- C. Hans has Depositor access to the Domino server.
- D. The HTML files are not located in the HTML directory listed in the server or Web site configuration documents.

Answer: D

2. Amy wants to decommission an existing source server. Before transferring the applications, she runs a Decommission Server Analysis report. Which one of the following types of information does this tool provide?

- A. Source server information only
- B. Target server information only
- C. A comparison between source server and target server
- D. A detailed report of everything transferred from the source server to the target server once the transfer takes place

Answer: C

3. Robert's Windows 2000 Domino server has frozen with no error output on the server's screen or other indication that anything is wrong. Which one of the following can cause this problem?

- A. The server was replicating with another server.
- B. The server's transaction log was being updated.
- C. Robert had forced mail routing to another server.
- D. Microsoft Windows Quick Edit mode was enabled for the server console window.

Answer: D

4. In addition to Notes databases, which one of the following files on a Domino server should be backed up in order to ensure that new users can be created in case of loss of the server?

- A. The CACHE.DSK file
- B. Certifier ID files
- C. The user's DESKTOP.DSK file.
- D. The server's BOOKMARK.NSF file.

Answer: B

5. Which one of the following statements about Domino SSL server security is TRUE?

- A. SSL must be enabled for all server ports.
- B. SSL can only be enabled for POP3, IMAP and SMTP.
- C. If a server is using SSL, users must access the server using a browser.
- D. You can require SSL connections for all databases on a server or for an individual database.

Answer: D

6. Bob left the Create New Databases field empty in a Server document. Who is authorized to create new databases on the server?

- A. No one
- B. Administrators only
- C. LocalDomainServers only
- D. Anyone with access to the server

Answer: D

7. Jeff cross certified the Organizational Unit (OU) /NYC/ACME with his organization's /BOX Organizational (O) certifier. Which one of the following statements are correct for this scenario?

- A. Users or servers with the /NYC/BOX certificate can access /ACME servers.
- B. Users with an ACME ID can access any of Box's servers that have a /NYC/BOX certificate.
- C. Any user or server ID with the /NYC/ACME certificate can access any server in the /BOX organization if they have the appropriate cross certificate.
- D. Servers with the /NYC/ACME certificate can access any server in the /BOX organization if they have the appropriate cross certificate but no /NYC/ACME users can access /BOX servers.

Answer: C

8. Jim's Notes workstation's Smart Upgrade did not work. Which one of the following could be the cause of Smart Upgrade failing?

- A. Jim did not access his mail database.
- B. Jim's Personal Address Book has the filename JIM.NSF.
- C. Jim's Location document does not correctly specify his home server.
- D. Jim does not have administrator access to his Windows 2000 workstation.

Answer: C

9. Josh has cross certified the /BOX organization to his /ACME organization. An administrator from the Box organization has cross certified the /ACME to the /BOX organization. When a /BOX server attempts to access a /ACME server, it receives a "You are not authorized to access this server" error. Which one of the following could be the cause of this error?

- A. The Box server's ID does not contain a copy of the Acme certifier.
- B. The Box server's ID file needs to be updated with the cross certificate.
- C. The Box administrator needs to add the Box server to the LocalDomainServers group.
- D. The Box server has not been granted access to the Acme server in the Acme server document.

Answer: D
