

## **EMC e20-090**

**Exam Name:** *emc technology foundations storage management*

**Q & A :** 151 Q&As

**Pdf Demo**

### **Quality and Value for the e20-090 Exam**

[Just4Exams Practice Exams](#) for EMC Technology Foundations e20-090 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

### **100% Guarantee to Pass Your e20-090 Exam**

If you do not pass the Technology Foundations e20-090 exam on your first attempt using our Just4Exams **e20-090 testing engine and pdf study guide**, we will give you a FULL REFUND of your purchasing fee.

### **Downloadable, Interactive e20-090 Testing engines and PDF Version**

Our Exam Preparation Material provides you everything you will need to take a [Technology Foundations certification](#) examination. Details are researched and produced by [EMC Certification](#) Experts who are constantly using industry experience to produce precise, and logical.

Exam : EMC E20-090

Title : EMC Technology Foundations Storage Management

1. Which type of task can be performed by VisualSRM Intelligent Actions without relying on host-based scripts?

- A. File system tasks such as mount, unmount
- B. File tasks such as delete, compress
- C. Mailbox tasks such as copy, move
- D. Table tasks such as extend, re-index

Answer: B

2. What are the thirteen predefined Performance Manager views called?

- A. Critical Metrics
- B. Performance Views
- C. Symmetrix Overview
- D. Vital Signs

Answer: D

3. How many Alert threshold levels does ControlCenter offer?

- A. 3
- B. 4
- C. 5
- D. 7

Answer: C

4. How would you use ControlCenter to make zoning changes?

- A. Create a Temp Zone set and merge it with the Active Zone set
- B. Disable the Active Zone set, edit it, and re-enable it
- C. Edit a Planned Zone set and activate it
- D. Edit the Active Zone set and save it

Answer: C

5. Which information does VisualSRM collect about Mail Servers?

- A. Mail server alert status
- B. Mailbox folder names and sizes
- C. Rates of transmitted and received messages
- D. Total number of virus infected messages

Answer: B

6. What is a fundamental component of an iSCSI implementation?

- A. Connectrix switch
- B. Host with Fibre Channel HBAs
- C. IP network infrastructure
- D. Storage array with Fibre Channel ports

Answer: C

7. A UNIX client must perform which operation to access a NAS advertised connection point?

- A. Export
- B. Map
- C. NFSMount
- D. Share

Answer: C

8. What are two valid types of zoning in a SAN?

- A. Flexible Zoning and Invariant Zoning
- B. Hard Zoning and Soft Zoning
- C. SNIA Zoning and Vendor-Unique Zoning
- D. Serial and Parallel zoning

Answer: B

9. For load balancing purposes, how many ControlCenter Store processes can be running on a particular host?

- A. 1
- B. 2
- C. 3
- D. no limit

Answer: A

10. Which CLARiiON component is used for staging and prefetching data?

- A. nv ram
- B. PSM
- C. Read cache
- D. Write cache

Answer: C

11. Which view can always be accessed from the ControlCenter Tool Bar, regardless of the task being performed?

- A. Administration
- B. Data Protection
- C. Relationship
- D. Storage Allocation

Answer: C

12. What software must be installed in order to discover both Symmetrix and CLARiiON arrays with the ControlCenter Storage Agent for SMI?

- A. Common Mapping Agent
- B. NaviCLI
- C. Solutions Enabler
- D. VisualSRM

Answer: C

13. Which CLARiiON GUI based tool is used to present LUNs to hosts?

- A. Fabric Manager
- B. Navisphere CLI
- C. Navisphere Manager
- D. Web Tools

Answer: C

14. Which IT issue does VisualSRM help resolve?

- A. Manual and error-prone storage provisioning adds complexity
- B. Multiple products required to coordinate backup tasks on many hosts adds complexity
- C. Need to identify dormant files that are no longer accessed for better storage utilization
- D. Visualization of entire storage path from filesystem to array drive is required

Answer: C

15. What describes the iSCSI protocol?

- A. ATA over SCSI
- B. IP over SCSI
- C. SCSI over ATA
- D. SCSI over IP

Answer: D

16. Which VisualSAN software module provides switch alerting?

- A. Configuration Manager
- B. Network Manager
- C. Performance Manager
- D. SAN Manager

Answer: B

17. What Boolean operation is used to calculate parity?

- A. AND
- B. OR
- C. XAND
- D. XOR

Answer: D

18. What does a Domain ID uniquely identify?

- A. A fabric in a multi-fabric environment
- B. A Fibre Channel node on a name server
- C. A storage frame within a fabric
- D. A switch within a fabric

Answer: D

19. Which statement about Celerra TimeFinder/FS Far Copy is correct?

- A. Provides a pointer based view of the file system
- B. Shares the same volume as the Production File System

- C. Source and Target are asynchronously replicated
- D. Source and Target are synchronously replicated

Answer: C

20. What is the primary purpose of iSNS?

- A. To assist with discovery of iSCSI targets
- B. To implement TCP offload for better bandwidth
- C. To translate EUI-format names into iQN-format names
- D. To translate iQN-format names into EUI-format names

Answer: A
