Exam : Cisco 642-511

Title : Cisco(r) VPN and Security Cisco Secure Virtual Private Networks (CSVPN)

1. Choose three parameters sent from the Cisco VPN Concentrator to the remote Cisco VPN Client during tunnel establishment. Choose three.

- A. group name
- B. primary DNS address
- C. access priority
- D. split tunnel policy
- E. Cisco VPN Client IP address
- F. access priority level

Answer: BDE

2. What statement about the Cisco VPN Client local LAN access feature is true?

- A. It enables split tunneling.
- B. It enables Cisco VPN Client to encrypt packets destined for the local LAN.
- C. It enables and disables Cisco VPN Client access to the local LAN.
- D. It enables local LAN users access to the VPN tunnel.

Answer: C

3. Which three are supported user authentication types? Choose three.

- A. NT Domain
- B. Radius
- C. AES
- D. SDI
- E. TACACS+
- F. Entrust

Answer: ABD

4. What type of keys does RSA use for encryption and decryption?

- A. symmetrical keys
- B. asymmetrical keys
- C. exponentiation keys
- D. elliptical curve keys

Answer: B

5. Which three responsibilities does a CA have? Choose three.

- A. revokes valid certificates
- B. creates certificates
- C. decrypts digital certificate
- D. administers certificates
- E. issues equipment certificates
- F. revokes invalid certificates

Answer: BDF

6. What is the effect of enabling transparent tunneling on the Cisco VPN Client?

- A. data packets are wrapped in UDP
- B. encryption is disabled on the Cisco VPN Client
- C. Cisco VPN Client transmits traffic in clear text
- D. split tunneling is enabled on the Cisco VPN Client

Answer: A

7. With SEP redundancy, if the top SEP fails and the bottom SEP takes over, which statement is true?

- A. all sessions are lost
- B. operator intervention is required
- C. no sessions are lost
- D. only the Cisco VPN 3080 supports SEP redundancy

Answer: C

8. What are two Quick Configuration elements used in the configuration of IPSec groups? Choose two.

- A. password
- B. user name
- C. group priority
- D. group access protocols
- E. group server name
- F. group name

Answer: AF

9. Within the Cisco VPN Concentrator series of products, what is the maximum number of simultaneous sessions supported when doing encryption in hardware?

- A. 100
- B. 1500
- C. 5000

D. 10000

Answer: D

10. Under the IKE active proposal list, the certicom client supports which IKE proposal?

- A. IKE-3DES-MD5-RSA
- B. IKE-3DES-MD5-DH7
- C. CiscoVPNClient-3DES-MD5
- D. IKE-3DES-MD5

Answer: B

11. How can an administrator accommodate the different access needs in a Cisco VPN Concentrator?

- A. by configuring rights and privileges parameters in the Cisco VPN Concentrator
- B. by configuring user and group parameters in the Cisco VPN Concentrator
- C. by configuring access and usage parameters in the Cisco VPN Concentrator
- D. by configuring rights and privileges in the network authentication server

Answer: B

12. When two adjacent Cisco VPN Concentrators are configured for VRRP and the master Cisco VPN Concentrator fails, which statement is true?

- A. all sessions are lost
- B. only remote access users need to re-establish their tunnels
- C. no sessions are lost
- D. only site-to-site users need to re-establish their tunnels

Answer: B

13. Which statement about the Cisco VPN Concentrator load balancing feature is true?

- A. Cisco VPN Concentrators load balance both site-to-site and remote access tunnels.
- B. Cisco VPN Concentrators load balance site-to-site tunnels only.
- C. Cisco VPN Concentrators load balance remote access tunnels only.
- D. Cisco VPN Concentrator load balances administration sessions.

Answer: C

14. In the GUI, what happens if you reboot without saving the configuration changes?

- A. configuration changes are lost
- B. configuration changes remain
- C. system does not allow you to reboot without saving
- D. system warns you that the configuration changes will be lost, do you still want to proceed

Answer: A

15. When configuring remote access protocols under quick configuration, what protocol restrictions does the Cisco VPN Concentrator impose?

- A. no protocol restrictions
- B. only one access protocol per group
- C. any two access protocols per group
- D. IPSec plus one other access protocol

Answer: A

16. For the Cisco VPN Client to interoperate with a PIX Firewall, what is the minimum version of the PIX Firewall?

- A. 5.2
- B. 5.3
- C. 6.0
- D. 6.1

Answer: C

17. If the primary role of the VPN product is to perform remote access VPN with a few site-to-site connections, which product should you choose?

- A. 2900
- B. 3030
- C. 3660
- D. PIX Firewall 515

Answer: B

18. When configuring address assignments, which method uses the Cisco VPN 3000 Concentrator to assign IP addresses from an internal pool?

- A. remote client pool
- B. per-user
- C. configured pool
- D. DHCP pool

Answer: C

19. To pre-configure a Cisco VPN client, what three files are required? Choose three.

- A. unattended_setup.ini
- B. user.pcf
- C. data.ini
- D. oem.ini
- E. vpnclient.ini
- F. client.ini

Answer: BDE

20. What are three functions of IKE Phase 2? Choose three.

- A. uses aggressive mode
- B. uses main mode
- C. optionally performs an additional DH exchange
- D. verifies the other side's identity
- E. periodically renegotiates IPSec SAs to ensure security
- F. negotiates IPSec SA parameters protected by an existing IKE SA

Answer: CEF
