Exam : HP HP0-084

Title : HP Integrity Server Multi-OS Installation & Deployment

1. Click the Exhibit button.

Which PCI slots in an Integrity rx4640 server have the lowest bandwidth?

- A. 3-6
- B. 2-3
- C. 1-4
- D. 5-6

Answer: A

2. Which EFI command provides information about the current state of the processors?

- A. sysmode cpu
- B. cpuconfig
- C. pdt cpu
- D. state cpu

Answer: B

3. You have limited access to the Management Processor (MP), but you have full access to the system Baseboard Management Console (BMC). Which command do you issue in the BMC Command Line Interface (CLI) to power off the system hardware?

- A. cli> p 0
- B. cli> rs 1
- C. cli> pc 0
- D. cli> loc 0

Answer: A

4. After restoring the operating system from a backup, what needs to be modified before an operating system can be launched?

- A. autoconfig file in EFI
- B. boot entries in the EFI
- C. all Master Boot Records (MBR)
- D. Master Boot Record (MBR) on fd0:
- E. operating system partition on the SAN

Answer: B

5. Which EFI command displays the speed and specification of the processors installed on an Integrity rx4640 server?

- A. cpuinfo
- B. procinfo
- C. cpuconfig
- D. cpuconfig all

Answer: C

6. You have to deploy an HP Integrity Support Pack to 40 Integrity servers running Windows Server 2003. What can you use to accomplish this task with the least amount of effort? (Select two.)

- A. Patch Management Pack (PMP)
- B. Extensible Firmware Interface (EFI)
- C. Systems Insight Manager (SIM)
- D. Version Control Repository Manager (VCRM)
- E. Management Processor/Integrated Lights Out (MP/iLO)

Answer: CD

7. Fault management events can be viewed directly on a server as they occur. Which HP tool aggregates information from multiple systems in the data center?

- A. Event Monitoring Service (EMS)
- B. Systems Insight Manager (HP SIM)
- C. Offline Diagnostics Environment (ODE)
- D. OpenView Storage Area Manager (OVSAM)

Answer: B

8. You need to optimize server utilization in real-time. Which solution provides this capability?

- A. HP OpenView Service Desk
- B. HP OpenView Performance Agent
- C. HP Virtual Server Environment (VSE)
- D. HP Systems Insight Manager (HP SIM)

Answer: C

9. What is one of the components used to manage highly available solutions offered by Virtual Server Environment (VSE)?

- A. HP-UX Process Tracker
- B. HP-UX Workload Manager
- C. HP OpenView Node Manager
- D. Performance Management Pack

Answer: B

10. An Integrity rx2620 server with Windows Server 2003 is running terminal services but has stopped responding. Which MP command do

you use to shut down gracefully and power off the server?

- A. rs -g
- B. pc -g
- C. rs -off
- D. pc -off

Answer: B

11. Which Management Processor (MP) command displays the physical location information of the system?

- A. SI
- B. ID
- C. FW
- D. SH ID

Answer: B

12. You are managing an Integrity rx2620 server that is located in a remote office. Which Management Processor (MP) console command do you use to gather the state of the system and LEDs?

- A. LED
- B. VFP
- C. ERRDUMP
- D. SYSSTAT

Answer: B

13. Which HP performance tools can be used on Integrity servers running HP-UX? (Select two.)

- A. HP Operations Agent
- B. HP OpenView GlancePlus
- C. HP Performance Monitor
- D. HP Performance Agent
- E. HP Availability Manager

Answer: BD

14. How do you shut down an Integrity server rx2620 running Microsoft Windows Server 2003 Enterprise Edition 64-bit for Itanium, when the Windows console and terminal services are not responding?

- A. Use the MP to issue a PC -OFF command.
- B. Use the MP to issue the MP shutdown command.
- C. Use the SAC console to issue a shutdown command.
- D. Press and hold the system power button until the system powers off.

Answer: C

15. You are updating the SCSI card in an Integrity server. Where can you find the EFI Utility and firmware files that you can use to update this SCSI card? (Select two.)

- A. the HP website
- B. HP-UX Patch DVD
- C. Firmware Maintenance DVD
- D. Offline Diagnostics and Utilities DVD
- E. HP Integrity Essentials Foundation Pack for Linux

Answer: AD

16. Which command do you use in the EFI Shell to verify that an Integrity rx4640 server has the latest firmware?

- A. sysrev
- B. ver fw
- C. info fw
- D. openinfo fw

Answer: C

17. How can you improve CPU performance on an Integrity rx1620 server that contains two 1.3GHz/3MB Level 3 cache processors?

- A. Add more memory on the system board.
- B. Add an additional processor to the system.
- C. Replace both 1.3GHz processors with Montecito modules.
- D. Replace both 1.3GHz processors with 1.6GHz processors.

Answer: D

18. You need to update the system firmware on an Integrity rx2620 server running Windows Server 2003. How could you perform the update? (Select two.)

- A. Boot from a created firmware CD media.
- B. Run the update.efi utility from the EFI Shell.
- C. Use the TFTP download option in the EFI Shell.
- D. Prepare a USB device with the required firmware files.
- E. Run FWUPDATE from the Microsoft Windows Server console command prompt.

Answer: AD

19. You want to load new firmware for the Management Processor (MP). Which command do you use to verify a proper connection to an FTP server?

- A. xd
- B. bin
- C. scp
- D. xu

Answer: A

20. Which capability does the Management Processor (MP) in the Integrity rx2620 server provide?

- A. offline hardware monitoring
- B. hardware administration and management
- C. remote HP-UX operating system installation
- D. remote monitoring of server room conditions

Answer: B
