Exam : HP HP0-M20

Title : HP Business Availability Center 6.5 Software

1. Which statement best describes the Monitor Administration?

- A. The Monitor Administration is responsible for adding monitors to Sitescope and CMDB.
- B. The Monitor Administration is responsible for the configuration of Business Process Monitor and CM profiles ONLY.
- C. The Monitor Administration is the starting point for EMS monitoring configuration and administration activity only when the Sitescope is registered to BAC.
- D. The Monitor Administration is the starting point for any monitoring configuration and administration activity.

Answer: D

2. What is the purpose of the container in Monitoring Administration?

- A. The container allows the integration via the source adapters of monitoring administration configuration into the CMDB
- B. The container allows you to organize the display of the Monitor administration tree according to location or organizational relationships
- C. The container allows a clear and automatic separation and differentiation between different types of profiles
- D. The container both organizes the display of Monitor administration and differentiates between different types of profiles

Answer: B

3. How do you change the default schedule of the business process profile execution?

- A. Access the Business Process Monitor admin web UI <http://<Business Process Monitor Machine Name>:2696> and from there change the schedule interval
- B. Access the Monitoring Administration business process profile wizard and Only during the creation process of the profile
- C. Access the Monitoring Administration business process profile wizard and during the creation process of the profile or later change the scheduling interval from the Monitoring Administration
- D. Change it to the minimal schedule of 15 minutes

Answer: C

4. In the profile creation wizard, what will happen when you select the profile database name (in a multiple profile database environment) from the combo box?

- A. A failure to create the profile since the default profile database is the only allowed option
- B. Data from the created profile to be sent to the selected database ONLY if it was marked as the default database
- C. Data from the created profile to be sent to the selected database
- D. You don't have an option to select the database - it is selected automatically for you by the Business Availability Center server

Answer: C

5. Which tool processes Alerts generated through the Client Monitor?

- A. Business Availability Center
- B. Client Monitor Agent
- C. Client Monitor Agent settings utility
- D. SiteScope

Answer: A

6. What type of applications does the Client Monitor measure the performance of?

- A. all
- B. faulty
- C. client-server
- D. predefined

Answer: D

7. Which tasks can an operator perform from the Business Process Monitor page?

- A. Add/remove Business Process Monitor instances, view configuration files, restart Business Process Monitors
- B. Run WebTrace, restart Business Process Monitor, analyze Business Process Monitor responses
- C. Add/remove Business Process Monitor instances, invoke page breakdowns, remote install Business Process Monitor
- D. View configuration files, view map of Business Process Monitor locations, set timing schedules

Answer: A

8. What happens in the event that communications are interrupted between a Business Process Monitor and the Core Services Server?

- A. The Business Process Monitor saves persistent information.
- B. The Business Process Monitor creates an Alert.
- C. The Business Process Monitor shuts down until communications are restored.
- D. The Business Process Monitor restarts the host machine to clear the system.

Answer: A

9. What happens when you copy and paste a Business Process Monitor profile in Monitor Administration?

- A. A logical profile will be created but the work will not be assigned to the Business Process Monitor but rather will be used as a pointer to the same Business Process Monitor task.
- B. A new profile will be created in the Monitoring administration and the job will be sent to the Business Process Monitor but the profile will be in a stopped status until started.
- C. A new profile will be created in the Monitoring administration and the job will be sent to the Business Process Monitor but the profile will start running automatically.
- D. You can only copy and paste empty containers.

Answer: B

10. Which protocol does the Business Process Monitor machine use to access the Core Server?

- A. SNMP
- B. HTTP or HTTPS
- C. FTP
- D. JMX

Answer: B

11. What server do you need to specify when registering SiteScope to BAC?

- A. core server
- B. processing server
- C. center server
- D. all servers

Answer: A

12. What is the quickest way to create a relationship between a CI and a Business Process Monitor?

- A. Create a profile and run it, make sure the adapters are synced and then edit a view and attach the monitor from within the view
- B. Create profile and use the attach CI option in the Monitoring Administration profile creation operation - this will automatically create the link between the CI and the Monitor entity
- C. To use the Monitor Deployment Wizard and automatically assign a monitor to a specific CI
- D. To use the instance view editor automatic CI attachment process

Answer: B

13. Which operating systems support SiteScope installation?

- A. Window, Linux and Solaris
- B. Windows and Solaris
- C. Windows only
- D. Windows and Linux

Answer: A

14. If your core server is replaced by another core server, what task should you perform on SiteScope to integrate the new core server?

- A. I will reset BAC integration from the SiteScope UI and then attach SiteScope to already existing profile.
- B. I will reset integration and will reconnect SiteScope.
- C. I don't need to do anything the recovery is automatic.
- D. I need to detach SiteScope, redirect it to the new core server from SiteScope UI and then attach it back to MA.

Answer: D

15. Which URLs are used to navigate to the Sitescope home page? Select two.

- A. Http://<Sitescope Server name>:8080/sitescope
- B. Http://<Sitescope Server name>:8888/sitescope
- C. Http://<Sitescope Server name>:8180/sitescope
- D. Http://<Sitescope Server name>:2696/sitescope

Answer: AB

16. What is the purpose of synchronization in Monitoring Administration?

- A. To rebuild the entire LDAP data structure and remove unnecessary/old profile entries from within the management database.
- B. To synchronize the management database data with the Sitescope structure in the Sitescope Server.
- C. To perform a consistency check, to verify that Sitescope, Business Process Monitor and CM profiles information stored in the management database are synchronized with the Monitoring Administration tree.
- D. To synchronize the Business Process Monitor with the Management database configuration in order to align the Business Process Monitor work with the actual monitoring work needed to be done.

Answer: C
