Exam : IBM 000-963

Title : Storage Sales for N series Version 1

1. What is the primary difference between SnapLock Compliance and SnapLock Enterprise?

A. SnapLock Compliance and SnapLock Enterprise are licensed differently but provide the same features.

B. SnapLock Compliance is tiered for data sets below 50TB, while SnapLock Enterprise is designed primarily for large enterprise environments over 50TB of protected data.

C. SnapLock Enterprise is designed to help organizations address strict records-retention regulations, such as SEC Rule 17a-4, HIPAA and Sarbanes-Oxley. SnapLock Compliance allows defining retention best practices, while allowing administrators to delete entire SnapLock Compliance volumes when needed.

D. SnapLock Compliance is designed to help organizations address strict records-retention regulations, such as SEC Rule 17a-4, HIPAA and Sarbanes-Oxley. SnapLock Enterprise allows defining retention best practices, while allowing administrators to delete entire SnapLock

Enterprise volumes when needed.

Answer: D

Answer: D

14. A customer has an existing N3700-A20 that was purchased in August 2006. The customer is purchasing two more SnapManager for SQL licenses. What is the warranty term for the new software?

- A. There is no included support.
- B. the same as the installed N3700-A20
- C. 3 years, starting on date of delivery
- D. 1 year, starting on date of delivery, unless upgraded

Answer: B

15. A customer needs 50TBs of disk for a mission-critical SQL Server database. The customer would like to utilize an existing fibre SAN. Which solution should a salesperson propose?

- A. an N3700 with FCP and EXN4000 expansion shelves
- B. an N5300 with FCP and EXN4000 expansion shelves
- C. an N5300 with iSCSI and EXN4000 expansion shelves
- D. an N5200 with FCP licensed and EXN1000 expansion shelves

Answer: B

16. A customer needs the ability to save data as read-only and un-erasable for a specified period of time. Which feature provides this capability?

- A. SnapVault
- B. SnapLock Enterprise
- C. SnapLock Compliance
- D. LockVault Enterprise

Answer: C

17. The elimination of redundant data is managed by which feature?

- A. Data De-Duplication Manager
- B. Advanced De-Duplication Manager
- C. Advanced Single Instance Storage

D. Advanced Information Management System

Answer: C

18. What is the main advantage of RAID-DP over RAID 5?

- A. RAID-DP uses SATA and FC drives.
- B. RAID-DP can support a double disk drive failure.
- C. RAID-DP can support a triple disk drive failure.
- D. RAID-DP uses less physical drives than any other RAID.

Answer: B

19. Which RAID level supports disk mirroring on an n3700?

- A. RAID 4
- B. RAID 10
- C. RAID DP
- D. None. Disk mirroring is not supported on N series.

Answer: D

20. A customer's database has been corrupted. The customer is using N series and is following data protection recommendations. Which tool is used to quickly recover the data to its previous state?

- A. SnapVault
- B. SyncMirror
- C. SnapRestore
- D. SnapManager

Answer: C
