Exam : HP HP0-J34

Title : Implementing MSA Storage Solutions

1. A customer has an MSA2324fc with dual controllers. What is required when adding an MSA70 drive enclosure to this configuration?

- A. dual I/O modules on MSA controllers
- B. a dual domain I/O module option
- C. two additional miniSAS to miniSAS cables
- D. a minimum of 16 dual-ported SAS drives

Answer: B

2. In addition to using the WBI or CLI, how can you set the date and time on an MSA2324fc G2 solution?

- A. by issuing the set controller-ntp enabled command through CLI

- B. by issuing the set controller-time command through CLI
- C. automatically as soon as the first host is connected
- D. by configuring the system to use Network Time Protocol (NTP)

Answer: D

3. Which key benefits does the MSA2012fc provide? (Select two.)

- A. clone and snapshot capability
- B. ability to mix disk drives of different sizes in a virtual RAID set without capacity loss
- C. flexible drive types and sizes
- D. controller-based replication capability
- E. support for dual-ported SATA disk drives

Answer: AC

4. Which array-head chassis for the MSA2000fc G2 has 24 drive bays?

- A. large form factor chassis
- B. medium form factor chassis
- C. small form factor chassis
- D. high density form factor chassis

Answer: C

5. Which data protection capabilities does the MSA2012i array provide? (Select two.)

- A. up to 255 snapshots
- B. up to 255 volume copies
- C. 128 volume copies
- D. 128 snapshots
- E. 64 volume copies
- F. 64 snapshots

Answer: CF

6. Which statement is true about the MSA Storage Management Utility?

- A. It is only located on the master MSA controller module.
- B. It resides on any server connected to the SAN.
- C. It resides on the SAN management server.
- D. It is located on either of the MSA controller modules.

Answer: D

7. The HP StorageWorks MSA2000 Family Storage Management Utility is used to manage which components?

- A. drive modules and virtual disks
- B. disk groups and virtual disks
- C. master volumes and replication groups
- D. pre-fetch cache and disks

Answer: A

8. What are valid hardware capabilities of the MSA2000? (Select two.)

- A. snapshots on MSA2000fc only
- B. data replication between arrays
- C. clones on any MSA2000
- D. SAS backend bus
- E. tri-port SATA drives for high availability

Answer: CD
