- E. java
- F. user

Answer: ADF

3. Which file must you edit to enable Data Protector internal database transaction logging?

- A. omnirc.TMPL
- B. velocis.ini
- C. obrindex.dat
- D. global file

Answer: B

4. Which CLI command scans specified Data Protector clients and gathers information on SCSI addresses of drives and robotic controllers connected to the clients in a SAN environment?

- A. uma
- B. omnisan
- C. sanconfig
- D. omniconfigsan

Answer: C

5. How many Data Protector cells can be managed by a single Manager-of-Managers?

- A. 25
- B. 50
- C. 100
- D. 1000

Answer: B

6. What is the result of a successful backup session using object mirroring?

- A. All backups and mirrored objects are appended to the same media.
- B. Mirrored objects are written to a special mirror pool and the backup is written to the specified media set.
- C. All backups and mirrored objects are in the same media pool.
- D. One media set contains the backup and additional media sets contain the mirrored objects.

Answer: D

7. By default, which file is the Data Protector Database recovery file?

- A. obdb.dat
- B. obrindex.dat
- C. obdatafiles.dat
- D. obdbrecovery.dat

Answer: B

8. Which section of the backup specification contains the information about the backup target drives?

- A. objects
- B. devices
- C. media pools
- D. backup types

Answer: B

9. The default installation of Data Protector includes an automatic database purge. This happens daily at what time?

- A. 00:00
- B. 12:00
- C. 15:00
- D. 22:00

Answer: B

10. What happens to shared logical devices in a SAN environment when you upgrade Data Protector to version 5.5?

- A. Shared logical devices must be deleted prior to the upgrade and then reconfigured as multipath devices.

- B. Shared logical devices are not reconfigured during the upgrade and can be used as before or reconfigured as multipath devices.
- C. Shared logical devices are deleted during the upgrade and must be reconfigured as multipath devices.
- D. Shared logical devices are automatically reconfigured as multipath devices during the upgrade.

Answer: B
