Quality and Value for the HP0-083 Exam

[Just4Exams Practice Exams](#) for HP Certification III HP0-083 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

100% Guarantee to Pass Your HP0-083 Exam

If you do not pass the Certification III HP0-083 exam on your first attempt using our Just4Exams *HP0-083 testing engine and pdf study guide*, we will give you a FULL REFUND of your purchasing fee.

Downloadable, Interactive HP0-083 Testing engines and PDF Version

Our Exam Preparation Material provides you everything you will need to take a [Certification III certification](#) examination. Details are researched and produced by [HP Certification](#) Experts who are constantly using industry experience to produce precise, and logical.

Exam : HP HP0-083

Title : OpenVMS Network Administration

1. Which protocol does GateD use to advertise routes?

- A. ARP
- B. ICMP
- C. OSPF
- D. ESNMP

Answer: C

2. A netstat -r command on node 16.1138.25 displays the following information:

Routing tables

Destination Gateway Flags Refs Use Interface

Route Tree for Protocol Family 26:

Route Tree for Protocol Family 2:

default 16.112.128.1 UGS 2 94624 WE0

16.112.128 belize U 1 48405 WE0

belize belize UHL 0 0 WE0

LOCALHOST LOCALHOST UHL 49 13939757 LO0

16.10.121.2 16.112.128.3 UGHS 3 57536 WE0

Which route is used to ping node 16.3.12.47?

A. LOCALHOST

B. default

C. 16.112.128

D. 16.10.121.2

Answer: B

3. What is a function of ICMP?

A. sharing web pages between nodes

B. translating names to addresses

C. transporting and routing information

D. sharing IP status and error information

Answer: D

4. How many bits are in an IPv4 address?

A. 4

B. 8

C. 16

D. 32

E. 64

Answer: D

5. You need to present four names to an IP network. What is the minimal hardware configuration required?

A. one server with one NIC

B. one server with four NICs

C. two servers with two NICs each

D. four servers with one NIC each

Answer: A

6. What is the function of the ARP protocol?

A. to resolve IP addresses to MAC addresses

B. to resolve service names to port assignments

C. to ensure quality of service (QoS) for a connection

D. to determine the shortest path between two IP nodes

Answer: A

7. Which types of routing can you set up on an OpenVMS system? Select TWO.

A. fixed

B. static

C. flexible

D. adaptive

E. dynamic

Answer: BE

8. What advantage do TCP broadcast packets have over UDP broadcast packets?

A. They can be routed.

B. They are better compressed.

C. They have a shorter round trip time.

D. They implement a one to many message.

Answer: A

9. What is a similarity between TCPIP proxy and DECnet proxy?

A. both use the same proxy database

- B. both allow remote users anonymous access
- C. both use AUTHORIZE to manage their database
- D. both allow remote users to transparently access files

Answer: D

10. What happens if the "Retransmit Threshold" of the OSI transport is exceeded?

- A. server process exits
- B. connection is dropped
- C. DECnet hangs
- D. system shuts down

Answer: B

11. 66.96.0 255.255.255.192

- A. 62
- B. 64
- C. 191
- D. 192
- E. 254

Answer: A

12. How many hosts can be configured using the IP network and subnet mask shown below?

10.66.96.0 255.255.255.192

- A. 62
- B. 64
- C. 191
- D. 192
- E. 254

Answer: A

13. Which technique can you apply to connect two network segments with nodes having the same addresses?

- A. Active Directory
- B. Domain Name System
- C. Network Address Translation
- D. Dynamic Host Configuration Protocol

Answer: C

14. A customer requires that users can establish interactive sessions across the network, but they will NOT allow passwords to be sent in the clear. What can you use to satisfy this dual requirement?

- A. RSH
- B. SSH
- C. RLOGIN
- D. SET HOST

Answer: B

15. What is a function of TCP/IP?

- A. monitoring all pseudo devices
- B. ensuring that network servers are running
- C. maintaining the routing table
- D. listening for and dispatching incoming connections

Answer: D

16. You have a system with three network adapters. How would you benefit from having two adapters on the same subnet?

- A. network connectivity failover
- B. load balancing of MOP traffic
- C. route two networks through OpenVMS system
- D. allows the system to use one adapter for send and the other for receive

Answer: A

17. Which DECnet configuration files need to be kept synchronized in an OpenVMS cluster? Select TWO.

- A. NETOBJECT.DAT
- B. NET\$MANAGE.DAT

- C. NET\$SECURITY.DAT
- D. NETNODE_LOCAL.DAT
- E. NETPROXY.DAT/NET\$PROXY.DAT

Answer: AE

18. What do you do to preserve site-specific parameter settings and commands for a specific TCPIP service?

- A. Edit SYS\$SYSTARTUP:TCPIP\$SYSTARTUP.COM.
- B. Edit SYS\$SYSTEM:TCPIP\$SYSTARTUP.COM.
- C. Create files of the form SYS\$SYSTEM:TCPIP\$service_SYSTARTUP.COM.
- D. Create files of the form SYS\$STARTUP:TCPIP\$service_SYSTARTUP.COM.

Answer: D

19. How many bits are in an IPv6 address?

- A. 32
- B. 64
- C. 128
- D. 256

Answer: B

20. A user needs to run a TCP/IP application using an unprivileged account. Which port numbers are available for this?

- A. any free port above 511
- B. any free port above 1023
- C. any free port above 2047
- D. any free port above 4095

Answer: B
