (employee, salary) VALUES ("Becky Smith",80000)

Which of the following privileges must a user hold to run the application?

- A. ALTER on the table
- B. INSERT on the table
- C. DBADM on the database
- D. EXECUTE on the package

Answer: D

17. Which of the following statements is required to register a federated database source?

- A. CREATE VIEW
- B. CREATE WRAPPER
- C. CREATE TRANSFORM
- D. CREATE TYPE MAPPING

Answer: B

18. Which of the following is supported when LOGRETAIN is OFF and USEREXT is OFF?

- A. Log archiving
- B. Crash recovery
- C. Rollforward recovery
- D. Infinite active logging

Answer: B

19. Given the following tables:

Referential integrity must be supported between parent table CANDIDATE and dependent table TEST_TAKEN. Which of the following unique constraints can be used to support this referential integrity?

- A. Foreign key on table CANDIDATE
- B. Primary key on table CANDIDATE
- C. Foreign key on table TEST_TAKEN
- D. Primary key on table TEST_TAKEN

Answer: B

20. A DBA has created three related backup tasks in the Task Center. After all three of these tasks are completed, a fourth task must be run. Which of the following describes how the DBA can automate the running of the fourth task based on the results of the first three tasks?

- A. Indicate on the schedule for the fourth task that it is to begin when the first three tasks are completed.
- B. Set a notification on the first three tasks that sends a note to the DBA indicating that the fourth task can be initiated.
- C. Create a grouping task for the three backup tasks. Create a task action for the fourth task to be run on the completion of the group.
- D. When creating the fourth task, indicate on the Success Code Set field that the first three tasks must run successfully before running this one.

Answer: C
