Exam : SUN 310-081

Title : Sun Certified Web Component Developer for J2EE 1.4

1. A web resource called foo.jsp requires two request parameters (P1 and P2). Construct the JSP code to forward to the foo.jsp resource.

Answer:

2. Which three are valid URL mappings to a servlet in a web deployment descriptor? (Choose three.)

A. /*

B. /*.do

C. MyServlet

D. /MyServlet

E. /MyServlet/*

F.MyServlet/*.jsp

Answer: BDE

3. Place the XML elements in the web application deployment descriptor solution to configure a servlet context event listener named com.example.MyListener.

Answer:

4. Click the Exhibit button.

Which statement, inserted at line 11, retrieves the text from the second text field?

A.second = request.getParameter("foo");

B.second = request.getParameter("foo", 1);

C.second = request.getParameter("foo", 2);

D.second = request.getParameters("foo")[1];

E.second = request.getParameterValues("foo")[1];

Answer: E

5. Given:

Which two are true? (Choose two.)

A.The foo initialization parameter CANNOT be set programmatically.

B.Compilation fails because getInitParameter returns type Object.

C.The foo initialization parameter is NOT a servlet initialization parameter.

D.Compilation fails because ServletContext does NOT have a getInitParameter method.

E.The foo parameter must be defined within the <serMet> element of the deployment descriptor.

F.The foo initialization parameter can also be retrieved using getServletConfig().getInitParameter("foo").

Answer: AC

6. Under what two circumstances is the setJspBody method NOT called in a tag class that implements the SimpleTag interface? (Choose two.)

A.The tag is invoked without a body.

B.The doTag method throws an exception.

C.The element has the value empty.

D.The tag is called with the attribute skip-body=true.

Answer: AC

7. Given a header in an HTTP request:

X-Retries: 4

Which two retrieve the value of the header from a given ServletRequest request? (Choose two.)

A.request.getHeader("X-Retries")

B.request.getIntHeader("X-Retries")

C.request.getRequestHeader("X-Retries")

D.request.getHeaders("X-Retries").get(0)

E.request.getRequestHeaders("X-Retries").get(0)

Answer: AB

8. Which HTTP method has the characteristic that multiple identical requests may produce side effects beyond those of a single request?

A.PUT

B.GET

C.INFO

D.POST

E.HEAD

F.TRACE

Answer: D

9. Place the code snippets in the proper order to construct the JSP code to include dynamic content into a JSP page at request-time.

Answer:

10. Which retrieves all cookies sent in a given HttpServletRequest request?

A.request.getCookies()

B.request.getAttributes()

C.request.getSession().getCookies()

D.request.getSession().getAttributes()

Answer: A

11. Given a servlet OrderServlet mapped to processorder, and a form declaration in HTML:
What OrderServlet method is invoked as a result of this form submission?

- A.doGet
- B.doPut
- C.doPost
- D.doTrace
- E.doSubmit

Answer: A

12. A collection of products is stored in the ServletContext in an attribute called catalog.
Which JSTL code structure iterates over each product in the collection and prints out the names of the products in an un-ordered list?

A.

```
<c:for var='product' items='${catalog}'>  
<li><%= product.getName() %></li>  
</c:for>
```

B.

```
<c:for id='product' collection='${catalog}'>  
<li><%= product.getName() %></li>  
</c:for>
```

C.

```
<c:forEach var='product' items='${catalog}'>  
<li><%= product.getName() %></li>  
</c:forEach>
```

D.

```
<c:forEach id='product' collection='${catalog}'>  
<li><%= product.getName() %></li>  
</c:forEach>
```

Answer: C

13. Which HTTP method represents a request for information about the supported methods on an HTTP server?

- A.GET
- B.INFO
- C.HEAD
- D.TRACE
- E.OPTIONS

Answer: E

14. Place the events in the order they occur.

Answer:

15. A developer wants to use EL to invoke a function using `#{my:bloof("foof")}`.

Which is always true?

- A.The method invoked by this function must be static.
- B.The function class must implement the Function interface.
- C.The expression is NOT a valid EL expression for invoking a function.
- D.The function must be declared in a web.xml file using the <function> element.
- E.The function class must have a method with the signature:

Answer: A

16. Which two are valid values for the <transport-guarantee> element inside a <security-constraint> element of a web application deployment descriptor? (Choose two.)

- A.NULL
- B.SECURE
- C.INTEGRAL
- D.ENCRYPTED

E.CONFIDENTIAL

Answer: CE

17. Which two HTTP methods are used to process form data in a servlet? (Choose two.)

- A.doGet
- B.doPut
- C.doPost
- D.doTrace
- E.doSubmit
- F.doProcess

Answer: AC

18. Place the code snippets onto the first line to form a directive to use a custom tag library in a JSP page.

Answer:

19. Which two are characteristics of the Intercepting Filter pattern? (Choose two.)

- A.It provides centralized request handling for incoming requests.
- B.It forces resource authentication to be distributed across web components.
- C.It reduces coupling between presentation-tier clients and underlying business services.
- D.It can be added and removed unobtrusively, without requiring changes to existing code.
- E.It allows preprocessing and postprocessing on the incoming requests and outgoing responses.

Answer: DE

20. Given the definition of MyObject and that an instance of MyObject is bound as a session attribute:

Which is true?

- A.Only a single instance of MyObject may exist within a session.
- B.The unbound method of the MyObject instance is called when the session to which it is bound times out.
- C.The com.example.MyObject must be declared as a servlet event listener in the web application deployment descriptor.
- D.The valueUnbound method of the MyObject instance is called when the session to which it is bound times out.

Answer: D
