**Exam Name:** *Advanced Routing and Switching Life Cycle Services (LCSARS)*

**Q & A :** 81 Q&As

***Pdf Demo***

### **Quality and Value for the 646-056 Exam**

[Just4Exams Practice Exams](#) for Cisco Others 646-056 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

### **100% Guarantee to Pass Your 646-056 Exam**

If you do not pass the Others 646-056 exam on your first attempt using our Just4Exams **646-056 testing engine and pdf study guide**, we will give you a FULL REFUND of your purchasing fee.

### **Downloadable, Interactive 646-056 Testing engines and PDF Version**

Our Exam Preparation Material provides you everything you will need to take a [Others certification](#) examination. Details are researched and produced by [Cisco Certification](#) Experts who are constantly using industry experience to produce precise, and logical.

Exam : Cisco 646-056

Title : Cisco(r) Advanced Routing and Switching Life Cycle Services (LCSARS)

1. What should staff development requirements be identified against?
  - A. third-party business processes
  - B. migration site details
  - C. business initiatives, goal, and technical activities required to support network infrastructure solution
  - D. implementation risks

Answer: C

2. Which two tasks focus on discussing the network implementation strategy with key stakeholders and business owners? (Choose two.)
  - A. rollback and contingency plans

- B. resource requirements and tools to perform network operations testing
- C. site remediation, plans, and execution status
- D. site survey results

Answer: CD

3. Which activity is conducted as part of the Implementation Plan Development?

- A. System Acceptance Testing
- B. Presentation of Staging Plan
- C. Conduct an On-site Discovery Workshop
- D. Business Readiness Development

Answer: C

4. In testing for business readiness, what are three ways that success criteria should be classified? (Choose three.)

- A. success with needed corrective actions
- B. partial success pending next phase
- C. complete success
- D. failure

Answer: ACD

5. Which two tasks are conducted as part of the Migration Plan Development service component? (Choose two.)

- A. Review high-level description of the design requirements, capabilities, features, and functionality of the existing and proposed infrastructure solution.
- B. Analyze the business requirements to identify and align with technology and service requirements.
- C. Identify network services to be migrated.
- D. Define test scripts, use cases and scenarios that validate both operations and network management and security configurations.

Answer: AC

6. Which task is conducted during the develop the systems acceptance test plan activity?

- A. network resilience tests
- B. compare test parameters against service level requirements
- C. create logical topology diagrams
- D. turn-up and commission tests

Answer: B

7. Which two items on the design discovery checklist are used to create a low-level design? (Choose two.)

- A. technical requirements
- B. capacity planning
- C. design goals
- D. WAN modeling

Answer: AC

8. Which activity is performed to discuss the network implementation strategy with key stakeholders and business owners?

- A. System Acceptance Testing
- B. Presentation of Staging Plan
- C. Conduct an On-site Discovery Workshop
- D. Business Readiness Plan Development

Answer: C

9. Which three types of information should be included in a system acceptance test plan? (Choose three.)

- A. site survey results
- B. network resilience tests
- C. physical and logical network topology diagrams
- D. configurations

Answer: BCD

10. Which task is part of executing a Detailed Design Validation?

- A. Execute the test identified in the detailed design test plan and capture test results.
- B. Determine how results impact the original design.
- C. Incorporate recommended changes into the design process.
- D. Verify that hardware and software requirements are included.

Answer: A

11. Which three test elements need to be documented when producing a business readiness test plan? (Choose three.)

- A. business critical application tests
- B. endpoint migrations tests
- C. feature configuration tests
- D. third-party operations and network management application and integration tests

Answer: ACD

12. Which task is part of a Staging Plan Development onsite discovery workshop?

- A. Identify implementation risks.
- B. Validate network management design.
- C. Verify customer site locations and contacts.
- D. Create test cases.

Answer: D

13. What should technical requirements and design goals be combined to create?

- A. Detailed Design Validation
- B. Low-Level Design
- C. Service Level Criteria
- D. Systems Acceptance Test Plan

Answer: B

14. Which two documents should be part of the Staging Plan Development? (Choose two.)

- A. site requirements specification
- B. staging project plan
- C. bill of materials
- D. low-level design template

Answer: AB

15. In the design phase, which two tasks are conducted as part of the produce business readiness test plan activity? (Choose two.)

- A. Review the Network Implementation Plan, Low-Level Design, and Network Management System Design.
- B. Finalize Operations and Network Management Design and Test Requirements Document Containing Specific Tests.
- C. Verify Service Level Agreements.
- D. Identify Implementation Risks.

Answer: AB

16. Which three tasks are conducted as part of the Implementation Plan Development service component? (Choose three.)

- A. Discuss network implementation schedules.
- B. Define testing requirements.
- C. Verify site contacts, locations, and other project considerations.
- D. Identify implementation risks.

Answer: ACD

17. Which three resources are used to support physical and logical design documentation of the operations and network management system? (Choose three.)

- A. verification results
- B. design templates
- C. standards
- D. operation policies

Answer: BCD

18. Which task is conducted during Migration Plan Development?

- A. Identify staff development requirements against business initiatives, goal, and technical activities required to support the infrastructure solution.
- B. Identify risk and propose a risk mitigation strategy.
- C. Obtain and review security procedures and policies.
- D. Perform an automated scan of ports to determine potential vulnerabilities.

Answer: B

19. Which task is part of the identify operations design requirements activity?

- A. Define and document the appropriate service-level requirements associated with performance, availability, capacity, resiliency, and

- security that correlate with service delivery goals.
- B. Develop physical and logical schematics for future growth.
- C. Select tools and applications to meet objectives.
- D. Define methods and procedures to support operations.

Answer: A

20. Which three activities are conducted as part of resource management plan development? (Choose three.)

- A. Perform business readiness.
- B. Perform context analysis.
- C. Perform needs analysis.
- D. Perform learner analysis.

Answer: BCD
