Exam : HP HP0-M23

Title : HP Business Availability Center Foundation

1. What is the main function of the Report Repository?

- A. store reports imported from other applications
- B. store reports saved by users at a specific state
- C. store reports saved by users with dynamic state
- D. store reports specific to the Dashboard component of BAC

Answer: B

2. What is the purpose of the session analyzer report?

- A. to correlate between sessions, session groups and session users

- B. to display user session data for applications configured for real user monitoring
- C. to show the history of all closed sessions which were opened against the application configured
- D. to display the status of the users that are currently using the application which is being monitored

Answer: B

3. How are BPM monitoring locations determined? (Select two.)

- A. by distant locations
- B. by random selection
- C. by high user populations
- D. by lowest cost to implement
- E. by high return on investment

Answer: CE

4. What is a context in Infrastructure Settings?

- A. the source application that triggers a set of alarms
- B. a group of foundations to which the same settings can be applied
- C. a group of applications to which the same settings can be applied
- D. an aid to separate all BAC configurable items into applications and foundations

Answer: D

5. How would you check the start-up status of BAC using the HP BAC Server Status?

- A. in the web browser navigate to `http://<BAC gateway>:8180/BACServerStatus.asp`
- B. in the web browser navigate to `http://<BAC data processing server>:8180/BACServerStatus.asp`
- C. on the gateway and the Data Processing server click on Start > Programs > HP BAC > Administration > HP BAC Server Status
- D. on the gateway and the Data Processing server navigate to `<BAC installation directory>bin` and activate the `HPBacServerStatus.exe` program

Answer: C

6. How can you navigate to the web interface of a data collector (for example, BPM, Sitescope or RUM Engine) without knowing its explicit name or IP address?

- A. Write a query on the UCMDB to locate the data collector name and IP address in order to access it.
- B. Navigate to "Admin>Platform>Data Collection>Data Collector Maintenance" and select the appropriate tab.
- C. Navigate to "Admin>End User Management Administration>Monitor" and locate the BPM you have just installed.
- D. Navigate to "Admin>Universal CMDB Administration>Source Manager" and edit the data collector adapter to list all appropriate data collectors.

Answer: B

7. What is the meaning of the origin attribute that exists in each CI?

- A. the BAC user that created the CI
- B. the view in which the CI was created
- C. the package from which the CI was deployed
- D. the data source or user that added the CI to the CMDB

Answer: D

8. How would you create a relationship between a CI and a Business Process Monitor when defining a profile?

- A. Use the instance view editor automatic CI attachment process.
- B. Use the Monitor Deployment Wizard to automatically assign a monitor to a specific CI.
- C. Create a profile and use the attach CI option in the EUM Administration profile creation operation.
- D. Create a profile and run it, make sure the adapters are synced and then edit a view and attach the monitor from within the view

Answer: C

- A. SLA alert
- B. Paging alert
- C. Sitescope alert
- D. Event based alert

Answer: D

10. What information does the Status Snapshot Report provide?

- A. worst transaction response time, worst availability by location
- B. worst transaction response time, worst availability by location

- C. worst availability by transaction, worst availability by location, worst availability by application, slowest applications
- D. worst response time by transaction, worst response time by location, worst response time by application, slowest applications

Answer: C

11. What is the purpose of the Downloads page?

- A. a location from which you can download BAC components
- B. a location to which you can download tools for use with BAC
- C. links to locations from which you can download BAC add-on monitors
- D. a location within the BAC directory structure where you can store downloaded software

Answer: A

12. What types of System Health are available?

- A. only the BAC built-in System Health is available
- B. Operations Center System Health and BAC built-in System Health
- C. BAC built-in System Health and enhanced System Health based on SiteScope
- D. BAC built-in System Health and enhanced System Health based on Real User Monitor

Answer: C

13. Which log files are used for troubleshooting SiteScope?

- A. Alert, Error and Topaz\_all.ejb
- B. Run Monitor, HP BAC and Operator
- C. Run Monitor, SiteScope\_all and Operator
- D. Topaz\_all.ejb, NannyStatus and Jboss\_boot

Answer: B

14. What is the purpose of Infrastructure Settings?

- A. to configure the hardware settings of the BAC servers
- B. to configure the look and feel of the BAC graphical user interface
- C. to define the various settings which determine how BAC and its applications run
- D. to configure the binding between BAC and the network interfaces on the BAC servers

Answer: C

15. Business Availability Center is powered by a set of servers that are responsible for facilitating system management, data handling, reporting, and alerting. Which servers are included within the Business Availability Center basic framework? (Select two.)

- A. Print Server
- B. Data Server
- C. Gateway Server
- D. Discovery Server
- E. Application Server
- F. Data Processing Server

Answer: CF

16. What does the data collector maintenance page in the Business Availability Center platform enable you to do?

- A. remotely install SiteScope instances on specific servers.
- B. manage and maintain SiteScope, Business Process Monitor, and RUM
- C. remotely install, manage and troubleshoot the operation of the Discovery Probe
- D. manage and install Business Process Monitor and Real User Monitor probe instances on specific servers

Answer: B
