Quality and Value for the HP2-K08 Exam

[Just4Exams Practice Exams](#) for HP HP APS HP2-K08 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

100% Guarantee to Pass Your HP2-K08 Exam

If you do not pass the HP APS HP2-K08 exam on your first attempt using our Just4Exams **HP2-K08 testing engine and pdf study guide**, we will give you a FULL REFUND of your purchasing fee.

Downloadable, Interactive HP2-K08 Testing engines and PDF Version

Our Exam Preparation Material provides you everything you will need to take a [HP APS certification](#) examination. Details are researched and produced by [HP Certification](#) Experts who are constantly using industry experience to produce precise, and logical.

Title : Supporting the MSA1000, 1500cs & 1510i

1. What are two functions of RAID level 5? (Select two.)

- A. uses only one physical disk in the array for parity
- B. distributes the parity onto every available disk in the array
- C. distributes two different parities onto every available disk in the array
- D. usually has the highest cost per GB of usable space because it duplicates the data
- E. has moderate costs per GB because it uses the capacity of one disk for parity per array

Answer: BE

2. Which statement is true regarding a dual-path configuration with a single controller?

- A. It is not supported.
- B. It requires Secure Path software.
- C. It is supported without Secure Path software.
- D. It requires the Redundancy Manager software.

Answer: C

3. Which rule applies for spare drive configuration with the Storage Management Utility for the MSA1510i?

- A. A spare disk must be the same speed as the other drives in the array.
- B. A spare disk can be mixed with SCSI and SATA drives in the same array.
- C. A spare disk must be the same size (or smaller) as the other drives in the array.
- D. A spare disk must be the same type (SCSI or SATA) as the other drives in the array.

Answer: D

4. How can you extend the storage capacity of a logical drive using the Array Configuration Utility? (Select two.)

- A. Add a hot spare to the array.
- B. Add a new disk to the logical drive.
- C. Add unused space from any array to the logical drive.
- D. Add a new disk to the array where the logical drive resides.
- E. Add unused space from the array where the logical drive resides.

Answer: DE

5. What is a characteristic of the read-ahead caching mechanism?

- A. Every I/O goes directly to the respective disk.
- B. The data read from the disks stays in cache until it reaches a threshold.
- C. Every I/O goes into the RAID controller cache and in a background operation to the respective disk.
- D. The RAID controller reads more data than requested from the disks, predicting the next read from the host that needs this additional data.

Answer: C

6. Which Fibre Channel topology is used for host connection with a single MSA Hub 2/3?

- A. fabric
- B. multipath
- C. dual loop
- D. arbitrated loop

Answer: D

7. What is the operational configuration limit for Secure Path 4.0c for Windows in an MSA storage environment? (Select two.)

- A. a maximum of 20 hosts per set of shared storage systems (per profile)
- B. a maximum of 128 hosts per set of shared storage systems (per profile)
- C. a maximum of 256 storage systems shared by a set of hosts (per profile)
- D. a maximum of 32 LUNS per target with a maximum of two paths per LUN
- E. a maximum of 128 LUNS per target with a maximum of two paths per LUN

Answer: BD

8. Which drive type is best for holding large amounts of reference data?

- A. ATA
- B. SCSI
- C. SATA
- D. Fibre Channel

Answer: C

9. Which statement about MSA-supported multipath software is correct?

- A. The QLogic Multipath Driver is required for Linux operating systems.
- B. HP Secure Path is required for all MSA-supported operating systems.
- C. The QLogic Multipath Driver cannot be used for Linux operating systems.
- D. HP Secure Path and the Microsoft Multipath I/O driver (MPIO) can be used for all MSA-supported operating systems.

Answer: A

10. What is the Storage Management Utility?

- A. a replacement for the Array Configuration Utility
- B. an alternate management tool for MSA1xxx systems

- C. a dedicated management tool for MSA1510i systems
 - D. a replacement for the MSA1510i Command Line Interface
- Answer: C
