Exam : Apple 9L0-614

Title : Mac OS X Server Command Line Install and Configuration v10.4

1. You are creating a file to import users into your directory. Your file's format, including the types of data imported and the order of the data fields, is defined in _____.

- A. LDIFv3
- B. RFC2307
- C. the Server Admin Guide
- D. the first line of your file

Answer: D

2. You are using the command-line installer to install PretendCoTools.pkg. You want to install it on a non-boot volume mounted on a

server. Which command will help you determine whether the package supports installation on that volume?

- A. `hdiutil verify PretendCoTools.pkg`
- B. `installer -volinfo -pkg PretendCoTools.pkg`
- C. `lsbom PretendCoTools.pkg/Contents/Archive.bom`
- D. `cat PretendCoTools.pkg/Contents/Resources/preflight`

Answer: B

3. You want to update the software on a headless Xserve over an SSH connection to the server, but one of the component installers has a graphical element that displays a splash screen. How can you prevent the installer from launching this graphical element?

- A. Run `softwareupdate` with the `-headless` option.
- B. Set the environment variable `COMMAND_LINE_INSTALL` to 1.
- C. Use `SystemStarter` to start the `HeadlessStartup` startup item.
- D. Download the updates with `softwareupdate -d`, then install them with `installer -noGUI`.

Answer: B

4. Which TWO of these can you use as naming schemes to store an automatic configuration record in Open Directory? (Choose TWO.)

- A. Volume UUID
- B. DHCP Client ID
- C. `AutoServerSetup.plist`
- D. Hardware serial number
- E. FQDN (Fully Qualified Domain Name)

Answer: DE

5. You want to use the built-in software RAID in Mac OS X Server to create a RAID 1 set across two disks in an Xserve. Which command will accomplish this goal?

- A. `megaraid create R1 -drive 0 1 -stripesize 64`
- B. `diskutil createRAID mirror RAID_Volume HFS+ disk0 disk1`
- C. `diskutil createRAID stripe RAID_Volume HFS+ disk0 disk1`
- D. `diskutil createRAID stripe-distributed-parity RAID_Volume HFS+ disk0 disk1`

Answer: B

6. Where are records for share points stored?

- A. in `/etc/afpd.conf`
- B. in `/etc/aftovertcp.cfg`
- C. in the local NetInfo database
- D. in the LDAP database of the Open Directory Master

Answer: C

7. You configured your Mac OS X Server computers with IPv6 turned off for security reasons. Now your company is migrating its infrastructure to IPv6. Which command can you use to configure IPv6 on these Mac OS X Servers?

- A. `pmset`
- B. `scutil`
- C. `systemsetup`
- D. `serversetup`
- E. `networksetup`

Answer: E

8. Which statement is true of Server Admin's default SSL configuration?

- A. Each server has a unique, self-signed certificate.
- B. SSL is disabled because no valid certificates are pre-installed.
- C. Each server has a unique certificate signed by Apple's Certificate Authority.
- D. All servers use the identical, pre-installed certificate signed by Apple's Certificate Authority.

Answer: A

9. Server Admin typically sends commands to `servermgrd` using _____.

- A. SSH
- B. SNMP
- C. XML over HTTPS
- D. an Apple-proprietary data stream over HTTP

Answer: C

10. Certain tools must be used to configure a Mac OS X Server computer from the command line. Other tools are optional. Which tool below is optional when configuring Mac OS X Server from the command line?

- A. ifconfig
- B. serversetup
- C. networksetup

Answer: A

11. A new Xserve is booted from the Mac OS X Server v10.4 installation disc. Which password will let you connect to the Xserve remotely?

- A. the sequence of characters, "PASSWORD"
- B. the first eight characters of the Xserve serial number
- C. the first eight characters of the Xserve Ethernet MAC address
- D. the first eight characters of the Mac OS X Server software serial number

Answer: B

12. You are deploying several Macintosh servers on a Windows network. The Macintosh servers cannot establish a link to the Ethernet network, but the Windows machines can. Which of these steps is MOST LIKELY to fix this issue?

- A. Turn off portfast on the switch.
- B. Turn off portfast on the Macintosh servers.
- C. Modify the duplex setting on the Macintosh servers.
- D. Use ifconfig to configure static IP addresses for the Macintosh servers.

Answer: C

13. You want to enable secure connections to your AFP service. Which command can you use to do so?

- A. `sudo serveradmin settings afp:SSHTunnel = yes`
- B. `sudo serveradmin command afp:setSSHTunnel:yes`
- C. `sudo networksetup -CreateBond afp:SSHTunnel`
- D. `sudo networksetup settings -setappletalk "Built-in Ethernet" = SSH`

Answer: A

14. Which command-line tool can help you identify the configuration file that is written to when you change an option from the graphical interface?

- A. ps
- B. otool
- C. tcpdump
- D. fs_usage
- E. netstat -a

Answer: D

15. What does the command below do?

`sharing -a /Users`

- A. Makes the /Users directory a share point.
- B. Lists all share points in the /Users directory.
- C. Appends permissions to the Users share point.
- D. Shows all users currently connected to the Users share point.

Answer: A
