Exam : HP HP0-742

Title : OpenView Storage Area Manager Fundamentals

1. Which two levels of device status are reported for devices without full Device Plug-Ins (DPis) support? (Choose two.)

- A. Critical
- B. Normal
- C. Warning
- D. Unknown/Unreachable

Answer: BD

2. The host is found during discovery. With HP OpenView Storage Optimizer there is no host-based performance data present. Which two troubleshooting steps should be taken? (Choose two.)

- A. make sure performance collection is enabled for the host
- B. make sure the Device Plug-In (DPI) Core Class script has been run
- C. stop and restart the OpenView Storage Area Manager Host Agent services
- D. make sure Measureware/OpenView Performance Agent is properly configured and running

Answer: AD

3. Which four HP OpenView applications have pre-defined integrations with HP OpenView Storage Area Manager? (Choose four.)

- A. Reporter
- B. OmniBack
- C. Operations
- D. Service Desk
- E. Data Protector
- F. Network Node Manager
- G. Internet Usage Manager

Answer: ACDG

4. Which file can be edited to specify the location of the SOLID Server database?

- A. solid.ini
- B. solid.cfg
- C. SanManager.ini
- D. SanManager.cfg

Answer: A

5. HP OpenView Storage Optimizer allows you to specify how often ____.

- A. hourly values will be kept before they are summarized into daily values
- B. daily values will be kept before they are summarized into weekly values
- C. weekly values will be kept before they are summarized into monthly values
- D. monthly values will be kept before they are summarized into annual values

Answer: A

6. To which three file formats can HP OpenView Storage Accountant customer billing information be exported? (Choose three.)

- A. .txt
- B. .csv
- C. .xml
- D. .doc
- E. .html

Answer: BCE

7. Which two statements are true about baselines in HP OpenView Storage Optimizer? (Choose two.)

- A. They are displayed by default on all charts.
- B. They must be manually enabled for each metric.
- C. They must be manually enabled for each device.
- D. They are required for performance thresholds to be set.

Answer: CD

8. The LUN Price/GB/Hour is the amount, in dollars, charged to the customer after the _____. (Choose three.)

- A. service level has been created
- B. LUN has been assigned to a user
- C. LUN has been assigned to a server
- D. LUN has been assigned to an account
- E. LUN has been added to the service level
- F. user has been assigned to the organization

Answer: ADE

9. Which two HP OpenView Storage Area Network Host Agent components are involved in storage device discovery? (Choose two.)

- A. DIAL
- B. CLUI server
- C. SCSI gateway
- D. SNIA HBA gateway

Answer: AC

10. Once an HP OpenView Storage Optimizer custom performance chart has been created, it becomes available for _____.

- A. any supported devices of the same model
- B. any supported device of the same device type
- C. any organization that includes devices of the same model
- D. any device supported by HP OpenView Storage Optimizer

Answer: B

11. The HP OpenView Storage Area Manager Bridge is _____.

- A. an integration module for storage Host Agents
- B. developed for external collection of host services
- C. provided as a point of integration for external applications
- D. part of the HP OpenView Storage Area Manager core enabling management server to Host Agent communications

Answer: C

12. With the use of the Software Development Kit (SDK), any device vendor can create a _____ that enables previously unsupported devices to be monitored by HP OpenView Storage Optimizer.

- A. script
- B. trigger
- C. property file
- D. Device Plug-In (DPI)

Answer: D

13. Proper installation of a Device Plug-In (DPI) requires stopping and restarting which service?

- A. HP OpenView SAM Bridge
- B. HP OpenView SAM HostAgent
- C. HP OpenView SAM Embedded DB
- D. HP OpenView SAM ManagementServer

Answer: D

14. What does the Device Discovery and Topology (DDT) component do? (Choose two.)

- A. stores device and topology data in a log file
- B. sends alerts based on topology map changes
- C. uses SNMP to discover IP-based storage elements
- D. uses DIAL on the SAN hosts to discovery in-band storage elements

Answer: CD

15. After the HP OpenView Storage Area Manager Bridge is reconfigured, _____.

- A. the bridge service must be restarted
- B. the service files are updated automatically
- C. the bridge Device Plug-In (DPI) must be re-deployed
- D. the bridge and Host Agent services must be restarted

Answer: A

16. HP OpenView Storage Area Manager discovers devices through _____. (Choose two.)

- A. DIAL on the SAN hosts
- B. SNMP from the SAN hosts
- C. DIAL on the management server
- D. SNMP from the management server
- E. API queries to the fibre channel infrastructure devices

Answer: AD

17. The Host Agent runs on each host connected to the SAN and communicates to the management server via _____.

- A. RMI
- B. RPC
- C. JDBC
- D. SNMP

Answer: A

18. The charge associated with a billing cycle is dependent on the event period and the _____. (Choose two.)

- A. size of the LUN
- B. utilization of the LUN

- C. last time the LUN was accessed
- D. length of time the LUN is assigned to the account

Answer: AD

19. Why is it important to make sure that LUNs are physically and logically accessible to an organization by adding them to an account?

- A. The LUNs will not show up as assigned.
- B. LUNs will be removed from the pool of available resources.
- C. Organizations can be charged for LUNs that they cannot use.
- D. Usage information will be collected and no organization will be charged.

Answer: C

20. What is required before LUNs can be attached to an account?

- A. They must have a service level.
- B. They must be viewable in the LUN pool.
- C. They must have a defined security level.
- D. They must be assigned to an organization.

Answer: A
