Exam : Cisco 646-058

Title : Cisco(r) Lifecycle Services Advanced Routing and Switching (LSARS)

1. Which three resources are used to support physical and logical design documentation of the operations and network management system? (Choose three.)

- A. verification results
- B. design templates
- C. standards
- D. operation policies

Answer: BCD

2. Which two items on the design discovery checklist are used to create a low-level design? (Choose two.)

- A. technical requirements
- B. capacity planning
- C. design goals
- D. WAN modeling

Answer: AC

3. Which task is part of executing a Detailed Design Validation?

- A. Execute the test identified in the detailed design test plan and capture test results.
- B. Determine how results impact the original design.
- C. Incorporate recommended changes into the design process.
- D. Verify that hardware and software requirements are included.

Answer: A

4. Which service component within the plan phase prescribes a set of activities and tasks to assess existing network infrastructure and applications to verify their ability to support the proposed routing and switching solution for a customer?

- A. Deployment Project Management
- B. Operations Readiness Assessment
- C. Security Vulnerability Assessment
- D. Site Readiness Assessment
- E. Network Readiness Assessment

Answer: E

5. Which task is conducted as part of Business Readiness Testing?

- A. Identify, select, and assess network management tools, features, and functionality.
- B. Obtain and review security procedures and policies.
- C. Use predetermined use cases or design use cases based upon validated business and operational requirements.
- D. Review network implementation strategy.

Answer: C

6. Which task is performed during the Systems Monitoring service component in the operate phase?

- A. Test system connectivity.
- B. Populate and maintain configuration management database.
- C. Manage passwords, rights, and permissions.
- D. Collect performance data for reporting, such as CPU, memory, storage, licenses and port utilization, and availability data.
- E. Update security signatures.

Answer: D

7. Which two tasks focus on discussing the network implementation strategy with key stakeholders and business owners? (Choose two.)

- A. rollback and contingency plans
- B. resource requirements and tools to perform network operations testing
- C. site remediation, plans, and execution status
- D. site survey results

Answer: CD

8. Which three activities within the plan phase are performed when assessing network vulnerabilities and identifying steps needed to address security threats and attacks? (Choose three.)

- A. Produce network security specifications and requirements.
- B. Identify, analyze, and document existing network vulnerabilities.
- C. Produce security vulnerability report.
- D. Assess current network infrastructure and network security procedures.
- E. Document the existing network environment.
- F. Document the network vulnerabilities and determine the level of criticality for remediation.

Answer: BCE

9. What are two typical activities that are conducted as part of Security Assessment? (Choose two.)

- A. Perform intrusion audits.
- B. Assess network infrastructure software and configurations.
- C. Create a performance baseline for Security Assessment.
- D. Categorize security incidents.

Answer: AC

10. Which three tasks are conducted as part of the Implementation Plan Development service component? (Choose three.)

- A. Discuss network implementation schedules.
- B. Define testing requirements.
- C. Verify site contacts, locations, and other project considerations.
- D. Identify implementation risks.

Answer: ACD
