

## **IBM 000-799**

**Exam Name:** *ibm tivoli storage manager v5.3 implementation*

**Q & A :** 114 Q&As

**Pdf Demo**

### **Quality and Value for the 000-799 Exam**

[Just4Exams Practice Exams](#) for IBM Deployment Professional 000-799 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

### **100% Guarantee to Pass Your 000-799 Exam**

If you do not pass the Deployment Professional 000-799 exam on your first attempt using our Just4Exams **000-799 testing engine and pdf study guide**, we will give you a FULL REFUND of your purchasing fee.

### **Downloadable, Interactive 000-799 Testing engines and PDF Version**

Our Exam Preparation Material provides you everything you will need to take a [Deployment Professional certification](#) examination. Details are researched and produced by [IBM Certification](#) Experts who are constantly using industry experience to produce precise, and logical.

Exam : IBM 000-799

Title : IBM Tivoli Storage Manager V5.3 Implementation

1. What is an inactive version of a file?
  - A. one that has been sent off-site
  - B. one that is no longer backed up
  - C. one that has exceeded the retention date
  - D. one that is not the latest backed up version

Answer: D

2. What can be customized at both the server and client?

- A. TCPTXNSIZE
- B. TCPADDRESS
- C. TCPPACKETSIZ
- D. TCPWINDOWSIZE

Answer: D

3. Which three issues should the IBM Tivoli Storage Manager (Storage Manager) project team consider before beginning implementation? (Choose three.)

- A. if the archive bit is set in the file attributes
- B. bandwidth and settings of hubs and switches
- C. the number of applications installed on the client
- D. Storage Manager client restore time requirements
- E. number of disk storage devices on a client platform
- F. amount of Storage Manager client data that changes each day

Answer: BDF

4. When sizing the IBM Tivoli Storage Manager (Storage Manager) tape usage, which type of backup uses the least tape?

- A. synthetic backup
- B. progressive backup
- C. full + differential backup
- D. full + incremental backup

Answer: B

5. A new administrative schedule did not run when it was scheduled. What is the most likely cause?

- A. The Priority = 0.
- B. It was not active.
- C. The node was not registered.
- D. It was not associated with a node.

Answer: B

6. Management has requested a report containing graphical charts of all files backed up during a specific time frame. Which option meets this need directly?

- A. Web admin GUI reporting tool
- B. SQL against the Storage Manager database
- C. ODBC interface and report through a report writer
- D. IBM Tivoli Storage Manager (Storage Manager) report section

Answer: C

7. Which command can be used to cause automatic expansion of the IBM Tivoli Storage Manager (Storage Manager) database?

- A. expanddb yes
- B. extend db auto
- C. txndblimit auto
- D. define spacetrigger db

Answer: D

8. Given the following include/exclude list:

```
exclude /.../core
include /home/profile/options.scr
include /home/etc/more
include /home/profile/doodads/drivers
exclude /home/profile/*
include /core/data
exclude.dir /home/monkey
```

Which file is included?

- A. /core/data
- B. /home/monkey
- C. /home/profile/etc/more
- D. /home/profile/options.scr

Answer: A

9. A bank is using IBM Tivoli Storage Manager (Storage Manager) and has special backup and restore requirements. They want to backup

to disk and keep the data available on disk for a minimum of two days before it's moved to an offsite location. Which option would enable them to accomplish this?

- A. Hi=90 Lo=50
- B. MIGPROCESS=2
- C. Cache=YES and MIGDELAY=2
- D. Cachesize 100 and Cachelocation offsite

Answer: C

10. The primary and copy storage pools are defined as follows:

Primary Storage Pool: PRIMPOOL1

Primary Storage Pool: PRIMPOOL2

Copy Storage Pool: COPYPOOL1

Copy Storage Pool: COPYPOOL2

On day one, the following command is run for the first time: backup stgpool primpool1 cypool1

On day two, the following command is run: backup stgpool primpool1 cypool1

What is most likely to occur on day two?

- A. full backup of PRIMPOOL1 to COPYPOOL1
- B. full backup of COPYPOOL1 to PRIMPOOL1
- C. selective backup of PRIMPOOL1 to COPYPOOL1
- D. incremental backup of PRIMPOOL1 to COPYPOOL1

Answer: D

11. Why would EXPInterval be set to zero?

- A. To disable expiration functionality so that it does not degrade performance during backup operations.
- B. To specify whether IBM Tivoli Storage Manager (Storage Manager) sends detailed messages during expiration processing.
- C. To disable export policy information from a Storage Manager server to sequential media or directly to another server for immediate import.
- D. To disable export so that you cannot copy administrator definitions, client node definitions, policy definitions, server control information, or file data to external media directly another server.

Answer: A

12. A new tape library has just been defined with labeled tapes. What will test to see if the new library is operational?

- A. update volume
- B. query library libname format=detail
- C. status library libname format=detail
- D. checkin libv libname search=yes status=scratch checklabel=yes

Answer: D

13. A customer has a firewall protected environment. Which feature enables them to create scheduled backups through the firewall?

- A. use web ports
- B. use tcpadminport
- C. set schedmode polling
- D. set schedmode prompted

Answer: C

14. Which two features of IBM Tivoli Storage Manager (Storage Manager) are designed to save disk storage pool space? (Choose two.)

- A. collocation
- B. reclamation
- C. compression
- D. database mirroring
- E. incremental backups

Answer: CE

15. Company XYZ has an eight-hour backup window in which 10 clients must be backed up. The following has been specified:

Schedmode polling

Maxsessions 8

Maxschedsessions 90

Duration 1

Durunithour

Randomize 50

Maxcmdretries 4

Retryperiod 30

Eight of the clients complete the backup in two hours. Two others are not backed up at all. The communication line usage is 95 percent.

What should be increased to address the problem?

- A. the randomization parameter
- B. the duration of the startup window
- C. the maximum percentage of scheduled sessions
- D. the number of session retry attempts by increasing Maxcmdretries

Answer: B

16. A storage device is being configured on the SAN. What allows it to be dynamically mapped?

- A. fibre address
- B. element number
- C. capacity number
- D. World Wide Name

Answer: D

17. A company with two departments has only one tape library. The departments need to be on separately-managed storage tape volumes. Collocation will be used for their servers, but not for their workstations. Each of the two departments has both servers and workstations. Backup is to disk, migrating to tape. How many disk and tape storage pools are required for this company storage hierarchy?

- A. four disk and one tape storage pool
- B. two disk and two tape storage pools
- C. four disk and two tape storage pools
- D. four disk and four tape storage pools

Answer: D

18. A prospective IBM Tivoli Storage Manager (Storage Manager) customer has:

- 10 UNIX file servers, each with 50 GB of data with a 10% daily change rate
- 2 Windows 2003 file servers, each with 10 GB and a 5% daily change rate

Assuming all data is backed up to disk with a high threshold of 100% and the next storage pool is tape, what is the minimum size of the disk storage pool?

- A. 200 MB
- B. 520 MB
- C. 55 GB
- D. 520 GB

Answer: C

19. Which command should be entered to list the capacity of all the storage pools?

- A. query stg
- B. query stg all type=any
- C. query stg format=capacity
- D. query stg all format=detailed

Answer: A

20. Which dsm.sys file option is used to backup a raw volume during a scheduled backup?

- A. image.raw
- B. include.image
- C. rawbackup=yes
- D. enablerawbackup

Answer: B
