Exam : Lotus 190-735

Title : Administering IBM Lotus Sametime7.5

1. Certain files that users are uploading for the whiteboard function of meetings are not being formatted correctly. In order to preserve the formatting, which of the following may be utilized for the whiteboard?

- A.Sametime Print Capture
- B.Sametime File Extender
- C.Sametime Meeting Toolset
- D.Sametime Screen Reflector

Answer: A

2. You are attending a scheduled meeting that you are participating in with audio and video. During the meeting you start a breakout

session with Barbara from another department and were the last person to talk over IP in the main scheduled meeting. However, once in the breakout session, Barbara is unable to see your video. Which of following best describes why she is unable to see your video?

- A.Video is not allowed in breakout sessions, so Barbara would not be able to see you
- B.The breakout session must be performed on a different server than the scheduled meeting
- C.Whiteboard and screensharing control in the scheduled meeting must be given to someone else before you enter a breakout session
- D.As the last person to talk in the scheduled meeting, your microphone must be muted and someone else must speak in the scheduled meeting to switch to their video and release yours to be shown in the breakout session

Answer: D

3. While in an online meeting, all the users are able to screenshare and utilize the whiteboard. However, chat between the users will not function. Which of the following is most likely the cause of this issue?

- A.Community services have stopped running
- B.Chat is not allowed in the Meeting Room client
- C.The administrator has disabled meeting room chat
- D.The meeting manager has deselected the chat feature when creating the meeting

Answer: A

4. Two of your employees are having a voice conversation over IP. The microphone is being controlled by the Sametime server. Which of the following is the term that describes that mode?

- A.Request
- B.Variable
- CAutomatic
- D.Performance

Answer: C

5. Which of the following users are not allowed to receive file transfers through the Sametime server?

- A.In the Sametime Connect client with the status of Online - Away
- B.In the Sametime Meeting client with the status of Online - Away
- C.In the Sametime Connect client with the status of Online- Active
- D.In the Sametime Connect client with the status of Online - Do Not Disturb

Answer: B

6. Users are complaining that while in meetings containing video, the image is switching too rapidly between users. What steps are you able to perform, as the administrator, to slow the video from switching?

- A.Disable video switching on the server
- B.Change the time to wait before switching to a longer interval
- C.Restrict the number of users that may have video in a meeting
- D.Apply a user policy with a setting that controls the interval between video changes

Answer: B

7. Which of the following only may create polls while in meetings?

- A.Owners
- B.Attendees
- C.Anonymous
- D.Moderators

Answer: D

8. Paul is attempting to log into server4/amce with his Sametime Connect client while visiting a corporate branch office overseas that has it's own Sametime server. The following scenario exists:

- He is not listed in the Allow Access field for that Domino server
- His home Sametime server is server1/acme and both share a common directory
- The two servers are not in a Community Cluster.

Which of the following steps will Sametime perform in this scenario?

- A.Paul will be immediately denied access and will receive a prompt to that effect
- B.Paul will attempt to log into server4/acme and after a lookup occurs he will be passed to server1/acme
- C.Paul will successfully log into server4/acme and that server will grab his privacy data and buddylist from server1/acme for him
- D.Paul will be logged into both servers simultaneously and his privacy data will not be in effect for anyone with a home server of server4/acme

Answer: B

9. You have chosen LDAP as the directory for your Sametime server. However, you have a Sametime administrator in the local Domino

Directory. You are able to successfully log into administer the server through the Sametime Administration Tool. Which of the following will not function correctly in this scenario?

- A.You will not have the Assign Users function for policies
- B.You will not be able to perform or view Sametime logging
- C.You will not be able to establish Sametime capacity warning settings
- D.You will not be able to change any Community or Meeting Service settings

Answer: A
