Exam : Lotus 190-847

Title : IBM Lotus Notes Domino 8 System Administration Fundamentals

1. Modular documents for Domino Domain Monitoring are stored in which of the following databases?

- A. ddm.nsf
- B. admin4.nsf
- C. events4.nsf
- D. statrep.nsf

Answer: C

2. If there is no entry in the replication history of a database, if access rights have changed, or if the selective replication settings have changed, the Replicator performs what function next?

- A. It has to search all documents in the source database, not just those that have changed since the last replication
- B. It has to search all deleted documents from the destination database, not just those that have changed since the last replication
- C. It has to verify if the connection is from a Notes client or Domino server. If the connection is from a Notes client it will immediately begin a pull and overwrite any server data
- D. It has to open a connection to the Administration Server for the database to inquire if scheduled replication is authorized

Answer: A

3. Paul has configured a database to Enforce a Consistent Access Control List. When that database is replicated locally, information about the group membership of the person doing the replication is stored at what location?

- A. In the database
- B. In the id file of the user
- C. In the security preferences
- D. In the personal address book

Answer: A

4. Which one of the following group types is used to prevent access to Domino servers?

- A. Mail only
- B. Servers only
- C. Deny list only
- D. Access Control List only

Answer: C

5. SMTP stands for which of the following?

- A. Simple Mail Transport Protocol
- B. Simple Mail Transfer Protocol
- C. Standard Mail Transfer Protocol
- D. Standard MailTransport Protocol

Answer: B

6. John is setting up a single domain with a single organization. As a result, all Domino server IDs must be created using which one of the following?

- A. The same cross-certificate
- B. The same administrator certificate
- C. The same country (C) certificate or a child of that country (C) certificate
- D. The same organizational (O) certificate or a child of that organizational (O) certificate

Answer: D

7. The TCP Authentication field "Redirect TCP to SSL" is set to "No". What effect does this setting have?

- A. To allow clients and servers to use SSL or TCP/IP to access the Web site
- B. To allow clients and servers to use TCP/IP and POP3 to access the Web site
- C. To require clients and servers to use the SSL protocol to access the Web site
- D. To require clients and servers to utilize LDAP to retrieve authentication information

Answer: A

8. Jon registered a new user. Which one of the following authentication elements is NOT found in that user's ID file?

- A. Public key
- B. Private key
- C. Certificates
- D. HTTP password

Answer: D

9. You have noticed that the server document field "Create databases and templates" is blank. What rights are assigned for this value to users that can access the server?

- A. No users can create databases on the server
- B. All users can create databases on the server
- C. No users may access any template with anonymous access set to None
- D. All users have automatic editor rights to all databases and templates on the server

Answer: B

10. The Rooms and Resource Manager server task is called which of the following?

- A. RnRMgr

- B. RoomMgr
- C. SchedMgr
- D. BusytimeMgr

Answer: A

11. When the LDAP service can't find information for which an LDAP client is searching, it can return a referral to the client. What Domino service does it utilize to provide this referral?

- A. MAPS
- B. Referrer
- C. Replicator
- D. Directory Assistance

Answer: D

12. Tisha has received an encrypted mail message while in Domino Web Access. Which of the following will Tisha be forced to do to view this message?

- A. She will be forced over to HTTPS automatically
- B. She will be forced to log out and log back in over TLS
- C. She will be forced to use her Notes client to read the email
- D. She will be forced to have the message unencrypted by the server and will see the message after it has been processed

Answer: A

13. Miranda wishes to deploy LDAP access to the Domino directory. However, she wishes to restrict the fields available to anonymous users. In what document are the fields selected that will be available to anonymous access?

- A. LDAP Site document
- B. Internet Site document
- C. LDAP configuration document
- D. Server configuration document

Answer: D

14. Which of the following statements about the COMPACT server task is TRUE?

- A. The Compact process reindexes views.
- B. By default, compact runs every day at 3pm.
- C. Compact may be scheduled via a program document.
- D. Compact is listed in the TASKS line on all Notes 6 workstations.

Answer: C

15. In what order would Richard build a naming convention for his organization where user names would have the following format:

Chris Maxwell/Amsterdam/Acme

AJ Mathis/Sydney/Acme

- A. Create a Common Name (CN) Certifier named Acme and then create Organizational (O) Certifiers named Amsterdam and Sydney
- B. Create an Organizational (O) Certifier named Acme and then create Organizational Unit (OU) certifiers named Amsterdam and Sydney
- C. Create a Organizational (O) Certifier named Amsterdam, an Organizational (O) Certifier named Sydney and an Organizational Unit (OU) certifier named Acme
- D. Create two Organizational (O) Certifiers named Acme and use one to create an Organizational Unit (OU) Certifier named Amsterdam and the other O Certifier to create an OU Certifier named Sydney

Answer: B

16. Why did Tom designate Server1/Boise/Acme as the Administration Server for the Domino Directory?

- A. To make sure that all new users were registered on Server1/Boise/Acme.
- B. To prevent users from making changes to the Domino Directory on Server1/Boise/Acme.
- C. To force administrators to make all changes to the Domino Directory on Server1/Boise/Acme.
- D. To ensure that the Administration Process would process all Domino Directory changes on Server1/Boise/Acme.

Answer: D

17. Rob runs the task UPDALL with the -R argument on his server. What will this accomplish?

- A. It rebuilds indices in all views in all databases on the server.
- B. It discards damaged indices in all views in all databases on the server.
- C. It deletes all indices so that they can be recreated when users access them.
- D. It removes unused space from indices in all views in all databases on the server.

Answer: A

18. John registered a new server. In which one of the following was the Server document placed?

- A. NAMES.NSF
- B. CERTLOG.NSF
- C. CATALOG.NSF
- D. DIRECTORY.NSF

Answer: A

19. Your Organizational certifier is named Acme. Each city in your company has an Organizational Unit certifier from the Acme certifier that references the city. Susan wants to create an Organizational Unit certifier below the city Organizational Unit certifier. Which one of the following must she have to accomplish this?

- A. Reader access to the domain's directory
- B. A copy of the Acme Organizational certifier
- C. A copy of the city's Organizational Unit certifier
- D. Copies of both the Acme Organizational certifier and the location's Organizational Unit certifier

Answer: C

20. Susan has created a list of IP Addresses for the Web server that are allowed access and a list of IP Addresses that are denied access. Both are placed in the appropriate fields. Which field takes precedence BY DEFAULT when the same IP address is found in both lists?

- A. The Allow Access field
- B. The Deny Access field
- C. The Substitution Access field
- D. An error will be presented stating an address may not be in both fields

Answer: A
