Exam : HP HP0-719

Title : OpenView Operations(7.x)- Windows

1. What information must be entered the first time you start the OVO for Windows management console?

- A. The OVO for Windows administrators or operators password
- B. The system name of the management console
- C. The system name of the management server
- D. The permanent license key

Answer: C

2. What method should be used to obtain information, (for example, version, installed patches, etc.), about the current OVO for Windows installation?

- A. use `vpstat`
- B. use OVO for Windows `-ver`
- C. use `opcwhat`
- D. use `ovstatus`

Answer: A

3. Which of the following tasks CANNOT be done in the Web Console?

- A. Launch Tools
- B. Launch Operator initiated commands
- C. Change message severity
- D. Acknowledge messages
- E. Add Annotations

Answer: A

4. Choose the TRUE statement regarding the automatic deployment of the OVO for Windows agent to a UNIX node.

- A. This is default behavior when you add a node using the Node Configuration Editor.
- B. You enter the root password when you add the node in the Node Configuration Editor.
- C. You drag-and-drop the operations Agent package to the node and enter the root password.
- D. You check the Auto-Deploy to Node box in the General tab of the Node Properties dialog box.
- E. The agent CANNOT be automatically deployed.

Answer: E

5. Which two of the following are visual indicators that the OVO for Windows 7.x management server has been successfully installed?

Choose 2 that apply.

- A. An OVO for Windows Console shortcut on the Windows Desktop
- B. An HP OpenView folder added to the Windows Start Menu
- C. An OVO for Windows subdirectory under Program Files
- D. A Hewlett-Packard subdirectory under Winnt
- E. An MS SQL Server icon in the Windows system tray

Answer: BE

6. You have 30 rules in one policy. How can you set the same message key in the outgoing messages for all the rules that have already been created? Choose 2 that apply.

- A. Select all 30 rules. Choose modify and outgoing message and overwrite the message key field.
- B. Change the message key field in each of the 30 rules separately.
- C. Choose message defaults Enter a message key in the message key field. This overwrites the current message key of each rule.
- D. If the message key was NOT already set, choose message defaults Enter a message key in the message key field. This will be applied for all rules that have NOT set the message key field themselves.

Answer: BD

7. How should you download the node configuration and upload it on another Operations for Windows management server?

- A. That is NOT possible.
- B. use `ovpmutil / ovpmutil`
- C. use `ovpmutil / opctempl`
- D. use `opc_cfgdwn / opc_cfgupl`
- E. use `ovpmutil / mofcomp`

Answer: B

8. In order to add metrics to a graph configuration, what information must you provide before selecting the new metrics?

- A. Type
- B. Date Range
- C. Data Interval
- D. Source

Answer: D

9. If you have created a service hierarchy that you want to export from one OVO for Windows management server and import to another OVO for Windows management server, what tool should be used?

- A. `ovpmutil.exe`
- B. `opccfgdnl.exe`
- C. `opcsvc.exe`
- D. `update.exe`

Answer: A

10. You configure a node folder. Which of the following can you associate with a node folder in the folder properties dialog?

- A. Individual Tools
- B. Individual Graphs
- C. Individual Reports
- D. Individual Policies

Answer: A
