Quality and Value for the HP0-381 Exam

[Just4Exams Practice Exams](#) for HP Certification I HP0-381 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

100% Guarantee to Pass Your HP0-381 Exam

If you do not pass the Certification I HP0-381 exam on your first attempt using our Just4Exams **HP0-381 testing engine and pdf study guide**, we will give you a FULL REFUND of your purchasing fee.

Downloadable, Interactive HP0-381 Testing engines and PDF Version

Our Exam Preparation Material provides you everything you will need to take a [Certification I certification](#) examination. Details are researched and produced by [HP Certification](#) Experts who are constantly using industry experience to produce precise, and logical.

Exam : HP HP0-381

Title : Configuration & Management of HP Integrity Mid-range Servers

1. When evaluating a customer's needs, you determine that he has highly fluctuating processing requirements with a need between 14 to 20 processors. Which system do you advise him to acquire?

- A. the rx7620 with iCAP
- B. the rx8620 with iCAP
- C. the rx7620 with PPU
- D. the rx8620 with PPU

Answer: D

2. What is the disadvantage of software partitioning?

- A. You need a core I/O card for every soft partition.
- B. A critical hardware failure will affect all vPars within the affected nPar.
- C. You need an I/O extender for every soft partition.
- D. You need at least two bound CPUs per vPar.

Answer: B

3. An accounting firm is coming into its busiest season and requires performance tuning flexibility. Which primary software partitioning feature will benefit this customer?

- A. Virtual Partitioning (vPar) includes cell board Instant Capacity (iCap).
- B. There is no physical CPU needed to create a vPar.
- C. It is possible to create a vPar across different hardware partitions.
- D. Processors can be deleted from a running vPar and then added to another running vPar.

Answer: D

4. In HPUX 11i v2, which command displays the installed drivers and their major numbers?

- A. driver -d -v
- B. udrv
- C. lsdev
- D. display drivers

Answer: C

5. Which processor or processors does the HP sx1000 chipset support?

- A. PA-8800 and PA-8900 processors only
- B. Intel Itanium 2 processor only
- C. PA-8800, PA-8900, and Intel Itanium 2 processors
- D. PA-8800, PA-8700 and Intel Itanium 2 processors

Answer: C

6. Which statement about hardware partitioning is wrong?

- A. All CPUs within a partition must have the same architecture.
- B. To create a partition, you need more than one cell board.
- C. For every partition a core I/O card is needed.
- D. For more than two partitions on an rx86xx server, a System Extension Unit (SEU) is needed.

Answer: B

7. Which of the servers below are Itanium-based and have a maximum of four cells?

- A. rx7620
- B. rx8620
- C. rp7420
- D. rx4640

Answer: B

8. Once an nPar is created, how do you modify the partition?

- A. using Genesis Partition commands
- B. using Management Processor (MP) commands
- C. using Partition Manager commands
- D. using IPMI commands

Answer: C

9. How many echelons can be loaded on an rx8620 cell board?

- A. 16
- B. 8
- C. 4
- D. 2

Answer: B

10. The System Expansion Unit (SEU) enables which system upgrade when it is added to an rx8620 server?

- A. more processors
- B. expanded memory
- C. additional partitions

D. enhanced system power

Answer: C

11. Your customer wants to consolidate several existing servers in their data center. All of these servers are running different operating systems, such as HP-UX, Windows 2003 Data Center Edition, Linux and OpenVMS. What is the primary benefit of hardware partitioning?

- A. It is possible to have a backup of the node within the server.
- B. Several nodes can exist within one server.
- C. Hardware partitioning can improve the performance of a server.
- D. Allows for beta testing of software development.

Answer: B

12. When running a Linux 2.6 kernel on an Integrity server, what is the maximum number of CPUs supported per nPar?

- A. 4
- B. 8
- C. 16
- D. 32

Answer: C

13. What is an advantage of software partitioning on Integrity servers?

- A. You can use different types of CPUs on one cell board.
- B. There is not a single point of failure.
- C. There is no need for a hardware partition.
- D. You can build several vPars within a single cell nPar.

Answer: D

14. Which HP Integrity server models support the hardware partitioning (nPar) feature?

- A. entry-level and mid-range models
- B. high-end models only
- C. all models
- D. mid-range and high-end models

Answer: D

15. What is the maximum number of processor modules that can run in an rx7620 server?

- A. 4
- B. 8
- C. 16
- D. 32

Answer: B

16. Click the Exhibit button. You are using HP Systems Insight Manager console (HP SIM CMS). You notice one of the HP Integrity servers has a critical alert and you would like to access the system via remote management (MP). Where do you click to access the MP?

- A. SW icon for that server
- B. VMP icon for that server
- C. MP icon for that server
- D. VPM icon for that server
- E. HW icon for that server

Answer: C

17. For which operation is Integrity server system firmware NOT responsible?

- A. Cell rendezvous
- B. Cell-local memory
- C. PCI card hot-plug
- D. SAN fabric login

Answer: D

18. What is an advantage of hardware partitioning?

- A. There is only one core I/O card needed for all partitions.
- B. There can be several operating systems on one server.
- C. All partitions can share the DVD drive.
- D. There is no single point of failure.

Answer: B

19. Which tool is used to configure and order a mid-range Integrity server?

- A. Enterprise Configurator
- B. Electronic Sales Partner (ESP)
- C. SalesBuilder for Windows (SBW)
- D. Performance Quick Reference Tool (PQRT)

Answer: C

20. How many cells are required to create a single hardware partition?

- A. one
- B. two
- C. three
- D. four

Answer: A
