Title : Implementing HP StorageWorks XP Disk Array Solutions

1. Which statements are true about the XP24000 cache? (Select three.)

- A. It supports duplexed reads.
- B. It supports duplexed writes.
- C. It is divided across two power domains.
- D. It is used for DKA control and command.
- E. It is a temporary storage area for data from the host prior to being written to disk.

Answer: BCE

2. Which statement is correct about Performance Advisor XP?

- A. It automatically tunes performance over a 24 hour period of time.
- B. It has the ability to set and relax host priorities by performance policies.
- C. It collects data on a real-time basis and displays current performance patterns.
- D. It allows for intelligent allocations of array resources for service-level oriented deployment.

Answer: C

3. Which statements are true about AutoLun XP? (Select two.)

- A. It provides on-line LUN expansion.
- B. It provides automatic or manual backend load leveling.
- C. It provides seamless failover in the event of cluster failures.
- D. It provides automatic path failover in the event of an HBA or CHA port failure.
- E. It provides for migration of data from RAID5 to RAID1 without host interruption.

Answer: BE

4. A customer wants to use the copy pair operations feature of HP StorageWorks Command View XP Advanced Edition. What is required? (Select two.)

- A. a host agent
- B. RAID Manager XP
- C. an external database
- D. at least 32GB of cache

Answer: AB

5. When must a customer use HP StorageWorks Command View XP Advanced Edition over Remote Web Console XP?

- A. simple LUN management
- B. CLI based array management
- C. Business Copy XP management
- D. centralized management of multiple XP arrays

Answer: D

6. Which XP array component transfers data between disk drives and cache memory?

- A. Disk Adapter (DKA)
- B. Shared Memory PCB
- C. Channel Adapter (CHA)
- D. Service Processor (SVP)

Answer: A

7. Where does the HP StorageWorks Command View XP Advanced Edition management server store configuration and statistics information?

- A. out on the individual host agents
- B. in shared memory of the XP array
- C. on the SVPs of each array subsystem
- D. in a local database on the management server

Answer: D

8. What is the back-end architecture of the XP24000?

- A. Ultra SCSI
- B. Serial ATA
- C. FC-AL 4Gb
- D. FC-SW 2Gb

Answer: C

9. Which statements are true when using the 16-port CHA pair, rather than the 8-port CHA pair? (Select two.)

- A. There is improved high availability functionality.
- B. There is improved front-end array performance.
- C. A maximum of two are supported per XP24000.
- D. Fibre Channel connectivity (port count) increases.
- E. The number of heterogeneous host types increases.
- F. Front-end array performance is typically not increased.

Answer: DF

10. Which additional features are added by HP StorageWorks Command View XP Advanced Edition over Remote Web Console XP?

(Select three.)

- A. array administration
- B. SNMP trap forwarding
- C. single sign-on user authentication
- D. logical grouping of storage capacity
- E. assignment of cache LUNs to hosts
- F. displaying host specific device information

Answer: CDF

11. Which software allows XP disk array resources to be allocated to hosts by setting performance limits?

- A. AutoLUN XP
- B. Command View XP
- C. Resource Manager XP
- D. Performance Control XP
- E. Performance Advisor XP

Answer: D

12. Which features offered through HP StorageWorks Command View XP Advanced Edition are not available with Remote Web Console XP? (Select two.)

- A. reporting
- B. cache partitioning
- C. SNMP trap forwarding
- D. TSM and Replication Monitor
- E. automation of BC/CA HORCM file creation

Answer: AE

13. A customer has a heterogeneous environment consisting of AIX and Solaris servers. Which software products can be used to implement an extended application failover solution? (Select two.)

- A. Metro Cluster
- B. ServiceGuard
- C. Cluster Extension XP
- D. Continuous Access XP
- E. LUN Security XP Extension

Answer: CD

14. A customer wants to manage their storage environment using HP Storage Essentials. Which XP device software tool is required to allow HP Storage Essentials to manage an XP24000 array?

- A. External Storage XP
- B. Remote Web Console XP
- C. LUN Configuration and Security Manager XP
- D. A separate software license is not required, as the capability is included in HP Storage Essentials

Answer: D

15. Which statements are true about the HP StorageWorks Command View XP Advanced Edition CLI? (Select two.)

- A. CLI cannot be used for license management.
- B. Input can be single line entries or scripted batch files.
- C. CLI is a separately licensed product with the XP24000.
- D. When installed, the CLI is executed from the SVP in the array.
- E. CLI is used if a text-based interface is preferred over the GUI or when it is more efficient to run scripts or batch files to manage XP disk arrays.

Answer: BE
