

IBM 000-903

Exam Name: IBM Tivoli Netcool/xSM

Q & A : 75 Q&As

Pdf Demo

Quality and Value for the 000-903 Exam

[Just4Exams Practice Exams](#) for IBM IBM certifications II 000-903 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

100% Guarantee to Pass Your 000-903 Exam

If you do not pass the IBM certifications II 000-903 exam on your first attempt using our Just4Exams **000-903 testing engine and pdf study guide**, we will give you a FULL REFUND of your purchasing fee.

Downloadable, Interactive 000-903 Testing engines and PDF Version

Our Exam Preparation Material provides you everything you will need to take a [IBM certifications II certification](#) examination. Details are researched and produced by [IBM Certification](#) Experts who are constantly using industry experience to produce precise, and logical.

Exam : IBM 000-903

Title : IBM Tivoli Netcool/XSM

1. The ISMServer includes a feature to automatically distribute profiles to other ISMServers. What are the names given to the ISMServer distributing the profiles and the ISMServer accepting the profiles?
- A. father and son
 - B. server and client
 - C. master and slave
 - D. primary and backup

Answer: C

2. Which statement is true about the number of elements the POP3 monitor is able to process?

- A. The number depends on the system and network resources.
- B. The number depends entirely on the POP3 server being polled.
- C. The number depends on the total number of elements the ISMServer is set up to manage.
- D. The number depends on how many users are configured to use the POP3 server for mail retrieval.

Answer: A

3. The SM Configuration (SMC) application can be used to install Netcool/SSM agents on remote UNIX hosts.

What is required for each target host in order to utilize this capability?

- A. All target hosts must reside on the same IP subnet.
- B. SMC must have rsh access to each target host, as this is the only technique available to SMC.
- C. SMC must be configured with the root user name and password, or a user with root authority, on each target host.
- D. SMC can only be used to install the software, so the agent installation package must be manually placed on each target host.

Answer: C

4. What is the purpose of the OID Groups required by the SNMP ISM?

- A. They identify the frequency of data collection.
- B. They contain the threshold settings used for SLA measurement.
- C. They determine the specific data values collected from the device.
- D. They contain the SNMP community string required for communication with each target device.

Answer: C

5. Regular Expression Matching is a powerful feature available within certain Netcool/ISM monitors.

Which is a valid use of this feature?

- A. When used by the HTTP ISM, it can identify the differences between two HTML pages.
- B. When used by the DHCP ISM, it can be used to determine if a specific IP address is available.
- C. When used by the HTTP ISM, it can be used to determine when the last time a specific HTML page was modified.
- D. When used by the HTTP ISM, it can be used to verify that the expected page content was returned from an HTML page.

Answer: D

6. The logmonx module currently has communities of public and private both with access privileges of read/write.

Which set of console commands would change the associated communities for only the logmonx module to public with access privileges of read only and secure with access privileges of read/create?

- A. `community set logmonx secure rc private ro`
- B. `community set logmonx secure rc`
`community set logmonx public ro`
`community remove logmonx private`
- C. `community remove logmonx private`
`community add logmonx secure rc`
`community add logmonx public ro`
- D. `community add logmonx secure rc`
`community set logmonx public ro`
`community delete logmonx private`

Answer: B

7. What is the most important consideration when defining Element Profiles for use in Netcool/ISM monitoring?

- A. Element Profile names are limited to 25 characters.
- B. There is a limit of 25 Element Profiles per ISMServer.
- C. An Element Profile can only contain tests for a single protocol.
- D. Access authority for ISMServer users is defined at the Element Profile level.

Answer: D

8. When utilizing the HTTP ISM, which statement is true about license key requirements?

- A. One license key is required for each instance of the HTTP monitor.
- B. One license key is required for each user to view the collected data.
- C. One license key is required for each connection to the ObjectServer.
- D. One license key is required for each individual HTTP test that is defined.

Answer: A

9. The ismbatch utility is a CLI tool that can be used to perform Netcool/ISM configuration using a text script.

What is an important consideration when using this utility?

- A. The utility cannot be used to add new Profiles.

- B. The ISMServer must be stopped while the script is running.
- C. The utility can only be run using a valid ISMServer user name.
- D. All Netcool/ISM Monitors must be stopped while the utility is running.

Answer: B

10. The System Monitor Configuration (SM CONFIGURATION (SMC)) application can be configured to automatically discover potential target hosts for Netcool/SSM agent deployment.

Which protocols are required for this discovery process to work successfully?

- A. SNMP and DNS
- B. ICMP and SNMP
- C. ICMP and Telnet
- D. SNMP and Telnet

Answer: B

11. Which statement is true about the DNS monitor's scaling ability?

- A. The scalability of the DNS monitor is dependent on the system and network resources.
- B. A DNS monitor can easily handle over 10,000 elements with a polling frequency for each element of 1 minute.
- C. The scalability of the DNS monitor depends solely on the network stack implementation of the host operating system.
- D. Three or more DNS monitors can work together on a single host, and the elements configured are automatically load balanced between the monitors.

Answer: A

12. Which Netcool/SSM subagent provides the capability to perform certain functions based upon a specific time of day?

- A. Crontab
- B. Programmable
- C. Generic Alarm
- D. Host Resources

Answer: A

13. Which statement is true about nco_m_bridge?

- A. It is not required if you are not monitoring Wireless Bridges.
- B. It is used to write data to the datalogs and the ObjectServer.
- C. It is the communication link between the monitors and the ISMServer.
- D. It is used to maintain communication between all the monitors to keep them synchronized.

Answer: B

14. Which Netcool/SSM subagent provides the capability to run a script periodically based upon specific criteria?

- A. Process
- B. Programmable
- C. Service Discovery
- D. System Resources

Answer: B

15. If a customer intends to utilize the Netcool/SSM agent in their infrastructure, what network protocol must be allowed?

- A. Telnet for agent configuration
- B. DNS for agent name resolution
- C. SNMP for agent communication
- D. NTP for agent clock configuration

Answer: C
