Title : Juniper Networks Certified Juniper DX (DXAP) Associate Exam

1. From the DX WebUI Dashboard, which steps are used for creating a new admin user?

- A. Click Admin > Users. Enter username, password, role, account status, and email.
- B. Click Admin > Users. Enter username, password, role, account status, and user class.
- C. Click Users > Manage Users. Enter username, password, role, account status, and user class.
- D. Click Users > Manage Users. Enter username, password, ActiveDirectory domain, account status, and role.

Answer: B

2. What are two valid Cluster load balancing methods? (Choose two.)

- A. urlhash

- B. backup chaining
- C. least connections
- D. fewest outstanding requests

Answer: AD

3. Which two benefits does the Juniper DX provide? (Choose two.)

- A. It compresses all images.
- B. It protects servers from DDoS attacks.
- C. It protects servers from SynFlood attacks.
- D. It loads all content from web servers to flash.

Answer: BC

4. Which protocols are used to export and import configurations?

- A. FTP or SCP
- B. FTP or TFTP
- C. TFTP or SCP
- D. TFTP or SMTP

Answer: C

5. Which three statistics are available when viewing the Cluster statistics page? (Choose three.)

- A. AppRule counters
- B. new SSL sessions
- C. connections to target server
- D. total number of 200 responses
- E. average download time per page

Answer: BCD

6. What are three Juniper DX Cluster benefits? (Choose three.)

- A. performance
- B. authorization
- C. compression
- D. protocol validation
- E. UDP load balancing

Answer: ACD

7. When adding a new user and assigning a role, which user role has "read only" rights to the configuration and operational states?

- A. user
- B. read_only
- C. target_operator
- D. security_operator

Answer: A

8. For a Juniper DX Cluster, what is a basic target server health check?

- A. ping
- B. TCP health check
- C. Layer 7 health check
- D. request HTTP default page

Answer: B

9. What do you need to upgrade the DXOS?

- A. an upgrade .gz file placed on your FTP server
- B. an upgrade .tar file placed on your SCP server
- C. an upgrade .pac file placed on your TFTP or SCP server
- D. an upgrade CD provided by your Juniper Networks representative

Answer: C

10. Which statement is true about "sticky" load balancing for Clusters?

- A. The "clientip" setting does not apply to clusters, it only pertains to a Forwarder.
- B. When set to "clientip" it uses the client's IP address to bind the client to a particular target server.
- C. When set to "clientip" it allows a DX sticky cookie to be sent to and stored by the client based on the IP address.
- D. When set to "clientip" it ensures that all subsequent requests are directed to the same client that made the initial request.

Answer: B

11. How does the Juniper DX accelerate web servers?

- A. by translating HTTP requests to HTTPS
- B. by refusing client connections that are unnecessarily refreshed by end users
- C. by multiplexing numerous client-side connections to fewer server-side connections
- D. by multiplexing numerous server-side connections to fewer client-side connections

Answer: C

12. Which statement is true when logging in using the WebUI?

- A. Port 80 for HTTP is enabled by default.
- B. Port 443 for HTTPS is enabled by default.
- C. Port 8090 for HTTP is enabled by default.
- D. Both HTTP and HTTPS are enabled using their standard port values.

Answer: C

13. Which statement is true when you enable SSL for the WebUI?

- A. SSL is enabled for the WebUI by default.
- B. You must address the WebUI using HTTPS://.
- C. You must change the WebUI port when enabling SSL.
- D. The demokey and democert are applied to the WebUI by default.

Answer: B

14. How do you disable a server from Juniper DX Cluster without terminating active client requests?

- A. Delete the server.
- B. "Soft pause" the target server.
- C. "Hard pause" the target server.
- D. Create a new Cluster without the server.

Answer: B

15. Which two functions require the use of the CLI? (Choose two.)

- A. adding a VLAN
- B. adding a cluster
- C. running a tcpdump
- D. adding a target server

Answer: AC
