Title : CIW v5 Foundations SDF Module

1. Consider the following XHTML code:

```
<!DOCTYPE html PUBLIC "-//W3C//DTD XHTML 1.0 Transitional//EN"
"http://www.w3.org/TR/xhtml1/DTD/xhtml1-transitional.dtd">
<html>
<meta http-equiv="Content-Type" content="text/html; charset=utf-8"/>
<title> This is an HTML document </title>
</head>
<body>
```

This is a test page for the departmental Web page.

</body>

</html>

This code failed validation. Why?

- A. Because the opening <head> tag is missing
- B. Because the closing </meta> tag is missing
- C. Because the <html> tag should use all-capital letters
- D. Because the <body> tag must have a code statement

Answer: A

2. Luis uses JavaScript code in his Web site's home page. The script notifies Microsoft Internet Explorer 5.0 users of a possible usability problem. What does this script do?

- A. Creates a cookie and redirects users to another page
- B. Creates a variable and redirects users to another page
- C. Performs server-side browser detection and creates a pop-up window alert
- D. Performs client-side browser detection and creates a pop-up window alert

Answer: D

3. Which of the following XHTML elements is always placed within the <head> section?

- A. <html>
- B. <body>
- C. <meta>
- D. <!DOCTYPE>

Answer: C

4. You have been asked to determine the download time for pages on your site. One page consists of the XHTML document, several image files, and a Flash presentation. These elements equal 84 kilobytes (KB) total. How long will it take for this page to be downloaded by a user with an Internet connection speed of 33.6 kilobits per second (Kbps)?

- A. Approximately 5 seconds
- B. Approximately 15 seconds
- C. Approximately 20 seconds
- D. Approximately 55 seconds

Answer: C

5. Maria and her team are beginning to redesign a corporate Web site. The company owners want to keep the site's navigation icons at the top of each page, and enable linked pages to appear in another section of the same browser window. Which XHTML technique does Maria suggest?

- A. Pop-up JavaScript windows
- B. Frameset layout with upper and lower frames
- C. List elements enclosed by container tags
- D. Navigation icons in the top row of a table page structure

Answer: B

6. Consider the following XHTML code from a Web form:

How often do you want to be updated?

<select name="Frequency">

<option> Once a week </option>

<option> Once or twice a month </option>

<option> Once a month </option>

<option value="NotAtAll" > Never </option>

</select>

Which type of Web form field will this code create?

- A. A group of check boxes
- B. A group of radio buttons
- C. A single-option select list
- D. A scrolling multiple-select list

Answer: C

7. You are using Cascading Style Sheets (CSS) to format your Web site. You created an external style sheet to apply the same look and feel to all your pages. Which tag will you use on each page to reference your external style sheet?

- A. <link>
- B. <style>

- C. <body>
- D.

Answer: A

8. Rolf's Web site does not meet the W3C's Web Content Accessibility Guidelines (WCAG). To make his site more accessible according to WCAG, which change could he make?

- A. Remove all tables from site pages
- B. Add a disclaimer to the home page
- C. Create a text-only version of the site
- D. Add more images and decrease text

Answer: C

9. James created an XHTML table to show his schedule for each week of the month. He organized the table in a standard calendar format, so that each day from Sunday to Saturday is the header for a vertical column, and each week of days is displayed horizontally as a row. Each scheduled activity appears in the table cell appropriate for the day it occurs. James wants to merge two table cells into one cell to show the IT Business Conference that he will attend from Tuesday to Wednesday in the third week. Which tag should James use for this merged cell?

- A. <td colspan=?? IT Business Conference </td>
- B. <td rowspan=?? IT Business Conference </td>
- C. <th rowspan=?? IT Business Conference </th>
- D. <table colspan=?? IT Business Conference </table>

Answer: A

10. Which of the following eventually becomes a site map?

- A. A storyboard
- B. A needs analysis
- C. A scope diagram
- D. A stakeholder meeting

Answer: A
