Quality and Value for the 642-373 Exam

[Just4Exams Practice Exams](#) for Cisco Others 642-373 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

100% Guarantee to Pass Your 642-373 Exam

If you do not pass the Others 642-373 exam on your first attempt using our Just4Exams **642-373 testing engine and pdf study guide**, we will give you a FULL REFUND of your purchasing fee.

Downloadable, Interactive 642-373 Testing engines and PDF Version

Our Exam Preparation Material provides you everything you will need to take a [Others certification](#) examination. Details are researched and produced by [Cisco Certification](#) Experts who are constantly using industry experience to produce precise, and logical.

Exam : Cisco 642-373

Title : Cisco Express Foundation for Systems Engineers

1. What is one benefit of the Cisco anti-X defense strategy?

- A. applications security
- B. virtual firewall protection
- C. security events correlation for proactive response
- D. malware, virus, and worm mitigation

Answer: D

2. Refer to the exhibit. What are two Cisco IOS commands that would verify connectivity between routers R1 and R2? (Choose two.)

- A. show cdp neighbor

- B. show controllers serial
- C. show frame-relay lmi
- D. show ip route
- E. show running-config

Answer: A, D

3. Which Cisco security tool can best determine if a Cisco ISR router is properly secured?

- A. Cisco SDM Security Audit
- B. Cisco Security MARS
- C. Cisco Security Agent MC
- D. Cisco Security IntelliShield
- E. CAN

Answer: A

4. At which stage of the Cisco Lifecycle Services approach should customer education presentations occur?

- A. Planning
- B. Design
- C. Implementation
- D. Operation
- E. Optimization

Answer: A

5. In the plan phase, network readiness assessment addresses which customer need?

- A. an assessment of the preparedness of the customer's existing system infrastructure to support a proposed solution
- B. a comprehensive design that has been customized based on the operations processes, network management processes, and tools of its system
- C. an in-depth assessment of the operational environment required to support the operation of both the current and planned solutions
- D. the optimal technologies for supporting its business requirements and objectives

Answer: A

6. Which two of these statements best describe the benefits of the Cisco Compatible Extensions Program? (Choose two.)

- A. offers a feature-rich implementation alternative to Wi-Fi certification
- B. accelerates the availability of innovative features while maintaining interoperability
- C. provides innovative features only on Cisco's wireless client adapters
- D. provides an evolving set of specifications for interoperability
- E. eliminates the need for testing by providing innovative features to wireless client vendors through a one-time license fee

Answer: B, D

7. On what lower-level transport protocol does CiscoWorks LAN Management Solution rely on and why?

- A. TCP, because CiscoWorks LAN Management requires that packets require the reliability in the network
- B. UDP, because CiscoWorks LAN Management is an application that does not require the reliability of TCP
- C. IP, because CiscoWorks LAN Management requires the reliability of IP packets
- D. UDP, because CiscoWorks LAN Management requires the reliability of UDP's detection of lost packets and retransmission
- E. TCP, because CiscoWorks LAN Management does not require detection and retransmission of lost packets

Answer: B

8. Which CiscoWorks component would most help you locate end-station connections at the access switch level quickly?

- A. CiscoView
- B. Resource Manager Essentials
- C. Device Fault Manager
- D. Campus Manager

Answer: D

9. After properly configuring multiple VLANs, an administrator has decided to secure its VLAN network. Which three steps are required to secure this environment? (Choose three.)

- A. If a port is connected to a foreign device make sure to disable CDP, DTP, RPR, PAgP, UDLP, and any other unnecessary protocols, and enable UplinkFast/BPDU guard on it.
- B. Enable root guard feature to prevent a directly or indirectly connected STP-capable device from affecting the location of the root bridge.
- C. Configure VTP domains appropriately or turn off VTP altogether to limit or prevent possible undesirable protocol interaction with regards to the network-wide VLAN configuration.
- D. Set the native VLAN ID to match the port VLAN ID of any 802.1q trunk to prevent spoofing.

E. Disable all unused ports and place them in an unused VLAN to avoid unauthorized access.

Answer: B, C, E

10. Which definition best describes the implementation service component within the implement phase?

- A. providing a step-by-step plan that details the installation and service-commission tasks required in order to create a controlled-implementation environment that emulates a customer network
- B. assessing the ability of site facilities to accommodate proposed infrastructure changes
- C. developing and executing proof-of-concept tests, validating high-level infrastructure design, and identifying any design enhancements
- D. installing, configuring, and integrating systems components based on an implementation plan developed in earlier phases
- E. improving a customer's infrastructure security system

Answer: D

11. At which stage of the Cisco Lifecycle Services approach would you test for system acceptance?

- A. Preparation
- B. Planning
- C. Design
- D. Implementation
- E. Operation
- F. Optimization

Answer: D

12. What is the purpose of the Dynamic Configuration Tool?

- A. to determine the correct IOS image to support your modules or blades
- B. to allow for the mass deployment of devices with minimal configurations
- C. to test router configurations virtually prior to implementing them in your production network
- D. to provide an easy way to check for known bugs in IOS releases
- E. to verify that hardware such as modules are compatible with your chassis

Answer: E

13. Which of these best describes the Cisco Lifecycle Services approach?

- A. a methodology for proactively updating equipment before it reaches the end of its life
- B. a methodology for introducing new technologies
- C. a methodology for creating a business plan
- D. a methodology for determining total cost of ownership

Answer: B

14. In the design phase, which service component provides the customer with a comprehensive design?

- A. Implementation Plan
- B. Detailed Design Development
- C. Project Kick-off
- D. Staging Plan
- E. High-Level Design

Answer: B

15. Which of the following best describe the customer benefit of creating a systems acceptance test plan in the design phase?

- A. reduce unnecessary disruption, delays, rework, and other problems by establishing test cases for use in verifying that the system meets operational, functional, and interface requirements
- B. improve its ability to make sound financial decisions by developing a business case based on its business requirements and establishing a basis for developing a technology strategy
- C. reduce operating costs and limit change-related incidents by providing a consistent and efficient set of processes
- D. improve the return on investment and hasten migration by identifying and planning for necessary infrastructure changes and resource additions, as well as reduce deployment costs by analyzing gaps early in the planning process to determine what is needed to support the system

Answer: A
