

EMC e20-095

Exam Name: EMC Technology Foundations-CAS

Q & A : 304 Q&As

Pdf Demo

Quality and Value for the e20-095 Exam

[Just4Exams Practice Exams](#) for EMC Technology Foundations e20-095 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

100% Guarantee to Pass Your e20-095 Exam

If you do not pass the Technology Foundations e20-095 exam on your first attempt using our Just4Exams **e20-095 testing engine and pdf study guide**, we will give you a FULL REFUND of your purchasing fee.

Downloadable, Interactive e20-095 Testing engines and PDF Version

Our Exam Preparation Material provides you everything you will need to take a [Technology Foundations certification](#) examination. Details are researched and produced by [EMC Certification](#) Experts who are constantly using industry experience to produce precise, and logical.

Exam : EMC E20-095

Title : EMC Technology Foundations-CAS

1. Which statement about Network backup is correct?
 - A. Both Metadata and Data passes over the network infrastructure
 - B. Only Data passes over the network infrastructure
 - C. Only Metadata passes over the network infrastructure
 - D. No Metadata or Data passes over the network infrastructure

Answer: A

2. What is the first step or event when storing an object in a Centera environment?

- A. Centera stores the object
- B. Content Address is retained for future reference
- C. Object is sent to Centera via Centera API over IP
- D. Unique Content Address is calculated

Answer: D

3. What is the maximum number of DataMovers supported in the NS5XX range of equipment?

- A. 2
- B. 4
- C. 6
- D. 8

Answer: A

4. In a NetWorker directed recovery, what is true about the destination client?

- A. Cannot also be the source client and the administering client
- B. Cannot be the administering client
- C. Cannot be the source client
- D. May also be the administering client

Answer: B

5. Which statement is true about Celerra Replicator for iSCSI?

- A. Is a file level I/O transfer solution
- B. Is implemented over campus distances only
- C. Is implemented over traditional fibre channel infrastructures
- D. Is implemented over traditional network infrastructures

Answer: D

6. What is a characteristic of a Content Address in Centera?

- A. Filesystem based
- B. Globally unique
- C. Location-dependent
- D. Sequentially based

Answer: B

7. What is the standard disk configuration for ATA drives?

- A. 1+1
- B. 4+1
- C. 6+1
- D. 8+1

Answer: C

8. What are features of a NetWorker storage node?

- A. Manages devices, generates tracking data, and supports multiplexing
- B. Manages devices, generates tracking data, provides recovery and backup interfaces
- C. Manages devices, stores tracking data, and supports multiplexing
- D. Stores tracking data, supports multiplexing, and reads data during cloning

Answer: A

9. What is a role of the NetWorker server?

- A. Creates backups and tracking information
- B. Gathers information about backups from multiple data zones
- C. Manages backup devices
- D. Stores NetWorker configuration information and tracking data

Answer: D

10. In a Centera, how many internal switches are in a two cube Generation 4 cabinet?

- A. 2
- B. 3
- C. 4
- D. 5

Answer: C

11. Which of the following is a dynamic routing protocol?

- A. DHCP
- B. NDMP
- C. OSPF
- D. SNMP

Answer: C

12. With IP version four (IPv4) addresses, how many octets make up the address?

- A. 2
- B. 4
- C. 6
- D. 8

Answer: B

13. What is the final step when retrieving an object in the Centera environment?

- A. Application authenticates request and delivers object
- B. Application finds the Content Address and delivers object
- C. Centera authenticates request and delivers object
- D. Centera receives request via the API over IP

Answer: C

14. What tool is used by service personnel to troubleshoot the Centera?

- A. Centera GUI
- B. Centera Manager
- C. Centera Viewer
- D. CentraStar Verify

Answer: C

15. Which statement about Internet Protocol (IP) is correct?

- A. Defines the rules and procedures for sending information between network devices
- B. Delivers datagrams to all members of its destination host group
- C. Maps a logical network layer address with a physical MAC address
- D. Sends administrative information between network devices

Answer: A

16. Which statement about NDMP2D backup is correct?

- A. Both Metadata and Data passes over the network infrastructure
- B. Data passes over the network infrastructure
- C. Metadata passes over the network infrastructure
- D. No Metadata or Data passes over the network infrastructure

Answer: C

17. With a subnet mask of 255.255.240.0, what will the network boundary be without enabling 1 bit subnetting?

- A. 8
- B. 16
- C. 32
- D. 64

Answer: B

18. What is a correct statement when describing NAS clients?

- A. Access data irrespective of their physical locality
- B. Access data via block level I/O only
- C. Always support both NFS and CIFS protocols
- D. Use raw data formatted storage volumes

Answer: A

19. Which statement about User Datagram Protocol (UDP) is correct?

- A. Connectionless base protocol
- B. Every transmit requires an acknowledgement
- C. Guaranteed delivery protocol

D. Ordered packet delivery

Answer: A

20. With an IP network address of 132.15.0.0 and a subnet mask of 255.255.240.0 without enabling 1 bit subnetting, what would be the broadcast address on the first subnet?

A. 132.15.15.255

B. 132.15.16.255

C. 132.15.31.255

D. 132.15.32.255

Answer: C

21. How many CFIs exist in a NetWorker data zone?

A. One per backup volume

B. One per data zone

C. One per NetWorker client

D. One per NetWorker server

Answer: C

22. What is a function of NetWorker?

A. Centralize and automate backup and recovery

B. Create replicas of mission-critical information on disk arrays

C. Enable failover to remote servers

D. Manage capacity of front-end storage devices

Answer: A

23. Which statement about Celerra TimeFinder/FS Near Copy is correct?

A. Is a CLARiiON only solution

B. Provides a discrete standalone copy of the file system

C. Provides a pointer based view of the file system

D. Shares the same volume as the Production File System

Answer: B

24. Which statement about AVM is correct?

A. Enabled when the client operating system is using multi-pathing technology

B. Is used by default when creating volumes with the CLI

C. Is used by default when creating volumes with the GUI

D. Needs to be manually enabled when the system is initialized

Answer: C

25. A UNIX client must perform which operation to access a NAS advertised connection point?

A. Export

B. Map

C. NFSMount

D. Share

Answer: C

26. What is a key requirement of Content Addressed Storage?

A. Deterministic Performance

B. Longevity

C. Transactional

D. Update Intensive

Answer: B

27. Which statement about Celerra TimeFinder/FS is correct?

A. Is a CLARiiON only solution

B. Is a Symmetrix only solution

C. Provides a pointer based view of the file system

D. Shares the same volume as the Production File System

Answer: B

28. What is a characteristic of Centera fixed content?

- A. Expandable
- B. Short-term storage
- C. Transaction Oriented
- D. Unalterable

Answer: D

29. The exhibit displays the basic components of a Centera. What are the names of the components labeled 2 and 3?

- A. 2=Access/Storage Nodes and 3=CUA
- B. 2=Access/Storage Nodes and 3=Storage Nodes
- C. 2=Switches and 3=Access/Storage Nodes
- D. 2=Switches and 3=Storage Nodes

Answer: D

30. What is a characteristic of Centera?

- A. Block level storage interface
- B. File Structure management
- C. Guaranteed content authenticity
- D. OLTP storage array

Answer: C
