Exam : Network Appliance NS0-102

Title : NetApp(ASAP) Accredited Storage Architect Professional

1. What is Tech OnTap from NetApp?

- A. a weekly technical podcast
- B. a monthly e-newsletter
- C. a monthly Webcast by a NetApp specialist
- D. an online knowledgebase for Data ONTAP

Answer: B

2. Which two products/functions from NetApp are NOT supported on the V-Series platform? (Choose two.)

- A. SnapLock Compliance

- B. RAID-DP
- C. FlexVol
- D. SnapLock Enterprise
- E. SnapMirror

Answer: AB

3. Which three statements about SnapDrive for Windows are true? (Choose three.)

- A. It is the foundation for SnapManager for SQL.
- B. It provides NTFS-consistent Snapshot copies.
- C. It simplifies LUN management in a Windows environment.
- D. It simplifies CIFS management in a Windows environment.
- E. It requires Active Directory to function.

Answer: ABC

4. Which two statements are true about SnapRestore? (Choose two.)

- A. After you use SnapRestore to revert to a selected Snapshot copy, you cannot undo the reversion.
- B. After you use SnapRestore to recover a file, the restored file remains read-only.
- C. SnapRestore allows for the recovery of a single file.
- D. SnapRestore allows for the recovery of a qtree and its contents.

Answer: AC

5. What are two features that NetApp DataFort has that Microsoft's free EFS does not? (Choose two.)

- A. FIPS hardware key security
- B. CryptoShred
- C. CryptoLock
- D. SAN user-aware authentication

Answer: AB

6. Which three requirements do NetApp core data storage systems provide to ensure patient health care data is compliant with health care regulations? (Choose three.)

- A. archival
- B. security
- C. disaster recovery
- D. high availability
- E. high performance

Answer: ABC

7. Which two protocol groups are supported natively on NetApp storage? (Choose two.)

- A. NAS protocols (CIFS, NFS)
- B. SAN protocols (iSCSI, FCP)
- C. streaming protocols (RTP, RTSP)
- D. messaging protocols (imap4, pop3)

Answer: AB

8. Which capabilities does NetApp ONTAP GX provide to achieve high performance for render and animation server farms?

- A. N-Way Clustering and Global File System
- B. Stretch Fabric MetroCluster and WAFL
- C. Clustering with SnapMirror Sync
- D. MetroCluster and RAID-DP

Answer: A

9. What is a function of NetApp FlexClone technology?

- A. It allows copies of database data sets with no additional space usage.
- B. It shrinks volumes and LUNs.
- C. It compresses databases.
- D. It validates every block written by the database to the storage.

Answer: A

10. Which two benefits would a customer enjoy after implementing SnapManager for Oracle into their Oracle Database environment? (Choose two.)

- A. reduced recovery time objective

- B. transparent database migration
- C. reduced database copy time
- D. reduced mirrored database footprint

Answer: AC

11. In a SnapManager for Exchange opportunity, which two additional software components can help you differentiate and grow NetApp value as compared to competing solutions? (Choose two.)

- A. Single Mailbox Recovery software
- B. SnapVault
- C. VFM
- D. SnapValidator

Answer: AB

12. SnapManager for Oracle, SnapManager for SQL Server, and SnapManager for Exchange are all part of which NetApp Manageability Software suite?

- A. Data Suite
- B. Server Suite
- C. Storage Suite
- D. Application Suite

Answer: D

13. What is a vFiler?

- A. a virtual instance of a NetApp Storage System created via MultiStore
- B. a controller running Data ONTAP that can front-end third-party storage
- C. a simulated version of Data ONTAP that runs on Linux
- D. a NetApp Disk-to-Disk virtual tape solution

Answer: A

14. Which feature of the NearStore VTL solution enables it to use up to 50% fewer physical tapes than other VTLs?

- A. shadow tapes
- B. tape smart sizing
- C. self tuning
- D. tape compressor

Answer: B

15. Your customer wants to run a database on a NetApp storage array where they already have home directories. In the event of low system resources, which NetApp product can ensure that the database receives the majority of the storage array resources?

- A. FlexClone
- B. FlexShare
- C. SnapManager for Oracle
- D. FlexCache

Answer: B

16. Within the NetApp Manageability Software Family, which products does the Application Suite contain?

- A. Protection Manager, Virtual File Manager, SAN Manager
- B. SnapDrive for Windows, SnapDrive for UNIX, ApplianceWatch
- C. Operations Manager, File Storage Resource Manager, CommandCentral Storage
- D. SnapManager for Oracle, SnapManager for SQL Server, SnapManager for Exchange

Answer: D

17. Which two Data ONTAP products or features benefit a customer running an Oracle decision support system on Linux? (Choose two.)

- A. CIFS
- B. FlexVol
- C. SnapValidator
- D. Virtual Local Disks

Answer: BC

18. Regulations call for semi-conductor manufacturers to maintain design data in reference form over extended periods.

Which NetApp solution offers this capability?

- A. SnapVault

- B. Open System SnapVault
 - C. SnapLock
 - D. SnapMirror
- Answer: C

19. Which two NetApp products can be used in a customer's existing third-party Exchange storage environment? (Choose two.)

- A. Single Mailbox Recovery software
- B. ReplicatorX
- C. SnapManager for Exchange
- D. Operations Manager

Answer: AB

20. Which two NetApp replication products support heterogeneous file service environments? (Choose two.)

- A. Virtual File Manager
- B. Open Systems SnapVault
- C. SyncMirror
- D. SnapMirror

Answer: AB
