**Exam Name:** TOGAF 8 Certification for Practitioners

**Q & A :** 387 Q&As

**[Pdf Demo](#)**

### **Quality and Value for the OG0-081 Exam**

[Just4Exams Practice Exams](#) for The Open Group The Open Group OG0-081 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

### **100% Guarantee to Pass Your OG0-081 Exam**

If you do not pass the The Open Group OG0-081 exam on your first attempt using our Just4Exams **OG0-081 testing engine and pdf study guide**, we will give you a FULL REFUND of your purchasing fee.

### **Downloadable, Interactive OG0-081 Testing engines and PDF Version**

Our Exam Preparation Material provides you everything you will need to take a [The Open Group certification](#) examination. Details are researched and produced by [The Open Group Certification](#) Experts who are constantly using industry experience to produce precise, and logical.

Exam : The Open Group OG0-081

Title : TOGAF 8 Certification for Practitioners

1. 1.A.5: During the Architecture Vision phase, what would be a typical source of enterprise wide constraints?

- A. The results of a detailed gap analysis
- B. The project plan for the given architecture activity
- C. External benchmarks
- D. The organization's business and architecture principles
- E. The architecture contract

Answer: D

2. 1.E.2: During Phase E - Opportunities and Solutions, a gap analysis can be used to compare the \_\_\_\_ between the as-is and the to-be architecture.

- A. requirements
- B. Solution Building Blocks
- C. Architecture Building Blocks
- D. business functions
- E. standards

Answer: D

3. 1.P.3: Which of the following statements about architecture principles is most true?

- A. Architecture principles must be tailored to the requirements of a given architecture project
- B. Architecture principles are intended to be enduring and seldom amended
- C. Architecture principles cannot transcend the organization's business strategies and objectives
- D. Executive Management can define principles as a means of enforcing compliance to its policies and rules
- E. Due to their sensitive nature, architecture principles should be kept confidential

Answer: B

4. 6.1.1: Which of the following is not true about the nature of governance?

- A. All of these are characteristics of governance.
- B. Provides guidance on the effective use of resources to achieve the organization's strategic objectives
- C. Ensure that all actions and related decisions are available to be examined by authorized parties
- D. All decisions taken, processes used and their implementation will not be allowed to create unfair advantage to any one particular party.
- E. All involved parties have a commitment to adhere to procedures, processes and authority structures established by the organisation.

Answer: A

5. 3.1.3: In the high level Technical Reference Model \_\_\_\_.

- A. all of these
- B. the application directly communicates to the outside environment
- C. the application communicates with the application platform through the communications infrastructure interface
- D. it is possible to analyze performance criteria
- E. the communication infrastructure is very diverse

Answer: E

6. 1.A.2: Typically, business goals and drivers have already been established and need only be validated. If this is not true, what process should be followed?

- A. Resequence the project to occur later in the overall program
- B. The team should work with the project sponsor to create a set of goals and objectives and to validate those goals and objectives with top management
- C. The project team should create a set of placeholder goals and objectives
- D. Place the project on hold until a suitable set of business goals and objectives can be defined by top management
- E. Benchmark with a similar, noncompeting organization, and adopt their best practices for business goals and objectives

Answer: B

7. 1.F.1: What is the objective of Phase F?

- A. To establish the IT Governance framework that will be used to direct deployment.
- B. To sort the implementation projects into priority order for implementation and migration.
- C. To implement change management processes that will be used to manage the implementation projects.
- D. To validate the architecture vision.
- E. All of these tasks

Answer: B

8. 1.G.1: What are the key inputs to Phase G - Implementation Governance?

- A. reusable solution building blocks
- B. statement of architecture work
- C. request for architecture work
- D. all of these items
- E. impact analysis

Answer: D

9. 6.2.2: In TOGAF's Architecture Governance organizational structure, which group is chiefly responsible for deployment and operations?

- A. domain architects

- B. IT service management
- C. Chief Information Officer/Chief Technology Officer
- D. program management office
- E. technical support

Answer: B

10. 1.D.2: The TOGAF Technical Reference Model \_\_\_\_\_.

- A. is intended as an example and should be tailored to the organization's needs
- B. must be used "as is" for developing comprehensive architecture models
- C. contains several industry specific frameworks
- D. is intended to contain the Enterprise Continuum
- E. contains only solution building blocks

Answer: A

11. 2.5: Who usually initiates a Request for Architecture Work?

- A. the sponsoring organization
- B. the architecture organization
- C. the CIO/CTO
- D. the architecture governance board
- E. senior management

Answer: A

12. 1.R.1: When can new requirements be added to the requirement management repository?

- A. during each phase of the ADM
- B. at the Architecture Vision phase
- C. anytime during Phases A through D
- D. only upon completion of a business scenario
- E. when submitting the Request for Architecture Work

Answer: A

13. 4.1.4: The Architecture Continuum \_\_\_\_\_ the Solutions Continuum.

- A. drives
- B. is driven by
- C. is designed to satisfy
- D. is based on
- E. guides and supports the evolution of

Answer: E

14. 1.CA.6: Which of the following would be a potential downstream use of the qualitative criteria for the application architecture

- A. managing code quality
- B. generating service level agreements
- C. regression testing
- D. gap analysis
- E. All of the above

Answer: B

15. 2.18: A Technical Architecture Report should contain all of these items except \_\_\_\_.

- A. requirements traceability analysis
- B. project impact analysis
- C. technology architecture models
- D. technical specification for each building block
- E. gap analysis report

Answer: B

16. 5.2: The U.S. Department of Defense C4ISR Architecture framework (now DODAF) provides an integrated architecture model with three views. Which of these sets of views is provided?

- A. logical, physical, financial
- B. operational, technical, systems
- C. logical, physical, operational
- D. strategic, tactical, operational
- E. strategic, systems, operations

Answer: B

17. 3.1.1: Which of the following would be a good example of an infrastructure application?

- A. Virtual Private Network
- B. System and Network Management system
- C. e-Mail
- D. Office (desktop) software
- E. All of these

Answer: E

18. CA.1: All of the following elements are required in the Application Architecture Baseline Document except \_\_\_\_.

- A. architecture models of the candidate system(s)
- B. business and organization units supported
- C. precedent and successor applications
- D. owner(s) or business unit(s) responsible for requirements
- E. hardware and software platforms used

Answer: A

19. 2.23: The final version of an Impact Analysis should contain all of the following except \_\_\_\_.

- A. prioritized projects
- B. enhanced budget forecasts
- C. time ordered sequencing
- D. Implementation recommendations
- E. measures of effectiveness

Answer: B

20. 1.H.1: As the ADM cycle is completed for a given architecture program, the architecture staff is responsible for \_\_\_\_.

- A. Project planning
- B. Final appraisal of the implemented architecture
- C. Ongoing monitoring of business and technology changes related to the architecture work
- D. Implementation Governance
- E. Internal marketing of the solution

Answer: C
