Quality and Value for the 646-102 Exam

[Just4Exams Practice Exams](#) for Cisco Wireless LAN 646-102 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

100% Guarantee to Pass Your 646-102 Exam

If you do not pass the Wireless LAN 646-102 exam on your first attempt using our Just4Exams **646-102 testing engine and pdf study guide**, we will give you a FULL REFUND of your purchasing fee.

Downloadable, Interactive 646-102 Testing engines and PDF Version

Our Exam Preparation Material provides you everything you will need to take a [Wireless LAN certification](#) examination. Details are researched and produced by [Cisco Certification](#) Experts who are constantly using industry experience to produce precise, and logical.

Exam : Cisco 646-102

Title : Wireless LAN for Account Managers Exam

1. The process of a client attaching to an AP includes authentication and association. Which two statements are true? (Choose two.)

- A. Association is the process of ensuring unique WEP keys.
- B. Association consists of the client validating the SSID to an AP.
- C. Association is the process of associating an AP with a specific QoS policy.
- D. Authentication is the process of verifying the credentials of a client desiring to join a WLAN.

Answer: AC

2. What are three available sources of inline power for the Access Point (AP)? (Choose three.)

- A. 7500 series routers

- B. inline power injector
- C. standard power cable
- D. inline power patch panel
- E. Cisco Catalyst 3550 switch

Answer: ABC

3. What is WEP?

- A. Wired Equivalent Privacy
- B. Wired Enabled Protection
- C. Wireless Equivalent Privacy
- D. Wireless Equipped Protection

Answer: A

4. Load balancing of clients between Access Points (APs) is a method to achieve optimal WLAN performance. Which two statements are true about load balancing? (Choose two.)

- A. Load balancing policies are based on number of users, error rates, and signal strengths.
- B. Load balancing redistributes users among APs to deliver more balanced collision domains.
- C. Load-balancing policies are based on cell size, aggregate peak cell capacity, and radio frequency.
- D. Load balancing redistributes users among APs to deliver clients to the most compatible cell frequency.

Answer: AB

5. What is a common business driver for a Cisco in-building WLAN solution?

- A. improving the performance of a traditional wired network
- B. extending operations to a remote location in another city
- C. moving, adding, and changing user locations without rewiring
- D. increasing the number of users authorized to access the network

Answer: C

6. You have an environment where extended wireless cell coverage is needed, but access to the backbone is not practical or available.

Which two answers correctly describe what is needed for this solution? (Choose two.)

- A. wireless bridge
- B. 50% cell overlap
- C. wireless repeater
- D. workgroup bridge
- E. 10-15% cell overlap
- F. line of sight to AP or wireless bridge

Answer: BC

7. Which three describe a multi-point bridging environment? (Choose three.)

- A. The LANs all appear as one.
- B. The LANs are individual subnets.
- C. Directional antennas are typically used at the main site.
- D. An omni directional antenna is typically used at the main site.
- E. The remote sites communicate with the main site and with each other directly.
- F. The remote sites communicate with the main site, with traffic from one remote site to another passed through the main site.

Answer: ABC

8. What are two security enablers for Cisco WLAN? (Choose two.)

- A. distributed authorization lists
- B. specialized appliances to prevent access
- C. network intrusion detection for worms and viruses
- D. encryption of data packets that transmits through the air
- E. centralized user authentication and encryption key management

Answer: DE

9. Why buy a Cisco WLAN solution for its security features?

- A. It transmits around physical barriers.
- B. It prevents corruption of data by radio interference.
- C. It recovers data lost during transmission between buildings.
- D. It protects confidential or proprietary data transmitted over WLAN via radio signal.

Answer: D

10. What are four unique features that apply to the Cisco Aironet 1200 Access Points (APs)? (Choose four.)

- A. inline power
- B. the mini-PCI will support 802.11a
- C. the CardBus radio will support 802.11a
- D. plenum-rated enclosure
- E. dual-cell service area (DSA)
- F. 100 mW output power on the 802.11b radio

Answer: ABCD
