Exam : HP HP0-922

Title : Implementing & Supporting HP Storage Essentials v5.1

1. Which component ensures HP Systems Insight Manager/Storage Essentials synchronization?

- A. CIMOM
- B. connector
- C. SMI-S interface
- D. dedicated transaction manager

Answer: B

2. What is a characteristic of HP Systems Insight Manager with regard to open system management platform design?

- A. It may be extended by using third party plug-ins.

- B. It is licensed for exclusive use with HP components.
- C. It supports only HP platforms, whereas any platform integrates with HP OpenView.
- D. It primarily uses SNMP to contact devices; other connection methods are optional and must be purchased.

Answer: A

3. What is a recommended prerequisite for a hardware or software product to become HP Storage Essentials compliant?

- A. Fibre Channel support
- B. Windows 2000 or 2003 server platform
- C. HP Systems Insight Manager compatibility
- D. Storage Network Industry Association conformance

Answer: D

4. What is a provisioning method available in HP Storage Essentials v5.x?

- A. single-action, single-element - occurs in real time and cannot be scheduled
- B. SAN based - shows which hosts have allocated storage in a SAN and can be scheduled
- C. multi-action, host based - shows all current pools allocated by hosts and cannot be scheduled
- D. storage based - shows how many hosts have allocated capacity on a storage system and can be scheduled

Answer: A

5. Which services can be used by managed devices to send alerts to the management server? (Select three.)

- A. Ping
- B. FTP
- C. SMI-S
- D. SMTP
- E. SNMP
- F. WBEM/DMI

Answer: CEF

6. What extends HP Systems Insight Manager with additional SAN management and monitoring functionality?

- A. entering a new license key
- B. installation of SMI-S providers
- C. the CIM extension on managed hosts
- D. a CIMOM client enabled on the storage system

Answer: B

7. Which activities can be monitored with Storage Essentials? (Select two.)

- A. storage growth planning
- B. disaster recovery planning
- C. storage network traffic sniffing
- D. domain user rights identification
- E. underutilized storage identification

Answer: AE

8. Which databases can be used by HP Systems Insight Manager? (Select two.)

- A. DB2
- B. Oracle
- C. Sybase
- D. PostgreSQL
- E. Microsoft SQL

Answer: BE

9. Which service must be stopped to allow the Database Admin utility to work?

- A. CIMService
- B. OraService
- C. CIMManager
- D. AppStorManager

Answer: D

10. Which infrastructure service is required on the central management server host to install Storage Essentials?

- A. CIM
- B. SNMP

- C. CIMOM
- D. SMI-S provider

Answer: B

11. Which Storage Essentials plug-in can be used to monitor a supported backup solution?

- A. dbAdmin utility
- B. Backup Manager
- C. RMAN backup manager
- D. Storage Essentials backup utility

Answer: B

12. What are steps of the HP Storage Essentials discovery process? (Select three.)

- A. Detail Scan: Scan for SAN topology, backup topology, and all available volumes.
- B. Unlock: At the end of the discovery, data flow in the storage network is re-enabled.
- C. Setup: Before the initial scan starts, an IP address or an IP address range must be specified.
- D. Topology Scan: On the second scan after initial scan, a tree shows all dependencies between devices.
- E. Hardware Scan: After the detail scan completes, a hardware scan identifies all available resources.
- F. License Scan: After the hardware scan completes, a scan identifies all licensed and unlicensed server applications.

Answer: ACD

13. Which security feature protects the intercommunication of HP Systems Insight Manager (SIM), its clients, and its users?

- A. Secure Shell based scripting is limited to UNIX platforms.
- B. HP-signed Secure Socket Layer certificates ensure authenticity.
- C. Secure Task Execution limits access from specific HP SIM servers.
- D. Secure Shell known_hosts files contain a list of discovered servers.

Answer: C

14. What are the two components of the connector?

- A. SE Database connector which connects both HP SIM and HP Storage Essentials to the database
- B. ODBC connector which connects HP SIM to HP Storage Essentials; HP SIM connector which connects HP Storage Essentials to HP SIM
- C. MySQL connector which connects HP SIM to HP Storage Essentials; HP SIM connector which connects HP Storage Essentials to HP SIM
- D. Storage Essentials connector which connects HP SIM to HP Storage Essentials; HP SIM connector which connects HP Storage Essentials to HP SIM

Answer: D

15. The security architecture of HP Systems Insight Manager (SIM) is designed to protect data and software functions from unauthorized access. What is a key feature of SIM security?

- A. built-in accounts
- B. preconfigured trusts
- C. role based associations
- D. proprietary transport protocols

Answer: C

16. Which statement about Storage Essentials Solution Service is correct?

- A. The product warranty is extended with Level 3.
- B. At least one level must be included in each quote.
- C. Storage Essentials is customer installable and all levels are optional.
- D. Software installation, configuration and testing are only included in Level 1.

Answer: B

17. What are optional HP Storage Essentials plug-ins? (Select three.)

- A. Policy Viewer
- B. Oracle Viewer
- C. Sybase Viewer
- D. Chargeback Manager
- E. Performance Manager
- F. Global Database Viewer

Answer: BCD

18. Which HP Storage Essentials features include direct attached storage? (Select two.)

- A. schedule of provisioning tasks
- B. display of ports in Performance Monitor
- C. display of connections in System Manager
- D. schedule of port performance data collection
- E. display of reachable ports in Path Provisioning

Answer: AC

19. Where will you find the HBA Test Utility?

- A. distributed with CIM extensions CD
- B. as an HP Storage Essentials CLI command
- C. in the Tools menus of HP Storage Essentials
- D. in the tools menu of HP Systems Insight Manager

Answer: A

20. HP Systems Insight Manager and HP Storage Essentials provide server and storage management through a central management platform. Which functions are included? (Select three.)

- A. integrated security
- B. storage array configuration
- C. array discovery and identification
- D. access to storage on unmanaged hosts
- E. assignment of a new management server
- F. speed modification on Fibre Channel connections

Answer: ABC
