

## [HP HP0-K03](#)

**Exam Name:** *Implementing and Managing HP BladeSystem in the Enterprise*

**Q & A :** 130 Q&As

***Pdf Demo***

### **Quality and Value for the HP0-K03 Exam**

[Just4Exams Practice Exams](#) for HP Certification I HP0-K03 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

### **100% Guarantee to Pass Your HP0-K03 Exam**

If you do not pass the Certification I HP0-K03 exam on your first attempt using our Just4Exams **HP0-K03 testing engine and pdf study guide**, we will give you a FULL REFUND of your purchasing fee.

### **Downloadable, Interactive HP0-K03 Testing engines and PDF Version**

Our Exam Preparation Material provides you everything you will need to take a [Certification I certification](#) examination. Details are researched and produced by [HP Certification](#) Experts who are constantly using industry experience to produce precise, and logical.

Exam : HP HP0-K03

Title : Integrating and Managing HP BladeSystem in the Enterprise

1. Which power delivery modes are supported on the HP BladeSystem c-Class? (Select two.)

- A. AC redundant
- B. active/standby
- C. UPS redundant
- D. power supply redundant

Answer: AD

2. The primary Onboard Administrator in a c7000 enclosure is active in a redundant configuration and needs replacing. What must you do?

- A. Power down the enclosure and replace the active controller.

- B. Replace the active controller and restore settings from the redundant one.
- C. Swap the controller and allow the settings to be automatically copied over.
- D. Swap the redundant controller with the active controller and replace the defective controller.

Answer: D

3. For troubleshooting reasons, you want to disable dynamic power saving mode on a c-Class power enclosure. What is the correct way to do this?

- A. Slide the switch on the power management module to the on position.
- B. Disable the dynamic power saving mode in RBSU for the first blade in the enclosure.
- C. Log on to the Insight Display and disable the dynamic power saving mode under the power management tab.
- D. Log on to the Onboard Administrator and disable the dynamic power saving mode under the power management tab.

Answer: D

4. Which tool is designed to reduce the risk of security threats by automating acquisition and deployment of patches, and continuously enforcing their persistence in the Windows operating system environment?

- A. Integrated Lights Out (iLO)
- B. Virtual Machine Management (VMM)
- C. Performance Management Pack (PMP)
- D. Vulnerability and Patch Management (VPM)

Answer: D

5. Which Windows Performance Monitor counter is the most important counter for detecting memory bottlenecks in a Windows environment?

- A. disk:writes/second
- B. disk:pages/second
- C. paging file/%usage
- D. disk:pagefaults/second

Answer: B

6. What is the default IP address of the front diagnostics port of a p-Class server blade?

- A. 127.0.0.1
- B. 192.168.1.1
- C. 192.168.1.2
- D. 192.168.1.5

Answer: B

7. Where can you change the rebuild priority for a Smart Array controller on a BL460c?

- A. ACU
- B. ORCA
- C. RBSU
- D. Onboard Administrator

Answer: A

8. Which tool analyzes the server configuration and recommends an action to resolve known performance problems on HP BladeSystem c-Class server blades?

- A. iLO 2
- B. Onboard Administrator
- C. Performance Management Pack
- D. BladeSystem Integrated Manager

Answer: C

9. Which component of the optional Brocade 4Gb SAN Switch Power Pack can help administrators monitor specific fabric metrics from an SID (Source ID) to a DID (Destination ID), so they can fine-tune and scale the fabric more efficiently?

- A. ISL Trunking
- B. Fabric Watch
- C. Extended Fabric
- D. Advanced Performance Monitoring

Answer: D

10. Where does Performance Management Pack (PMP) derive its statistical analysis from?

- A. CPU Management Port using Microsoft Management Protocol (MMP)

- B. Insight Management Agents using Simple Network Management Protocol (SNMP)
- C. Integrated Performance Management chip using the Desktop Management Protocol (DMI)
- D. Integrated Performance Management chip using Simple Network Management Protocol (SNMP)

Answer: B

11. Your customer is running a Linux-based application on a c-Class server blade and has a performance issue with the application response time. What are the first actions in helping your customer resolve the performance problem? (Select two.)

- A. develop an action plan
- B. complete an environmental assessment
- C. use the Onboard Administrator to update all firmware
- D. determine the tools to use and gather performance data
- E. determine one or more possible reasons for a bottleneck

Answer: BD

12. What happens if you install an Emulex 4Gb Fibre Channel HBA card in mezzanine position 1 of the ProLiant BL480c server blades and Cisco Catalyst 3020 switch in interconnect bay 3?

- A. The Onboard Administrator allows the Cisco Catalyst 3020 switch to boot up, but disables its downlink ports.
- B. The Onboard Administrator allows the Cisco Catalyst 3020 switch to boot up, but disables the mezzanine card.
- C. The Onboard Administrator does not allow the Cisco Catalyst 3020 switch to boot up because of the mismatch with the mezzanine card.
- D. The Onboard Administrator does not allow the ProLiant BL480c server blades to boot up because of the mismatch with the interconnect switch.

Answer: C

13. Click the Exhibit button.

You are troubleshooting a configuration problem with linked c7000 enclosures and need to connect directly to the Onboard Administrator with a PC.

Which port is correct to use?

- A. port 1 of the top enclosure
- B. port 1 of the bottom enclosure
- C. port 4 of the top enclosure
- D. port 4 of the bottom enclosure
- E. port 5 of the top enclosure
- F. port 5 of the bottom enclosure

Answer: E

14. Which feature of PMP enables you to compare a newly established performance baseline with a previously created one?

- A. static analysis
- B. offline analysis
- C. online analysis
- D. comparative analysis

Answer: B

15. Which UNIX tool is capable of sending an alarm when one of the metrics exceeds a user-defined threshold?

- A. sar
- B. top
- C. iostat
- D. vmstat
- E. glance

Answer: E

16. What are the common chipsets available for the Fibre mezzanine cards on the c-Class BladeSystem? (Select two.)

- A. Intel
- B. AMD
- C. QLogic
- D. Emulex
- E. Adaptec

Answer: CD

17. Which database is supported by HP Vulnerability and Patch Management (VPM)?

- A. Oracle

- B. MySQL
- C. Postgresql
- D. Microsoft SQL

Answer: D

18. For optimal performance of an Infiniband switch in an HP BladeSystem c-Class, where should the mezzanine card in the blade server be installed?

- A. PCI-X slot 1
- B. any PCIe x4 slot
- C. Mezzanine position 1
- D. Mezzanine position 2

Answer: D

19. You are diagnosing a problem with an HP p-Class BladeSystem infrastructure. The installed server blades or interconnect switches do not power on, but the power supply AC power LEDs are on. None of the fault LEDs are illuminated. You ensured that the power enclosure is properly cabled and connected to the power outlets. What is another possible cause of this issue?

- A. The power zones are set incorrectly.
- B. The power bus bar circuit breakers are in the off position.
- C. The power enclosure circuit breakers are in the off position.
- D. The power supplies are configured for dynamic power saver mode.

Answer: B

20. What is the purpose of the Insight Display chat mode screen on a Blade Server rack?

- A. to display the active OA IP address and active OA service IP address
- B. to display helpful information such as contact phone numbers on the Insight Display
- C. to communicate between someone in front of the display and the remote administrator using the web interface
- D. to communicate between someone in front of the display and the remote administrator using a cell phone two-way pager

Answer: C
