Exam : HP HP0-091

Title : HP-UX System Administration

1. Which list includes only VxVM objects?

- A. diskdg, voldg, plex, cat_vol
- B. lvol, plex, subdisk, volumes
- C. vmdisk, subdisk, plex, volume
- D. mirror_disk, subdisk, rootdg

Answer: C

2. The default size of a physical extent in LVM is _____.

- A. twice the size of a logical extent

- B. the same size as the resident file system's disk block
- C. 1/1024 of the total volume size
- D. 1MB
- E. 2MB
- F. 4MB

Answer: F

3. A journaled file system intent log is used to _____.

- A. store user data prior to a physical write
- B. log meta data changes
- C. improve buffer cache performance
- D. provide an audit trail
- E. track mirror transactions

Answer: B

4. By default, where does the cpio command send its output?

- A. /tmp
- B. stdout
- C. cpio.out
- D. \$HOME

Answer: B

5. Which directory contains the HP-UX kernel?

- A. /stand
- B. /etc
- C. /var
- D. /kernel

Answer: A

6. What does the term available memory refer to?

- A. the amount of memory on the free list
- B. memory available for shared memory allocation
- C. the amount of memory available after the kernel has been loaded
- D. the total amount of memory that passes self-test prior to loading of the kernel

Answer: C

7. What do physical volume links (pv links) provide?

- A. access to a spare disk
- B. automatic load balancing
- C. an alternate path to a disk
- D. improved RAID performance

Answer: C

8. Which file permissions are indicated by the value of 721? Select TWO.

- A. read, write, and execute for owner
- B. read, write, and execute for group
- C. execute only for owner
- D. execute only for group
- E. write only for other
- F. write and execute for other
- G. write only for group

Answer: AG

9. Which additional features are provided by advanced VxVM?

- A. vea, multipathing, concatenated volumes
- B. disk group import/export, cabinet device numbers
- C. multipathing, non-root mirroring, RAID-5 stripping
- D. multipathing, advanced commands, root mirroring

Answer: C

10. When is the information in the VGRA loaded into kernel memory?

- A. as a result of running mount
- B. during volume group activation
- C. as a result of running vgscan
- D. during vgcfgrestore
- E. as a result of running vgsync

Answer: B

11. Which file is used to configure networking parameters such as hostname, IP address, and subnet mask?

- A. /etc/rc.config.d/ifconf
- B. /etc/rc.config.d/network
- C. /etc/rc.config.d/lanconf
- D. /etc/rc.config.d/netconf
- E. /etc/rc.config.d/ipconf

Answer: D

12. Which commands can be used to create device files? Select TWO.

- A. mkdevice
- B. insf
- C. fsadm
- D. mksf
- E. devstart

Answer: BD

13. How do you go to single-user mode on a booted system?

- A. init 0
- B. reboot
- C. shutdown
- D. shutdown -r

Answer: C

- A. extends a file system within a logical volume
- B. increases the size of active swap
- C. extends a logical volume across volume groups
- D. increases the size of a logical volume
- E. shares a logical volume with another system

Answer: D

15. As a non-root user, which command influences the priority that a process runs at?

- A. chmod
- B. pri
- C. usrpri
- D. nice

Answer: D

16. Which command shows all physical volumes in a volume group?

- A. vgdisplay
- B. pvdisplay
- C. lvdisplay
- D. lvmdisplay

Answer: A

17. Which main file contains the LVM configuration information?

- A. lvmrc
- B. lvmpeg
- C. lvmconf
- D. lvmtab
- E. lvminfo

Answer: D

18. What processor families run the HP-UX operating system? Select TWO.

- A. MIPS
 - B. Alpha
 - C. Itanium
 - D. SPARC
 - E. PA RISC
 - F. PowerPC
- Answer: CE

19. Which configuration file is used to determine the synchronization sources and operating modes of NTP?

- A. /etc/rc.config.d/netdaemons
- B. /etc/ntp.conf
- C. /etc/rc.config.d/ntpconf
- D. /etc/xntpd

Answer: B

20. What is Samba used as?

- A. a service to resolve names
- B. an alternate volume manager
- C. a DHCP service for HP-UX servers
- D. a service to emulate CIFS on a Unix server

Answer: D
