Exam : HP HP0-634

Title : NNM III (7.x) Advanced

1. What is the purpose of the ovet\_bridge process?

- A. to poll bridges and hubs
- B. to create seed files for ET Discovery
- C. to maintain the ET topology database
- D. to poll all nodes for connectivity information

Answer: B

2. What type of statistical information is available in the Polling/Analysis summary tab in NNM Home Base? Select TWO.

- A. nodes polled using SNMP

- B. nodes polled using ICMP
- C. interfaces polled using SNMP
- D. addresses polled using ICMP

Answer: CD

3. How can you configure syslog message patterns in an NNM standalone configuration?

- A. Create pattern configurations with setupSyslog.ovpl -config and deploy with ovsyslogcfg -deploy.
- B. Use NNM event configuration GUI to create syslog message pattern.
- C. Use OVO Management Console for configuration and deployment of syslog message pattern.
- D. Create pattern configurations with ovsyslogcfg and deploy with setupSyslog.ovpl -deploy.

Answer: D

4. Which files have to be created to configure an Overlapping IP Address Domain configuration? Select TWO.

- A. oad.seed
- B. private\_ip.conf
- C. dupip.seed
- D. ovdupip
- E. dupip.conf

Answer: CE

5. How can you start a PD probe on a Windows system?

- A. Switch to installation directory and run pdprobe.bat -start.
- B. Switch to installation directory and run pdcentral.ovpl -start.
- C. Open the services applet and start the Netpath service.
- D. Run ovstart pd from command line.

Answer: C

6. Acme has just acquired a new company and must add new users and network services. When would they reconfigure their ET Zone Configuration.

- A. to create or change a map filter
- B. to load new MIBs for your devices
- C. to activate SNMP Agents on managed nodes
- D. to manage existing nodes that were previously unmanaged

Answer: D

7. In NNM 01, a user reported that Status Polling tab is grayed out when selecting the menu Options -> Network Polling Configuration: IP/IPX, what can be the cause of this?

- A. The NNM process netmon is running behind on polling.
- B. The NNM process netmon is not running on the collection station.
- C. You are not logged in as root or Administrator on the system.
- D. Active Problem Analyzer is configured to monitor general IP nodes.

Answer: D

8. What is the best description of NNM Extended Topology recurring discovery?

- A. Recurring discovery updates discovered information between two discovery cycles.
- B. Recurring discovery updates data about the network continuously.
- C. Recurring discovery captures data about the network as it exists during a discovery cycle regardless of previously discovered information.
- D. Recurring discovery captures data about the network regarding previously discovered information.

Answer: C

9. What Information is leveraged from NNM to Extended Topology for discovery purposes? Select TWO.

- A. NNM IP address and hostname configuration
- B. PD Probe configuration information
- C. NNM SNMP community string information
- D. NNM Filter configuration
- E. NNM map configuration

Answer: AC

10. How would you determine how long an interface has been in the critical status in Neighbor Views?

- A. Select the interface and then select the menu Fault -> Alarms.

- B. Right-click on the node and select Status.
- C. Right-click on the interface and select Status Poll.
- D. Place the cursor over the interface.

Answer: D

11. How do you start the Neighbor View from the Alarm Browser?

- A. Select Actions -> Views... -> Neighbor; or from the native Alarm Browser, select Actions -> Highlight Source On Map.
- B. Select Actions -> Views... -> Neighbor; but not possible from the native Alarm Browser.
- C. Double click on the selected alarm.
- D. Select Actions -> Views... -> Neighbor; or from the native Alarm Browser, select Actions -> Views -> Neighbor.

Answer: D

12. How do you print a large map onto multiple sheets of paper?

- A. Select File -> Poster Print Options..., then specify the number of rows and columns.
- B. Select a rectangular part of the graph and then select File -> Print Selected Area. Repeat the process for other parts of the graph.
- C. Use the Pan/View button and then move part of the graph into view and select File -> Print. Repeat the process for other parts of the graph.
- D. Select File -> Grid Printing..., then specify the number of rows and columns.

Answer: A

13. The default popup menu on a selected node in the Dynamic Views allows you to \_\_\_\_\_. Select TWO.

- A. telnet to the node
- B. change the status of the node
- C. start a SSH session to the node
- D. perform trace route to the node
- E. view the alarms for that node

Select TWO.

Answer: AD

14. What are valid HSRP Group statuses in the HSRP view? Select TWO.

- A. major
- B. down
- C. standby
- D. unknown
- E. active

Answer: AD

15. The status of devices in Overlapping Address Domains are monitored by \_\_\_\_\_

- A. netmon
- B. ovet\_poll
- C. ovet\_oad
- D. ovet\_disco
- E. ovetpmd

Answer: B

16. What does the OSPF table display? Select TWO.

- A. OSPF Link cost
- B. router input and output statistics
- C. OSPF threshold alarms
- D. neighbor router name and ID

Answer: AD

17. How do you display long label names for devices on a map?

- A. In a Dynamic View, select View -> Labels -> Long Name.
- B. In ow, select View -> Labels -> Long Name.
- C. Use the -u option for the ipmap process.
- D. In a Dynamic View, right-click the device symbol and select Details.

Answer: A

18. Why would you rerun setupExtTopo.ovpl? Select TWO.

- A. to configure Extended Topology discovery to run every 6 hours

- B. to disable certain protocols for Extended Topology
- C. to enable certain protocols for Extended Topology
- D. to add new nodes to each Zone Configuration for Extended Topology
- E. to change SNMP Configuration for Extended Topology

Answer: BC

19. What does NNM Extended Topology discover?

- A. ATM Information
- B. new devices using Layer 2 MIBs and protocols
- C. Layer 4 connections between devices
- D. new devices using VLAN information

Answer: A

20. What is the purpose of the ovet agents?

- A. to expand the functionality of managed devices
- B. to have device specific knowledge and send the information to ovet\_disco
- C. to poll the devices continuously for changes
- D. to expand the functionality of netmon for polling devices

Answer: B
