

## [Adobe 9A0-310](#)

**Exam Name:** Adobe Flex 2 Developer Exam

**Q & A :** 134 Q&As

**Pdf Demo**

### **Quality and Value for the 9A0-310 Exam**

[Just4Exams Practice Exams](#) for Adobe Photoshop 9A0-310 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

### **100% Guarantee to Pass Your 9A0-310 Exam**

If you do not pass the Photoshop 9A0-310 exam on your first attempt using our Just4Exams **9A0-310 testing engine and pdf study guide**, we will give you a FULL REFUND of your purchasing fee.

### **Downloadable, Interactive 9A0-310 Testing engines and PDF Version**

Our Exam Preparation Material provides you everything you will need to take a [Photoshop certification](#) examination. Details are researched and produced by [Adobe Certification](#) Experts who are constantly using industry experience to produce precise, and logical.

Exam : ADOBE 9A0-310

Title : Adobe Flex2 Developer Exam

1. Which is contained in a .jar file?

- A. XML data files in an archived format
- B. the Java Virtual Machine used in a J2EE server
- C. a set of pre-compiled Java classes in an archived format
- D. all configuration and application files in a J2EE web application in an archived format

Answer: C

2. Click the Exhibit button. Which ActionScript class definition represents the UML class diagram?

- A. class Employee {

```
private var empName:String;
public function CalcSalary():int {
...
}
```

```
B. class Employee {
public var empName:String;
private function CalcSalary():int {
...
}
```

```
C. class Employee {
private var empName:String;
protected function CalcSalary():int {
...
}
```

```
D. class Employee {
public var empName:String;
protected function CalcSalary():int {
...
}
```

Answer: A

3. Which software design pattern reduces method call volume by encapsulating multiple data attributes in a single object?

- A. Factory
- B. Singleton
- C. Assembler
- D. Transfer Object
- E. Data Access Object

Answer: D

4. Which Data Management Service method will reset an item to its previous state?

- A. undo()
- B. rollBack()
- C. noCommit()
- D. revertChanges()

Answer: D

5. Which statement about the dispatchEvent() method is true?

- A. It automatically dispatches an event object.
- B. It can only be used with the Application class.
- C. It can be used for both custom and other events.
- D. It returns the type property value of the event object.

Answer: C

6. Which statement best defines event bubbling?

- A. Event bubbling is NOT supported in ActionScript 3.0
- B. The event flows from the top of the display list hierarchy to the node just before the target node
- C. The event flows from the node subsequent to the target node back up the display list hierarchy
- D. The event flows from the top of the display list hierarchy to the target node

Answer: C

7. Which Flex 2 language feature provides the best support for loose coupling between MXML components?

- A. class inheritance
- B. singleton classes
- C. event dispatching
- D. remote object services

Answer: C

8. A Flex application contains a custom event object eventObj:

```
var eventObj:Event = new Event(myCustomEvent);
```

Which line of code correctly triggers this event?

- A. eventObj.dispatch();

- B. dispatchEvent(eventObj);
- C. eventObj.dispatchEvent();
- D. dispatchEvent(eventObj);

Answer: B

9. Which attribute prevents a class method from being visible within a sub-class?

- A. public
- B. internal
- C. private
- D. protected

Answer: C

10. Given the following code snippet:

Which value would be traced to the console?

- A. FRED
- B. Fred
- C. Fred Friendly
- D. An error or strict-mode warning would occur

Answer: B

11. Which protocol supports the use of server-pushed messaging with the Flex Message Service and the Data Management Service?

- A. AMF
- B. HTTP
- C. SOAP
- D. RTMP

Answer: D

12. Which development task would most likely be part of building loosely coupled MXML components?

- A. invoking the dispatchEvent() method
- B. assigning a reference to the owner property
- C. extending the flash.events.Dispatcher class
- D. implementing the IFlexDisplayObject interface

Answer: A

13. Which design pattern is followed by an ActionScript class that uses the [RemoteClass] metatag?

- A. Singleton
- B. Assembler
- C. Data Access Object
- D. Data Transfer Object

Answer: D

14. Click the Exhibit button.

What is the relationship between the two classes in the UML diagram?

- A. Shape extends Circle
- B. Circle extends Shape
- C. Shape implements Circle
- D. Circle implements Shape

Answer: B

15. Which property of the HTTPService class references the data returned from a request?

- A. result
- B. lastResult
- C. destination
- D. resultFormat

Answer: B

16. You have used a WebService object to call a public method of a SOAP-based web service. The remote web service is written in Java.

The signature of the Java method being called is:

```
public List getData()
```

You have declared an ActionScript method named resultHandler() with this signature:

```
private function resultHandler(event:ResultEvent):void
```

When the resultHandler() method is called from the HTTPService object result event, you want to save the returned data to a previously declared ArrayCollection named myCollection.

Which is the correct syntax?

- A. myCollection = event.result;
- B. myCollection = event.result as ArrayCollection;
- C. myCollection = new ArrayCollection(event.result as Array);
- D. myCollection = event.getData.lastResult as ArrayCollection;

Answer: B

17. You want to send custom data with an event object that has been generated by the framework. What should you do?

- A. Add custom properties to the target property.
- B. Subclass the Event class and add properties to it.
- C. Subclass the DisplayObject class and add properties to it.
- D. Add custom properties to the Flash.events.Event class.

Answer: B

18. Which statement best describes the Model-View-Controller design pattern?

- A. It does NOT promote code reuse
- B. Alternative user interfaces are difficult to add
- C. It combines the code responding to user input with the code rendering the interface
- D. It promotes maintainability by providing separation of concerns within code

Answer: D

19. Which object is the returned XML data placed into after a Web service operation executes?

- A. result
- B. collection
- C. firstResult
- D. lastResult

Answer: D

20. You have used an HTTPService object to retrieve this HTML file:

```
<?xml version=1.0?> <employees>
<employee><name>Joe</name><job>President</job>
</employee>
<employee><name>Mary</name><job>CEO</job>
</employee></employees>
```

The resultFormat property of the HTTPService object is set to object, and the id property is set to myService. You want to use a DataGrid control to display the list of employees.

Which is the correct syntax for a binding expression to pass the employee objects to the dataProvider property of the DataGrid?

- A. dataProvider={myService.lastResult}
- B. dataProvider={myService.lastResult.employees}
- C. dataProvider={myService.result.employees.employee}
- D. dataProvider={myService.lastResult.employees.employee}

Answer: D
