Title : BEA8.1 Certified Developer:Portal Solutions

1. You created a page flow in which the flow enters an action method, then is forwarded to a JSP. What are two ways to bind information into this flow, so that the JSP can access the data using XScript? (Choose two.)

- A. The action method adds information to the request object.
- B. The JSP method reads a value from a pageContext variable.
- C. The JSP contains a form for which the action is bound to an action Form Bean.
- D. The action method calls a private method in the page flow class; the method initializes a public member variable.
- E. The action method increments a private member variable for which two private accessor methods are provided.

Answer: AD

2. When using the WebLogic Administration Console, which of the following actions would result in a deployed and activated Portal application? (Choose two.)

- A. Uploading the .ear file through the WebLogic Administration Console
- B. Turning on auto-deployment and copying your .ear file to the administration server's stage folder
- C. Using the location directory navigator select your .ear file, followed by targeting and naming the application.
- D. Using the location directory navigator, select the portal application root folder, followed by targeting and naming the application.

Answer: CD

3. When using the `<um:getProperty>` tag in a JSP, to avoid retrieving the specified property value from the Anonymous User Profile, what must be done?

- A. Ensure that the visitor is authenticated.
- B. Ensure that the visitor is authorized to access the JSP.
- C. Use the `<um:getProfile>` tag before using the `<um:getProperty>` tag.
- D. Ensure that the visitor has a value set for that property, so that no default value is used.

Answer: C

4. What determines the header and footer content of a portal desktop?

- A. The desktop
- B. The shell file
- C. The portal file
- D. The Look and Feel file

Answer: B

5. When creating a Database control, how does the developer ensure that database connection pooling will be used?

- A. When creating the control, the developer is prompted to choose a connection pool.
- B. Connection pooling must be enabled for each control individually through the Portal Administration console.
- C. The developer must specify that a connection pool (rather than a dataSource) is used, when the control is created in Workshop.
- D. When creating the control, the developer must select a dataSource that is already associated with a connection pool.
- E. The developer must click on the Database control and select a connection pool from a pull-down menu in the Property Editor.

Answer: D

6. Which three session tracking events might an application consume? (Choose three.)

- A. An event that is generated when the user logs in
- B. An event that is generated when the session is replicated
- C. An event that is generated when the session is invalidated
- D. An event that is generated when the user first starts interacting with the site
- E. An event that is generated when a specified number of session properties is exceeded

Answer: ACD

7. On which component can you change the layout type?

- A. Book
- B. Page
- C. Portlet
- D. Desktop
- E. Application

Answer: B

8. Which three are valid entries for the "empty content search" part of a content selector when comparing with document type properties? (Choose three.)

- A. Events
- B. Behavior
- C. A Literal value
- D. An HTTP request property
- E. A User Profile Property Set value

Answer: CDE

9. A developer imports an existing database control (a .jcx file) by right clicking a folder in the Application window and selecting Import. The developer drags the database control from the Application window onto the Flow View canvas of a page flow. What happens?

- A. A new page is created on the canvas.
- B. A new action is created on the canvas.
- C. A new control displays in the Data Palette.

- D. A wizard prompts the developer for the SQL command to be used by the control.
- E. A wizard prompts the developer for the name of the datasource used by the control.

Answer: C

10. Consider the following code: `<render:????? var="maxhelpurl" windowLabel="helpwindow" state="MAXIMIZED" mode="HELP" />`
To create a URL to a help window in a maximized display, with which tag should you replace the " ???? " string?

- A. `pageUrl`
- B. `windowUrl`
- C. `renderChild`
- D. `jspContentUrl`

Answer: B

11. Which two are child tags of the `<netui-template:template />` tag? (Choose two.)

- A. `name`
- B. `section`
- C. `setAttribute`
- D. `defaultPage`
- E. `parameterName`

Answer: BC

12. Which statement is true about applying entitlements to a desktop portlet?

- A. Entitlements cannot be applied to a portlet.
- B. The administrator can set only the View check box.
- C. Only portlet titlebar options that are enabled by the developer can be set.
- D. The administrator can set only the View, Edit, Remove, Maximize and Minimize check boxes.

Answer: D

13. Using Workshop's interactive debugging windows, how can you evaluate expressions, dynamically?

- A. Open the Watch window, enter the expression, and select Evaluate
- B. Open the Locals window, enter the expression, and select Evaluate
- C. Open the Streams window, enter the expression, and select Evaluate
- D. Open the Immediate window, enter the expression, and select Evaluate
- E. Open the Expressions window, enter the expression, and select Evaluate

Answer: D

14. Click the Exhibit button. How does WebLogic Portal find the SMTP host for outgoing mail?

- A. It is set as a request parameter in `thankYou.jsp`.
- B. It is set as a session parameter in `thankYou.jsp`.
- C. It is configured using the SMTP Manager in the WebLogic Console.
- D. It is configured using the Mail Service in the Portal Administration tools.

Answer: D

15. When developing custom skins, which action prevents the loss of changes during product upgrades?

- A. Add new entries anywhere in the `skin.properties` file.
- B. Add new entries at the end of the `skin.properties` file.
- C. Create a `skin_custom.properties` file in the same directory as the `skin.properties` file.
- D. Create a new `skin_custom.properties` file, under a new directory, for your `skin.properties` file.

Answer: C

16. What are two purposes of creating a desktop? (Choose two.)

- A. to provide a deployable enterprise application
- B. to provide a specific access point for entitled users
- C. to provide a Web application development package
- D. to provide a visual development area for Workshop composition
- E. to provide an administrative mechanism for controlling resources

Answer: BE

17. Which tag allows in-line content to be displayed if a user belongs to a specified user segment?

- A. `<pz:div>`
- B. `<pz:showDoc>`
- C. `<pz:contentQuery>`

D. `<pz:contentSelector>`;

Answer: A

18. Consider the following JSP code section: `<utility:uriContent id="data" uri="<%=uri%>"> <%=data%>`
`</utility:uriContent>`; A portlet is created from the JSP and added to a page placeholder. Assume that the URI is a valid address and it is accessible. With respect to the resulting display of this page, which statement is true?

- A. The data variable is the wrong type.
- B. The data stream causes a JSP runtime error.
- C. The data is surfaced without any problem.
- D. Any embedded links in the data will have no side effects.

Answer: A

19. What are three ways to enable error pages within Portal applications? (Choose three.)

- A. Associate a JSP page with an error page, through a JSP directive
- B. Associate HTTP error codes with error pages, in the deployment descriptor
- C. Associate Java exception classes with error pages, in the deployment descriptor
- D. Associate a JSP page with an error page, through a JavaDocs documentation comment

Answer: ABC

20. A JSP contains this line: `<render:writeAttribute name="id" value="<%= button.getPresentationId() %>"/>`; Which statement is true about render ?

- A. render is a prefix.
- B. render is the name of a TLD file.
- C. render is the name of a tag handler.
- D. render is an alias, set previously in a page import directive.
- E. render is a Java object, defined previously in a declaration or scriptlet.

Answer: A
