

## CheckPoint 156-110

**Exam Name:** CheckPoint Certified Security Principles Associate (CCSPA)

**Q & A :** 100 Q&As

**Pdf Demo**

### **Quality and Value for the 156-110 Exam**

[Just4Exams Practice Exams](#) for CheckPoint CheckPoint 156-110 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

### **100% Guarantee to Pass Your 156-110 Exam**

If you do not pass the CheckPoint 156-110 exam on your first attempt using our Just4Exams **156-110 testing engine and pdf study guide**, we will give you a FULL REFUND of your purchasing fee.

### **Downloadable, Interactive 156-110 Testing engines and PDF Version**

Our Exam Preparation Material provides you everything you will need to take a [CheckPoint certification](#) examination. Details are researched and produced by [CheckPoint Certification](#) Experts who are constantly using industry experience to produce precise, and logical.

Exam : Check Point 156-110

Title : CheckPoint Certified Security Principles Associate (CCSPA)

1. How do virtual corporations maintain confidentiality?

- A. Encryption
- B. Checksum
- C. Data hashes
- D. Redundant servers
- E. Security by obscurity

Answer: A

2. Which of the following statements about the maintenance and review of information security policies is NOT true?
- A. The review and maintenance of security policies should be tied to the performance evaluations of accountable individuals.
  - B. Review requirements should be included in the security policies themselves.
  - C. When business requirements change, security policies should be reviewed to confirm that policies reflect the new business requirements.
  - D. Functional users and information custodians are ultimately responsible for the accuracy and relevance of information security policies.
  - E. In the absence of changes to business requirements and processes, information-security policy reviews should be annual.

Answer: D

3. \_\_\_\_\_ can mimic the symptoms of a denial-of-service attack, and the resulting loss in productivity can be no less devastating to an organization.
- A. ICMP traffic
  - B. Peak traffic
  - C. Fragmented packets
  - D. Insufficient bandwidth
  - E. Burst traffic

Answer: D

4. Which of the following is MOST likely to cause management to view a security-needs proposal as invalid?
- A. Real-world examples
  - B. Exaggeration
  - C. Ranked threats
  - D. Quantified risks
  - E. Temperate manner

Answer: B

5. INFOSEC professionals are concerned about providing due care and due diligence. With whom should they consult, when protecting information assets?
- A. Law enforcement in their region
  - B. Senior management, particularly business-unit owners
  - C. IETF enforcement officials
  - D. Other INFOSEC professionals
  - E. Their organizations' legal experts

Answer: E

6. Which of the following is a cost-effective solution for securely transmitting data between remote offices?
- A. Standard e-mail
  - B. Fax machine
  - C. Virtual private network
  - D. Bonded courier
  - E. Telephone

Answer: C

7. Digital signatures are typically provided by a \_\_\_\_\_, where a third party verifies a key's authenticity.
- A. Network firewall
  - B. Security administrator
  - C. Domain controller
  - D. Certificate Authority
  - E. Hash function

Answer: D

8. Which of these metrics measure how a biometric device performs, when attempting to authenticate subjects? (Choose THREE.)
- A. False Rejection Rate
  - B. User Acceptance Rate
  - C. Crossover Error Rate
  - D. False Acceptance Rate
  - E. Enrollment Failure Rate

Answer: ACD

9. What is mandatory sign-on? An authentication method that:

- A. uses smart cards, hardware tokens, and biometrics to authenticate users; also known as three-factor authentication

- B. requires the use of one-time passwords, so users authenticate only once, with a given set of credentials
- C. requires users to re-authenticate at each server and access control
- D. stores user credentials locally, so that users need only authenticate the first time a local machine is used
- E. allows users to authenticate once, and then uses tokens or other credentials to manage subsequent authentication attempts

Answer: C

10. The items listed below are examples of \_\_\_\_\_ controls.

- \*Procedures and policies
- \*Employee security-awareness training
- \*Employee background checks
- \*Increasing management security awareness

- A. Technical
- B. Administrative
- C. Role-based
- D. Mandatory
- E. Physical

Answer: B

11. \_\_\_\_\_ intrusion detection involves comparing traffic to known characteristics of malicious traffic, known as attack signatures.

- A. Pattern matching
- B. Statistical anomaly
- C. Behavioral analysis
- D. Host
- E. Network

Answer: A

12. All of the following are possible configurations for a corporate intranet, EXCEPT:

- A. Value-added network
- B. Wide-area network
- C. Campus-area network
- D. Metropolitan-area network
- E. Local-area network

Answer: A

13. One individual is selected from each department, to attend a security-awareness course. Each person returns to his department, delivering the course to the remainder of the department. After training is complete, each person acts as a peer coach. Which type of training is this?

- A. On-line training
- B. Formal classroom training
- C. Train-the-mentor training
- D. Alternating-facilitator training
- E. Self-paced training

Answer: C

14. A(n) \_\_\_\_\_ is a one-way mathematical function that maps variable values into smaller values of a fixed length.

- A. Symmetric key
- B. Algorithm
- C. Back door
- D. Hash function
- E. Integrity

Answer: D

15. To comply with the secure design principle of fail-safe defaults, what must a system do if it receives an instruction it does not understand? The system should:

- A. send the instruction to a peer server, to see if the peer can execute.
- B. not attempt to execute the instruction.
- C. close the connection, and refuse all further traffic from the originator.
- D. not launch its debugging features, and attempt to resolve the instruction.
- E. search for a close match in the instruction set it understands.

Answer: B

16. Why should the number of services on a server be limited to required services?

- A. Every open service represents a potential vulnerability.
- B. Closed systems require special connectivity services.
- C. Running extra services makes machines more efficient.
- D. All services are inherently stable and secure.
- E. Additional services make machines more secure.

Answer: A

17. Which of the following tests provides testing teams some information about hosts or networks?

- A. Partial-knowledge test
- B. Full-knowledge test
- C. Zero-knowledge test

Answer: A

18. Which of the following is the MOST important consideration, when developing security- awareness training materials?

- A. Training material should be accessible and attractive.
- B. Delivery mechanisms should allow easy development of additional materials, to complement core material.
- C. Security-awareness training materials should never contradict an organizational security policy.
- D. Appropriate language should be used to facilitate localization, should training materials require translation.
- E. Written documentation should be archived, in case of disaster.

Answer: C

19. Which of the following is NOT an auditing function that should be performed regularly?

- A. Reviewing IDS alerts
- B. Reviewing performance logs
- C. Reviewing IDS logs
- D. Reviewing audit logs
- E. Reviewing system logs

Answer: B

20. Which of the following calculations is used when selecting countermeasures?

- A. Annualized Rate of Occurrence
- B. Single Loss Expectancy
- C. Annualized Loss Expectancy
- D. Business Impact Analysis
- E. Business Continuity Plan

Answer: C
