Exam : Lotus 190-702

Title : IBM Lotus Notes Domino 7 System Administration Update

1. Todd is configuring a DDM Messaging probe to test Delivery Status Notifications. What must the remote mail system support for these probes to function correctly?

- A. The .nsd extension
- B. The .ddm extension
- C. The .dsn extension
- D. The .smtp extension

Answer: C

2. Smart Upgrade failover utilizes what search order?

- A. By document link in the Notes client
- B. By server name and hard-coded path to the Smart Upgrade database
- C. By database replica ID and database name in the home server cluster
- D. By notes.ini variable on the client listing all servers in the domain which the Smart Upgrade database may be found

Answer: C

3. The Domino administrator is attempting to verify that IMAP requests are being processed correctly. Which probe should be created to monitor those types of requests?

- A. SMTP Process State
- B. POP3 Process State
- C. Message access TCP Port Health
- D. Message retrieval TCP Port Health

Answer: D

4. Domino Domain Monitoring (DDM) enhanced events may contain events from one of the following?

- A. Events generated by a Domino event generator
- B. Events that are reported to the Domino server console
- C. Events that occur on the local Domino Administrator client
- D. Events not generated by agents or that do not apply to databases

Answer: A

5. Replication on selected servers and databases is monitored in DDM according to the schedule specified in what document?

- A. Probe
- B. Server
- C. Connection
- D. Configuration

Answer: A

6. In the desktop policy settings document, how are client lock-down settings applied?

- A. Per tab
- B. Per date
- C. Per field
- D. Per version

Answer: A

7. Shawn has modified a DDM probe document. What must be performed for this probe change to become active immediately?

- A. Run the console command "reload probes"
- B. Run the console command "restart probes"
- C. Do nothing as modified probe documents take effect immediately
- D. Probes are automatically reloaded based on the configuration time specified in DDM.nsf

Answer: C

8. A collection hierarchy synchronizes data to a central server using what Domino capability?

- A. Email
- B. Clustering
- C. Selective replication
- D. The server task DDMSync

Answer: C

9. Chelle, the Domino administrator, is launching Server Health Monitoring for the first time. What tasks are monitored by default for each server?

- A. HTTP, SMTP, AdminP and the Amgr
- B. The core server task, HTTP, SMTP and AdminP
- C. No tasks until the administrator configures the monitoring for each server
- D. All tasks currently running when the Server Health Monitor is first launched

Answer: D

10. The Domino Console connects to the Controller over what default port?

- A. 80
- B. 1352
- C. 1533

D. 2050

Answer: D

11. A Domino Domain Monitoring (DDM) probe is defined as which of the following?

- A. A specially-designated collection server
- B. A server task loaded on each server that checks services, agents and databases
- C. A discrete check configured to run against one or more servers, databases, and services
- D. A client that is configured to query servers for Domino services, running agents and failed AdminP processes

Answer: C

12. Enrique, the Domino administrator has created a response file for a silent server installation. What parameter must be run on the server to utilize this response file?

- A. setup.exe -silent -options c:tempinstall.txt
- B. nsetup.exe -silent -options c:tempinstall.txt
- C. setup.exe -response -options c:tempinstall.txt
- D. silent.exe -response -options c:tempinstall.txt

Answer: A

13. You wish to resolve an issue without user intervention based on a received event in DDM. Which handler notification method provides this functionality?

- A. Pager
- B. Broadcast
- C. Run an Agent
- D. Log to Database

Answer: C

14. Mike, the Domino administrator, has configured Rooms & Resources across a cluster. When multiple replicas of the resource database exist in the cluster, where is processing handled if all the servers are available?

- A. The user's home server
- B. The resource's home server
- C. The first cluster server available
- D. The server closest to the physical location of the resource

Answer: B

15. You must create a DDM collection hierarchy to initiate which of the following?

- A. Data roll-up
- B. Probe initiation
- C. Probe interface
- D. Data interface

Answer: A

16. If the Fault Analyzer task locates duplicate fault reports, which is the next step the task will take?

- A. The new crash will be reported as a response to the original crash
- B. The new crash will not be reported because it matches a previous fault reported
- C. The new crash will be reported as a new document and a doclink will be created to the original
- D. The new crash will be reported as a new document and no reference to matching documents will be created

Answer: A

17. Automatic Diagnostic Collection stores reports in Fault Report documents. In what database are these documents stored?

- A. DDM.nsf
- B. Reports.nsf
- C. In the log.nsf of each server
- D. A mail-in database defined by the administrator

Answer: D

18. Cherease has noticed that a server has been rated Warning in the Health Monitoring reports. What index value must be met for a server to be rated Warning?

- A. Greater than the rules algorithm
- B. Greater than the Warning threshold
- C. Greater than the Critical threshold
- D. Greater than the assessment algorithm

Answer: B

19. There is only one subtype for DDM server probes. What function does that probe provide?

- A. Monitors agents for failures
- B. Monitors NRPC traffic for failure
- C. Monitors administration requests for failures
- D. Monitors the Domino server core task for failure

Answer: C

20. The Domino administrator has enabled AutoSave for all users. Where are AutoSave documents stored?

- A. To a user's local database
- B. To a user's mail database located on the server
- C. To an administrator defined server database per user
- D. To an administrator defined central repository database

Answer: A
