

## [HP HP0-J16](#)

**Exam Name:** Introduction to HP SANs

**Q & A :** 59 Q&As

**[Pdf Demo](#)**

### **Quality and Value for the HP0-J16 Exam**

[Just4Exams Practice Exams](#) for HP Certification I HP0-J16 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

### **100% Guarantee to Pass Your HP0-J16 Exam**

If you do not pass the Certification I HP0-J16 exam on your first attempt using our Just4Exams **HP0-J16 testing engine and pdf study guide**, we will give you a FULL REFUND of your purchasing fee.

### **Downloadable, Interactive HP0-J16 Testing engines and PDF Version**

Our Exam Preparation Material provides you everything you will need to take a [Certification I certification](#) examination. Details are researched and produced by [HP Certification](#) Experts who are constantly using industry experience to produce precise, and logical.

Exam : H P HP0-J16

Title : Introduction to HP SANs

1. Which tasks are associated with monitoring a target in a storage infrastructure management environment?

- A. identify, access, evaluate, and report
- B. discover, control, manage, and report
- C. configure, provision, repair, and migrate
- D. report, bill, analyze, diagnose, and predict

Answer: D

2. What are benefits of model-based automation? (Select two.)

- A. more control

- B. cost effectiveness
- C. better organization
- D. support for complex operations
- E. reduced likelihood of human error

Answer: BE

3. Which tasks are associated with controlling a target in a storage infrastructure management environment?

- A. discover, track, diagnose, and predict
- B. diagnose, predict, repair, and migrate
- C. configure, provision, repair, and migrate
- D. report, bill, analyze, diagnose, and predict

Answer: C

4. Which software concept is the basis of automation systems?

- A. rules engines - software to create and manage rules
- B. scan engines - software to manage and interpret rules
- C. policy engines - software to manage and interpret rules
- D. model engines - software to create and manage models

Answer: C

5. In the Storage Management Initiative Specification (SMI-S), which communication format is used by management clients and providers?

- A. Document Object Model (DOM)
- B. Common Information Model (CIM)
- C. Desktop Management Interface (DMI)
- D. Simple Network Management Protocol (SNMP)

Answer: B

6. Normalization is important for long-term information retention. What is normalization of information?

- A. conversion of information to computer readable format
- B. conversion of proprietary data formats into industry standard formats such as XML
- C. reduction of data to its most frequently used components; archival of all other components
- D. reduction of all data formats to a common format, so data can be read by a single ILM application

Answer: B

7. What is a common method for handling multiple reporting and monitoring functions?

- A. Use graphical reports to enhance interpretation.
- B. Combine all information into one report for simplicity.
- C. Separate low-level information reporting from higher-level analysis and decision making.
- D. Use intelligent interfaces to offload reporting and decision-making from management software.

Answer: C

8. Which industry standard organization approved the Storage Management Initiative Specification (SMI-S)?

- A. ITU
- B. ANSI
- C. IETF
- D. IEEE

Answer: B

9. Which target-based management software is expected to be provided with the storage component?

- A. OS management suites
- B. system management suites
- C. network management suites
- D. device-specific management tools

Answer: D

10. To which category of target-based management tools does HP Systems Insight Manager belong?

- A. system management
- B. network management
- C. storage systems management
- D. operating system management

Answer: A

11. What are the processing requirements of Information Lifecycle Management? (Select two.)

- A. fast
- B. secure
- C. auditable
- D. transparent
- E. easy to use

Answer: CD

12. Which features are provided by Information Lifecycle Management? (Select two.)

- A. measures to protect data from corruption through its life cycle
- B. technologies and processes to dispose of outdated storage equipment
- C. technologies and processes to organize data based on size and sensitivity
- D. processes that enforce data-retention policies and make decisions about appropriate data storage environments
- E. technologies and processes that determine how to store, manage, and communicate information according to its business value

Answer: DE

13. In the context of storage infrastructure management, what is the definition of the term target?

- A. a goal set for errors on a device
- B. an entity that needs management
- C. a disk or tape connected to a SCSI bus
- D. a vendor-specific management tool that connects to a device

Answer: B

14. What is the main challenge in discovering targets in the context of storage management?

- A. Discovery processes require the target to be reachable from the points doing the scanning.
- B. The diversity of the targets and their functions increases the complexity needed to discover them.
- C. Discovery processes interfere with production systems, so a convenient time must be scheduled.
- D. The diversity of proprietary methods complicates communication between agents and management software.

Answer: A

15. Because Information Lifecycle Management (ILM) interfaces with activities and people, there is a potential overlap between ILM and other areas. Which area is likely to overlap with ILM?

- A. IT Budget Planning
- B. IT Project Management
- C. Business Financial Planning
- D. Business Process Management

Answer: D
