Quality and Value for the 1Y0-610 Exam

[Just4Exams Practice Exams](#) for Citrix CCIA Citrix Other Certification 1Y0-610 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

100% Guarantee to Pass Your 1Y0-610 Exam

If you do not pass the CCIA Citrix Other Certification 1Y0-610 exam on your first attempt using our Just4Exams **1Y0-610 testing engine and pdf study guide**, we will give you a FULL REFUND of your purchasing fee.

Downloadable, Interactive 1Y0-610 Testing engines and PDF Version

Our Exam Preparation Material provides you everything you will need to take a [CCIA certification Citrix Other Certification certification](#) examination. Details are researched and produced by [Citrix Certification](#) Experts who are constantly using industry experience to produce precise, and logical.

1Y0-610

Title : Citrix Core Technologies and Architecture

1. Which of the following are user mode protocol extensions? (Choose two.)

- A. RDPWSX.DLL
- B. ICAWSX.DLL
- C. WSXRDP.DLL
- D. WSXICA.DLL

Answer: AD

2. Which of the following methods can be used to synchronize the Local Host Cache with the Microsoft SQL data store? (Choose two.)

- A. Execute a DSMMAINT command.
- B. Execute a QUERYHR command.
- C. Stop and restart the IMA service.
- D. Restart the server hosting the data store.

Answer: AC

3. Which one of the following describes the Listener Stack?

- A. It is responsible for managing a connection to an active session.
- B. It has no client activity and is waiting to be assigned to a connection.
- C. It is responsible for waiting incoming connection requests.
- D. It has a connected user that runs protected from all other instances with an associated ID.

Answer: C

4. Which one of the following is the "shadow key," where HKEY_CURRENT_USER changes are stored during application installation?

- A.HKEY_LOCAL_MACHINESOFTWARE\Microsoft\Windows NT\CurrentVersion\TerminalServer\UniqueSoftware
- B.HKEY_LOCAL_MACHINESOFTWARE\Microsoft\Windows NT\CurrentVersion\TerminalServer\InstallSoftware
- C.HKEY_LOCAL_MACHINESOFTWARE\Microsoft\Windows NT\CurrentVersion\TerminalServer\Install\UserSpecific
- D.HKEY_LOCAL_MACHINESOFTWARE\Microsoft\Windows NT\CurrentVersion\TerminalServer\Install\Security

Answer: B

5. When a MetaFrame XP server sends an SQL updated statement to the local (subscriber) SQL server and the local subscriber SQL server contacts the writable master publisher and submits the updated statement through Microsoft DTC, this sequence is a function of?

- A. Clustering
- B. Two-phase commit
- C. Data store replication
- D. Transactional replication

Answer: B

6. Which of the following is an activity that WFSHELL.EXE is responsible for performing?

- A. Launching user applications.
- B. Authenticating user credentials.
- C. Passing display parameters to the GDI.
- D. Initializing the listener and session stacks.

Answer: A

7. Which machine is responsible for communication with the Summary Database?

- A. Zone Data Collector
- B. Farm Metric Server
- C. Data Connection Server
- D. MetaFrame XP Server

Answer: C

8. In a MetaFrame XP farm that has been designed with a Microsoft SQL data store database in direct mode, changes to static server data (such as publishing an application) will result in MetaFrame XP servers sending the information to the data store. In order to configure firewalls that are in use in the network properly, TCP port access will be required on the firewalls. Which of the following processes correctly identifies which TCP ports will need to be open? (Choose two.)

- A. The configuration update is received from Citrix Management Console by the target MetaFrame XP server. This occurs over TCP port 2513.
- B. The MetaFrame XP server sends an update to the data store to be written. This occurs over TCP port 2513.
- C. The MetaFrame XP server sends a notification and the changed data to all other MetaFrame XP servers in the farm. This occurs over TCP port 2512.
- D. The MetaFrame XP servers receive the update and, in turn, update their local host cache. This occurs over TCP port 2513.

Answer: AC

9. The default IMA ping interval is ____ minute(s), and it should be ____ the time needed to reach the zone data collector.

- A. 1, equal to
- B. 3, equal to
- C. 3, greater than
- D. 1, greater than

Answer: D

10. You have a 23 server MetaFrame XP farm. The data store was functioning well within normal parameters. Yesterday, you added an additional 30 servers to the farm, and now the data store CPU consistently exceed normal utilization. The number of concurrent user connections has not changed. Which of the following will be the best course of action to resolve this issue?

- A. Refresh the LHC on all farm servers
- B. Recreate the LHC on all farm servers
- C. Decrease the value of the DCNChangePollingInterval
- D. Increase the value of the DCNChangePollingInterval

Answer: D

11. Which method(s) can be used by a MetaFrame server for updating the local host cache? (Choose two.)

- A. Polling the zone data collector for changes.
- B. Syncing with the data store on server startup.
- C. Syncing with the data store when the IMA Service is stopped.
- D. Receiving a change broadcast from zone data collector.

Answer: BD

12. Which of the following executables will be found in each terminal server session? (Choose two.)

- A. TERMSERV.EXE
- B. CSRSS.EXE
- C. SMSS.EXE
- D. WINLOGON.EXE
- E. WFSHELL.EXE

Answer: BD

13. Which of the following does the OS kernel NOT include?

- A. An interrupt handler that handles all requests or completed I/O operations.
- B. A manager of the operating system that addresses space in memory or storage.
- C. A subsystem that is responsible for console windows and the creation and deletion of threads.
- D. A scheduler that determines which programs share the processing time in what priority.

Answer: C

14. How do the MetaFrame XP servers communicate with the data store database in direct mode?

- A. IMA Service
- B. ODBC Connection
- C. TCP port 2513
- D. Local Host Cache

Answer: B

15. Which of the following activities occurs when IMA service stops on the server hosting the data store? (Choose two.)

- A. The database is automatically backed up.
- B. The instance of files with a .BAK extension are deleted.
- C. The existing database is copied with a .UNK extension.
- D. The instance of files with a .UNK extensions are deleted.

Answer: AC

16. Which is one benefit of memory-based code sharing?

- A. It allows the OS kernel to allocate memory to user processes dynamically.
- B. It is a significant optimizer, as only a single instance of the application must reside in memory.
- C. It makes Terminal Services more robust, by maintaining redundant copies of an executable in memory.
- D. It allows the memory manager to be more flexible and scalable, utilizing multiple processors when available.

Answer: B

17. Which subsystem is responsible for transferring Summary Files from the MetaFrame servers to the Summary Database?

- A. Metrics Subsystem
- B. Distribution Subsystem
- C. Alerts Subsystem
- D. Summary Database Subsystem

Answer: B

18. What is the main design consideration when choosing a file server to maintain your Installation Manager packages?

- A. It should be a MetaFrame server.
- B. It should be the Packager server.
- C. It must be accessible by each MetaFrame server.
- D. It must be in the same domain as the MetaFrame farm.

Answer: C

19. How often are metrics which are being monitored polled for their value?

- A. Every second
- B. Every Minute
- C. Every 15 Seconds
- D. Every Fifteen minutes

Answer: C

20. On Monday morning you realize that at some point over the weekend, the data store shut down and was never turned back on. Although applications are still accessible, you are unable to manage the servers using the Citrix Management Console. What should be the first troubleshooting step in order to recover database?

- A. Restore the data store from a back-up.
- B. Create a new data store and point the farm to it.
- C. Run NETSTAT to verify that the port 2512 is listening
- D. Turn the database server back on and make sure the service restarts.

Answer: D
