Exam : HP HP0-703

Title : Tru64 UNIX V5 Network Administration

1. Which function does the point-to-point protocol (PPP) perform?

- A. checking point-to-point connections on a LAN
- B. transmitting datagrams over serial point-to-point links
- C. updating point-to-point routing tables
- D. changing the routes that systems take between two points

Answer: B

2. Which problem causes TELNET or FTP addresses outside the local LAN to time out?

- A. the default route is incorrect

- B. the default route is undefined
- C. telnetd and ftpd on the local system are not running
- D. routed is looping

Answer: A

3. What action is needed to cause a Tru64 UNIX system to forward traffic between networks when it has multiple interfaces on different subnets?

- A. No action required, because Tru64 UNIX always functions as a router.
- B. Set SysMan to run the system as an IP router.
- C. Add the appropriate routes to the /etc/routes file.
- D. Configure the routes to point to this Tru64 UNIX system.

Answer: B

4. Which program is needed when working with OSPF routing protocol?

- A. named
- B. BIND
- C. routed
- D. gated

Answer: D

5. Which mail configuration file can you distribute using NIS?

- A. mailrc
- B. aliases
- C. mail.conf
- D. sendmail.cf

Answer: B

6. The netstat -I tu0 -s command displays excessive collisions and send failures. Which IP layer captures information about these errors?

- A. Internet
- B. Transport
- C. Application
- D. Network Interface

Answer: D

7. What does this entry in gated.conf mean?

```
# rip yes ;{nobroadcast ;};  
#
```

- A. gated listens for rip updates and sends them out
- B. gated behaves like routed -q
- C. gated runs once, listens for routes and terminates
- D. gated fails because the shell is not defined

Answer: B

8. Which protocol does gated use to advertise routes?

- A. ARP
- B. RIP
- C. TFTP
- D. ICMP

Answer: B

9. What is the function of inetd?

- A. Monitors all the pseudo devices.
- B. Ensures the network servers are running.
- C. Maintains the link IDs on all current connections.
- D. Listens for incoming connections and dispatches the service based on the port number.

Answer: D

10. The command route delete default 1.2.3.4 returns the following message:

```
writing to routing socket: No such process  
delete net default: gateway 1.2.3.4: not in table
```

What does the message indicate?

- A. The default gateway address is not 1.2.3.4.
- B. The default is in the permanent cache.
- C. You do not have permission to delete the route.
- D. The route daemon is not running.

Answer: A

11. A campus network has a subnet of 255.255.255.224. Which hosts are in the same subnet?

- Host A 10.1.20.33/27
- Host B 10.1.20.31/27
- Host C 10.1.20.1/27
- Host D 10.1.20.49/27

- A. None
- B. B and C
- C. A, B, and C
- D. A, B, C, and D

Answer: B

12. What is the IP address range for Class A networks?

- A. 0-126
- B. 0-127
- C. 1-126
- D. 1-192

Answer: C

13. Which is TRUE about UDP?

- A. UDP is a connectionless protocol.
- B. UDP uses a three-way handshake.
- C. UDP enforces correct packet sequencing.
- D. UDP uses a sliding window for flow control.

Answer: A

14. What is an SNMP trap?

- A. an event sent to UDP port 162
- B. a message generated by the NMS
- C. an unsolicited event notifying the NMS of a change
- D. an application that sits and listens for incoming information

Answer: C

15. Which routing protocol interoperates with routed?

- A. HELLO
- B. RIP
- C. EGP
- D. BGP

Answer: B

16. Which type of host should not use routed?

- A. server
- B. workstation
- C. external gateway
- D. departmental router

Answer: C

17. What is the name of the collection of networks and gateways (including ARPANET, MILNET, and NSFnet) that use the TCP/IP protocol suite and function as a single, cooperative virtual network?

- A. Intranet
- B. Internet
- C. World Wide Web
- D. NIC

Answer: B

18. Which IP layer is responsible for moving frames over the wire? Click the Exhibit button to access the graphic.

- A. Application
- B. Transport
- C. Internet
- D. Network Interface

Answer: D

19. Which transport protocol or protocols does NFS use?

- A. TCP or UDP
- B. TCP only
- C. UDP only
- D. NFS

Answer: A

20. How many bits are in an IPv4 address?

- A. 8
- B. 16
- C. 32
- D. 64

Answer: C
