

## [HP HP0-J11](#)

**Exam Name:** *Replication Solutions for the HP StorageWorks EVA*

**Q & A :** 60 Q&As

***Pdf Demo***

### **Quality and Value for the HP0-J11 Exam**

[Just4Exams Practice Exams](#) for HP Certification I Certification III HP0-J11 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

### **100% Guarantee to Pass Your HP0-J11 Exam**

If you do not pass the Certification I Certification III HP0-J11 exam on your first attempt using our Just4Exams ***HP0-J11 testing engine and pdf study guide***, we will give you a FULL REFUND of your purchasing fee.

### **Downloadable, Interactive HP0-J11 Testing engines and PDF Version**

Our Exam Preparation Material provides you everything you will need to take a [Certification I certification Certification III certification](#) examination. Details are researched and produced by [HP Certification](#) Experts who are constantly using industry experience to produce precise, and logical.

Exam : HP HP0-J11

Title : Replication Solutions for the HP StorageWorks EVA

1. You are designing a Continuous Access EVA solution for a customer's environment containing an EVA3000 and a new EVA4000. Your customer wants to create snapshots of Vdisks which are members of a DR group. What is the maximum number of snapshots per DR group in this environment?

- A. 7
- B. 8
- C. 16
- D. 12

Answer: C

2. What is the Continuous Access EVA license based on?
- A. one license per storage array based on installed capacity
  - B. amount of replicated storage capacity of the source array
  - C. amount of replicated storage capacity of the destination array
  - D. amount of replicated storage capacity of source and destination arrays

Answer: D

3. What happens by default when a copy set is deleted?
- A. The source and destination Vdisks are destroyed.
  - B. The source and destination Vdisks are preserved.
  - C. Only the source Vdisk is preserved; the destination Vdisk is destroyed.
  - D. Only the destination Vdisk is preserved; the source Vdisk is destroyed.

Answer: B

4. How many mirrorclones can be created per source?

- A. 1
- B. 2
- C. 5
- D. 7

Answer: A

5. You are on a customer's site to perform a planned downtime. Which Continuous Access EVA entities can perform a fail-over? (Select two.)

- A. Copy set
- B. Disk Group
- C. Vdisk family
- D. Managed set
- E. Data replication group

Answer: DE

6. Click the Exhibit button.

Which types of multiple replication relationships are shown in the exhibit? (Select two.)

- A. fan-in
- B. fan-out
- C. cascaded
- D. bidirectional

Answer: AB

7. Which HP Warranty and Service is included in Continuous Access EVA by default?

- A. Three years HP Software Support 24x7
- B. One year HP Software Support 24x7
- C. Three years HP Software Support 13x5
- D. One year HP Software Support Next Business Day
- E. Three years HP Software Support Next Business Day

Answer: B

8. Click the Exhibit button.

Which licenses are required to build up a maximum cascaded Continuous Access EVA environment for 1.4 TB replicated VRAID5 data on 300GB disks using a single protection level?

- A. one RSM licenses, four CA 1TB license, six Command View EVA 1TB licenses
- B. two RSM licenses, six CA 1TB licenses, nine Command View EVA 1TB licenses
- C. four Business Copy 1TB licenses, four CA 1TB license, six Command View EVA 1TB licenses
- D. two Business Copy 1TB licenses, six CA 1TB licenses, nine Command View EVA 1TB licenses

Answer: D

9. What is the maximum distance configuration for Continuous Access EVA over fibre at 2 Gb/s?

- A. 10 km
- B. 35 km
- C. 300 m
- D. 500 m

E. 100 km

Answer: B

10. You want to test a failover in a Continuous Access EVA environment. To which data replication groups do you have to perform a failover command?

A. either source or destination

B. the destination replication group

C. the source data replication group

D. in bi-directional environments on both source and destination at the same time

Answer: B

11. For which strategy is disaster planning a factor of critical importance?

A. Business Agility

B. Adaptive Enterprise

C. Business Continuity

D. Adaptive Resource Management

Answer: C

12. The suspend command is issued against which resource?

A. Copy sets

B. Source Vdisk

C. Managed sets

D. Destination Vdisks

E. Data replication groups

Answer: E

13. What is the maximum distance configuration for Continuous Access EVA over fibre using long distance SFP at 4 Gb/s?

A. 10km

B. 35km

C. 300m

D. 500m

E. 100km

Answer: A

14. You are planning a Continuous Access EVA solution for a customer with high availability requirements. What is the HP recommended placement of management servers in this environment? (Select two.)

A. two at the source site

B. one at the source site

C. one at the destination site

D. two at the destination site

Answer: AD

15. Which disk-group is recommended by HP for a log disk when running a data replication group in synchronous or standard asynchronous mode?

A. online disk group

B. near-online disk group if available

C. same disk group as 51% of the copy sets

D. disk group with the lowest copy set percentage

Answer: B
