Quality and Value for the 225-020 Exam

[Just4Exams Practice Exams](#) for CompTIA CDIA+ 225-020 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

100% Guarantee to Pass Your 225-020 Exam

If you do not pass the CDIA+ 225-020 exam on your first attempt using our Just4Exams **225-020 testing engine and pdf study guide**, we will give you a FULL REFUND of your purchasing fee.

Downloadable, Interactive 225-020 Testing engines and PDF Version

Our Exam Preparation Material provides you everything you will need to take a [CDIA+ certification](#) examination. Details are researched and produced by [CompTIA Certification](#) Experts who are constantly using industry experience to produce precise, and logical.

Title : CDIA+ Certification Exam-2002 Objectives

1. An organization is migrating from an older document imaging system to a new system.

What is the most important risk to consider first?

- A. Barcode compatibility.
- B. Lack of documentation.
- C. Reliable and accurate retrieval.
- D. Database capacity and transfer rate.

Answer: C

2. A company has contracted with a system integrator to implement a document management system that includes custom development

and integration with its legacy systems.

What is the best way to confirm that the proposed system will meet customer expectations?

- A. Review the company's business process.
- B. Conduct a software review based upon proof of concept.
- C. Confirm the system's capability during the training process.
- D. Provide the customer with complete system technical documentation.

Answer: A

3. A customer is implementing a workflow system with electronic dossiers. During the design of the workflow it has been discovered that there are many exceptions to the process.

What is the first step in handling the exceptions?

- A. Validate exceptions through a third party.
- B. Get a commitment on the number of exceptions.
- C. Redesign the workflow system to handle every exception.
- D. Recommend to the client that business processes be redesigned.

Answer: D

4. An Implementation Plan for a new imaging application should contain which activities?

- A. Forms design, create the document retention strategy document and layout the workflow rules and roles.
- B. Integrate the production imaging system into the existing IT network, connect it with the legacy systems; upgrade all of the desktop computers.
- C. Verify that images are delivered to the desktop, that the records are written in the database, and check that the images are stored on optical disks.
- D. Define production procedures; create user and technical documentation; plan and execute user and system administration and plan the roll-out in the organization.

Answer: D

5. Companies have always taken precautions with the physical security of their records.

Which of the following security precautions is the most important when transmitting electronic documents over the Internet?

- A. Digitally sign and watermark all documents before publication.
- B. Limit access to the documents using encryption and authentication.
- C. Limit access to the documents by implementing a firewall and HTTPS.
- D. Require users to enter password and date of birth in order to access documents.

Answer: B

6. TestInside processes a very large number of invoices daily that are of non-standard sized and different thickness.

Which of the following is the most important criterion for selecting a scanner for TestInside?

- A. ADF
- B. Lamps
- C. High Speed
- D. Despeckling

Answer: A

7. TestInside accesses a host-based line-of-business application using a standard telnet session and terminal emulator, as well as accessing other electronic documents from their mixed network environment. Documents are typically scanned, routed between departments, and captured from the host print queues.

Which of the following is the most cost-effective solution to implement?

- A. An RDBMS integrated into the system using EDI
- B. A host-based workflow system with imaging and COLD capabilities.
- C. A custom developed mainframe-based system, including multiple high-speed scanners and printers.
- D. A network-based document management system that will use screen-scraping to image-enable the host system.

Answer: B

8. TestInside revises several procedure documents every year. Multiple individuals review and revise these documents before final approval.

Which would be the best solution?

- A. EDI
- B. COLD/EDM
- C. E-mail
- D. Workflow

Answer: A

9. A content management solution has been designed for a company. In order to complete the implementation it will be necessary to remove user access to the content management database for several hours a day for several weeks.

How should this requirement be addressed?

- A. Solicit the vendors' input for the best times to conduct implementation tasks.
- B. Solicit the solution owner's input for the best times to conduct implementation tasks.
- C. Redesign the solution so that all of the implementation can be handled in one 24-hour period.
- D. Indicate to the solution owner that the best time for implementation tasks is 10 pm

Answer: B

10. A company, TestInside Inc, is using 90% of its network capacity. They plan to scan 5,000 images per day to a network file server. In order to meet the increased demands on the system, which of the following should be increased?

- A. The network bandwidth.
- B. The number of scanners.
- C. The number of network servers.
- D. The number of users on the network.

Answer: A

11. A legal customer wants to place identifying marks on each document as it is scanned.

What is the procedure commonly called?

- A. Barcoding
- B. Imprinting
- C. Prefetching
- D. Thresholding

Answer: B

12. An imaging consultant has just finished a presentation showing document retrieval over the Web. The client has specified that this is a requirement of the project.

However, after the demonstration the IT group is expressing concerns about opening their system up to the Internet.

How should the consultant respond to the IT group?

- A. Tell them that the project team is satisfied.
- B. Ignore them, as the project requirements are met.
- C. Demonstrate the retrieval of the documents again.
- D. Explain to them the security components of the solution.

Answer: D

13. A medical laboratory has implemented a document management solution in which saved reports need to be faxed to medical practitioners. With the current system, reports are printed from a PC to an inkjet printer and then the document is faxed manually to the practitioners.

How can this system be altered to produce the best return on investment?

- A. The system used is the most effective available.
- B. Replace the inkjet printers with laser printers.
- C. Add a fax modem and fax the documents to practitioners.
- D. Use dot-matrix printers because they are less expensive to own and operate.

Answer: C

14. Which of the following parties would most benefit from producing a structured training document?

- A. IT
- B. CIO
- C. Vendor
- D. Help Desk

Answer: D

15. Hospital management is implementing a document management system. Research has indicated that nursing staff who will be using the system feel that they are understaffed and will not have time to enter the data. However, when questioned it was found that the nurses did not really know what the system was about.

What key factor has been overlooked?

- A. A proper public relations exercise was not carried out.
- B. Access to a demonstration system has not been provided.
- C. Management has not explained that the system must be used.
- D. The end-users have not been engaged in the entire process.

Answer: D

16. A sales consultant has proposed two different storage solutions: a network-attached RAID array or a network-attached jukebox.

What is the major difference between these two solutions?

- A. Jukebox storage capacity is higher.
- B. RAID array storage capacity is higher.
- C. The jukebox allows for faster retrieval.
- D. The RAID array allows for faster retrieval.

Answer: A

17. Who is most likely to determine the origin of the bottlenecks if the productivity of a new workflow system is less than expected?

- A. End-user
- B. Help Desk
- C. IT Department
- D. System Integrator

Answer: D

18. TestInside is capturing index-size cards with a document management system. Each document is approximately 5KB. The retention requirement is six months. The document retrieval rates are highest during the first 90 days of the document life cycle.

Which document storage type would best fit TestInside's requirements?

- A. DVD
- B. DLT
- C. RAID
- D. WORM

Answer: C

19. An organization currently microfilms all source documents. While filming, the source document is unavailable for a minimum of three days. A document imaging system has been proposed where documents will now be scanned.

What is the best advantage of the proposed system?

- A. Scanned images are higher quality.
- B. Documents are available immediately.
- C. Scanners are more reliable than cameras.
- D. Microfilm can be created from the scanned documents.

Answer: B

20. During the presentation of a prototype, a customer realizes that it has left out a critical security component. The customer has already approved the software requirements.

What is the appropriate next step for the consultant?

- A. Ask the customer for a change request form.
- B. Agree to make the changes needed at no cost.
- C. Ask the development team to make the changes.
- D. Inform the customer that no changes can be made.

Answer: A
